Release Notes for Cisco SPA3102 Firmware Version 5.2.13

February 2012

These Release Notes describe the new features and enhancements in the Cisco SPA3102 firmware version 5.2.13.

Contents

This document includes the following topics:

Changes Since Firmware Version 5.1.10

Enhancements

- Add support for fetching admin/config.xml. The configuration file can be retrieved by URL: http://*ip_addr*/admin/config.xml (where *ip_addr* is the actual ip address of spa3102).

- Added an audio dump debug option. When Voice > System > Debug Option is set to *dbg_aud_dump*, both the FXO port and the FXS port will start sending audio data to the system log. Several *.dat* files will be added to the syslog server directory. Configuring this setting to *none* will stop the audio dump. It is best to enable this feature only when needed for debugging.

- Added DTMF playback twist on the the *Voice* tab > *Regional* page.

- Added DTMF playback level&twist on the *Voice* tab > *PSTN Line* page. (CSCtw71735)

Resolved Issues

- Fixed an issue in which Caller ID Failed. (CSCtb67946)

- Fixed an issue with detection of user inputs in the Interactive Voice Response (IVR) unit. (CSCso34152)

- Fixed an issue in which a call through the PSTN caused all subsequent VoIP or PSTN calls to get the reorder tone. (CSCtt69983)

- Fixed an issue in which the preferred codec setting was ignored. (CSCtt70062)

- Fixed an issue in which a conference bridge could not be established by using an account code. (CSCtu35079)

- Fixed an issue in which dialing did not time out properly after a user entered invalid input. (CSCse53921)0

- Fixed errors with parameters whose Data Type is PhTmplt (such as Caller Sel X Caller and Ring X Caller). (CSCsg45351)

- Fixed an issue in which T38 fax failed. (CSCsh94145)

- Fixed an issue in which fax transmissions failed at 14400 bps. (CSCte53533)

- Fixed an issue in which changes in the QDisc setting did not take effect during provisioning. (CSCth58164)

- Fixed an issue in which the line was not disconnected properly after the remote end disconnected. (CSCtl92028)
