USB TELEPHONE ADAPTER

Get the best of both worlds of voice communications with the USRobotics USB Telephone Adapter. Using any standard telephone you can now take full advantage of the Skype™ Internet telephony application, while preserving the ability to place standard calls over your telephone company supplied service. The USB Telephone Adapter connects to both your PC, for Internet calling, and your telephone line. It features advanced capabilities including intelligent forwarding of incoming Skype calls to a mobile phone and Call Waiting between Skype and PSTN calls. With advanced compression, sophisticated signal processing and echo cancellation, whether you are calling on a standard line or using Skype, you are assured of excellent call quality.

USRobotics®

Flexible Internet voice communications!

|	
Free Calls to Anywhere	Now you can call anywhere for FREE! Simply install Skype software, install the USRobotics USB Telephone Adapter, attach an ordinary telephone[†] and dial/connect to any other Skype user in the world.
Great Compatibility	• Makes Internet telephony as simple and comfortable as standard telephone calling • Enable Skype usage throughout the house when used with a cordless phone • No special equipment or services needed from the telephone company or PTT • Supported Operating Systems – Windows XP & Windows 2000
Excellent Voice Quality	• Integrated echo cancellation, advanced audio compression and powerful signal processing deliver life-like conversation quality • Full-duplex operation eliminates clipping
Innovative Calling Features	• Internet Call Fowarding – Reduce missed calls by forwarding Skype calls to your mobile phone • Advanced Call Waiting – Notification of incoming calls, Skype or PSTN, and the ability to switch between them • Toll Bypass – Make Skype calls from your mobile phone, bypassing long-distance charges, domestic or international • Conference Calling – Conduct 3-way conferences between Skype calls and regular telephone calls • Caller ID – Displays Skype user name or PSTN Caller ID*
Easy to Install and Use	• Simple to install and use – Attach to a broadband connected PC or laptop, plug in the PSTN line and telephone and install the software
