

# Flip 'n Charge™ Candle

SOL:mate

*Flickering candlelight,  
charged by the sun!*

Enjoy a beautiful, realistic candlelight glow without the hazardous flames, unpleasant smoke or messy wax of traditional candles.

Long-lasting, amber LED bulb “flickers” like a real candle, so indoors it’s the perfect mood-setting candle to enhance a romantic dinner...or use it outdoors on your patio or poolside for nighttime get-togethers.

Built-in battery is charged by the patent-pending solar panel hidden on the underside of the candle housing. Just flip the candle over to charge it then flip it back over for lifelike candlelight enjoyment.

Contemporary, frosted-shade design works with any decor, inside or out.

*Just flip the  
candle over to  
reveal the solar  
panel for  
recharging*

**Sold in a  
2 Pack  
Gift Box**

- Amber LED bulb “flickers” like a real candle
- No flame, no smoke, no drips
- Flip it to recharge using the unique under-base solar panel
