
PHARMACY APPLICATIONS

The TSP800 is ideal for printing electronically received prescriptions at the pharmacy counter.

The pharmacy provides a printed record of the electronic prescription in the exact format a handwritten prescription would be personally received.

The TSP800 is the perfect thermal printer solution for:

- **Medical Offices**
- **Medical Clinics**
- **Emergency Rooms**
- **Hospitals**

CERTIFIED CURE

Many clinical and medical software management solutions are now promoting the TSP800 as the prescription printer of choice.

The TSP800 prints faster than a laser printer, produces output that is clearer than an inkjet printer and it is smaller than a shoe box so it is a true space saver.

In addition, the TSP800 will only print what you need, saving you time and money with your printer consumables.

Always Leading - Always Innovating

THERMAL PRESCRIPTION PRINTER FROM STAR MICRONICS

*A Certified Cure for the
Medical & Pharmaceutical
Industries....*

The Star Micronics TSP800

RX PRINTER

Star Micronics, the world leader in the POS and specialty printer industry, with over 50 years of manufacturing expertise, has the answer to the physicians' call for a simple, legible and secure printed prescription:

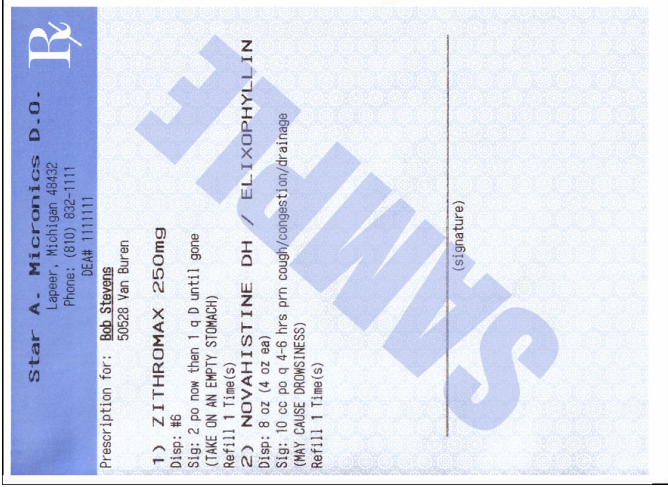

The TSP800 Printer

Star Micronics has a dual solution to print thermal prescriptions using its TSP800 thermal printer.

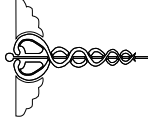

Answering the requests from the Medical and Pharmaceutical Industries to efficiently automate the prescription process and make it simple is the cure from Star.

The TSP800 printer enables doctors to print thermal prescriptions vs. handwritten prescriptions from a pad avoiding legibility errors. Utilizing specialized and secured thermal prescription paper, the prescriptions are printed using the latest medical technology software on the market, resulting in a secured legible script in seconds.

No more messy ribbon replacements, the TSP800 features simple and easy "Drop-In" secured thermal prescription paper, the sole consumable.
