INTRODUCTION

Thank you for purchasing the **WORMHOLE SWITCH JUC700**! This amazing device gives you the capability to share video graphics card resources between two computers, and quickly transfer data, pictures, music, videos or other files between two computers at the super-speed rate of 5Gbps. The **WORMHOLE SWITCH JUC700** not only lets you share the keyboard and mouse with another computer, but also supports multi-display environments.

Features

- ✧ Easily transfer your data, photos, music, and videos between your computer & tablet
- ✧ Mirror & extend your display between two computers
- ✧ Share hard-drive resources between two computers
- ✧ Save additional cost by utilizing multiple computer/tablet hard drives and/or monitors
- ✧ Conforms to USB 3.0, 2.0 and 1.1.
- ✧ Conforms to Super-speed USB 3.0 (5Gbps) transfer rate.
- ✧ Supports touch screen function

System Requirements

- ✧ OS: Windows 8.1 / 8 / 7 / XP
- ✧ Available on USB 3.0 port
- ✧ CPU: i3 Dual core 2.8 GHz
- ✧ RAM: 2GB memory or higher

Package Contents

- ✧ WORMHOLE SWITCH JUC700*1pcs
- ✧ QIG *1pcs
- ✧ Driver CD*1pcs

Specifications

Power	
Power Mode	Bus-powered
Interface	
Interface	USB 3.0 Type-A Male Connector *2
Video Display	
Supports Modes	Video Playback: 1080P
	Extended/Mirror Display
Physical Specifications	
Housing Material	Aluminum
Dimensions	Main body: 61(W) X 19 (H) X 10.5 (D) mm
Cable length	150 cm (5ft)
Weight	Approximately 45 g (including cable)

Functions

Supported Operation Systems	Windows to Windows
Device Share: Keyboard & Mouse Control Switching	
Use your mouse to move off the edge of the screen	Yes
Keyboard & Mouse sharing	Yes
Display Share	
Video Display Sharing	Yes (Mirror/Extend)
Touch Screen Control	Yes
Data Share	
Data Transfer Application	Yes

GETTING STARTED

Please read BEFORE Installation

- ✓ **Install driver completely on both computers** before inserting the **USB 3.0 WORMHOLE SWITCH JUC700** USB Cable into your computers.
- ✓ You can connect any side/color of the USB 3.0 **WORMHOLE SWITCH JUC700** USB Cable to either of your computers.
- ✓ Run the setup program as **An administrator** to avoid errors in installation
- ✓ Uninstall the previous driver first before updating the latest driver
- ✓ The display screen will flash during installation

I. Driver Installation on both computers:

Please install the driver on both of the computers that will be connected to the JUC700. In the future, please also remember to update the driver on both sides.

※Please make sure the USB cable of **USB 3.0 WORMHOLE SWITCH JUC700** is unplugged from your PC or Notebook before executing the installation program.

Driver installation: Windows 8/7

Please complete the following steps to start the application. Insert the Driver CD into your computer's CD-ROM drive. The setup program should be launched automatically. If Autorun does not begin, go to **Computer**, click on your CD drive and manually run the setup CD by double-clicking on **Setup.exe**

1. The installation page will be launched. To start click on **Install the Latest Driver** (Please make sure your computer is connected to the internet or press **Install Driver** to start the installation).

When the User Account Control appears, please press **Yes** to continue installation

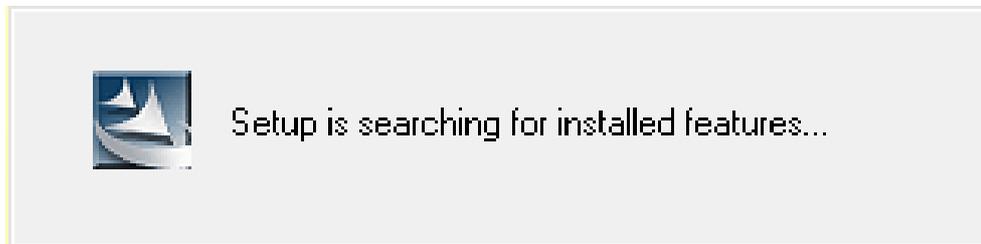

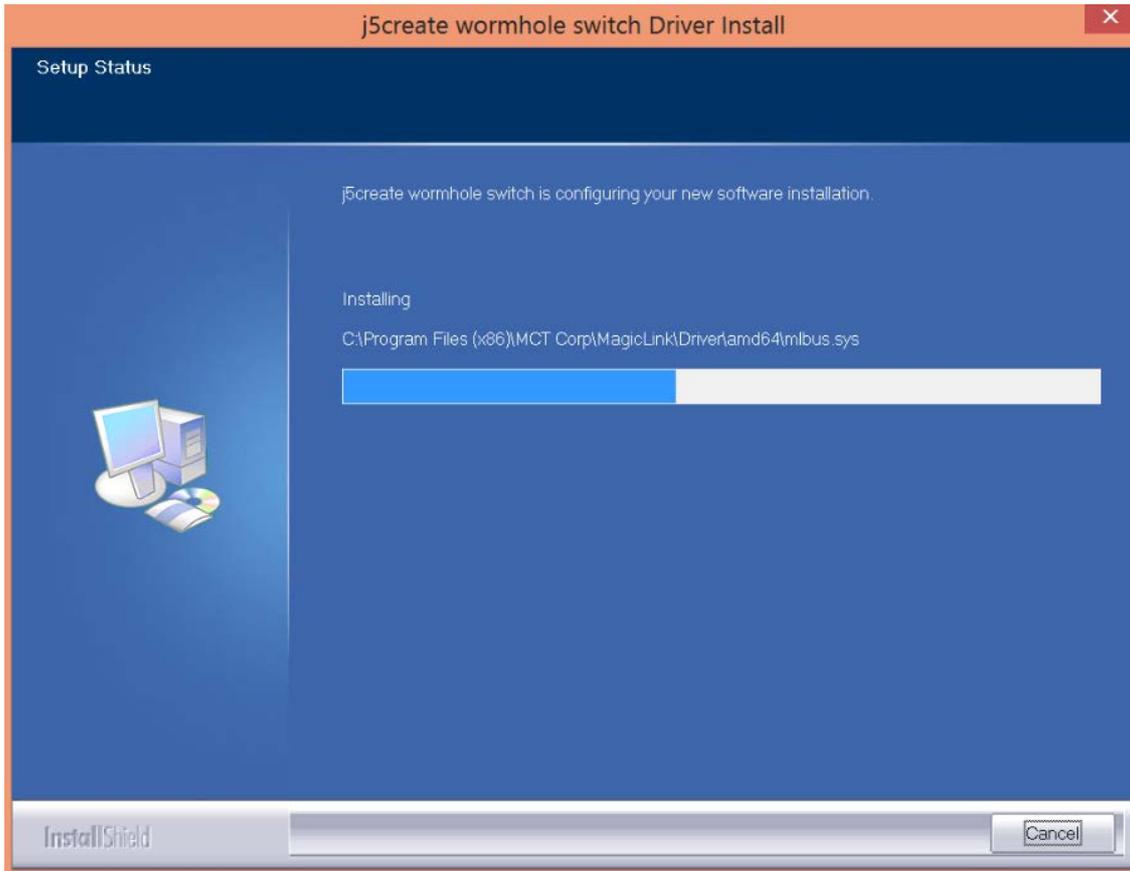

2. After pressing the installation option, the InstallShield Wizard will launch, click **Next>** to continue

3. Read the license agreement and check **I accept the terms of the license agreement**. Click **Next >** to accept and continue.

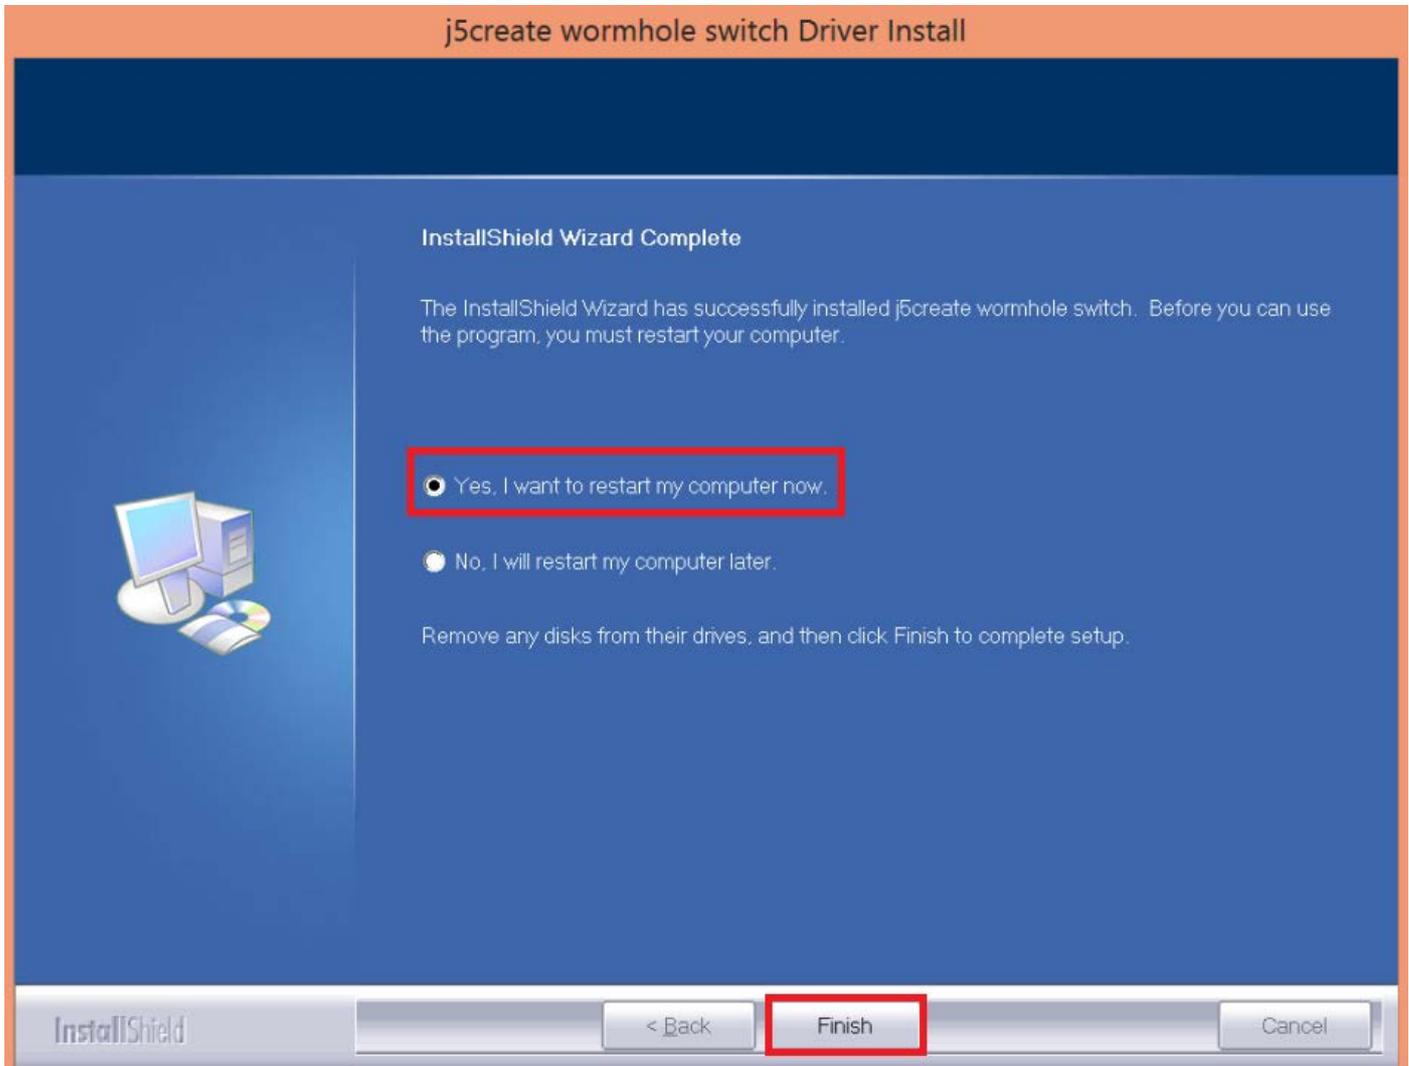

4. Driver installation in process

5. Finish Installation:

When Install Shield Wizard is complete, select **Yes, I want to restart my computer now**. Click **Finish** to restart.

6. Please repeat the driver installation on the second computer that will be connected to the WORMHOLE SWITCH JUC700.

Driver installation: Windows XP

Device Driver Installation

This section illustrates the procedure for the installation of the device driver on Windows XP. To start, insert the Driver CD into your computer's CD-ROM drive. The setup program should be launched automatically. If Autorun does not begin, go to **Computer**, click on your CD drive, and manually run the setup CD by double-clicking on **Setup.exe**

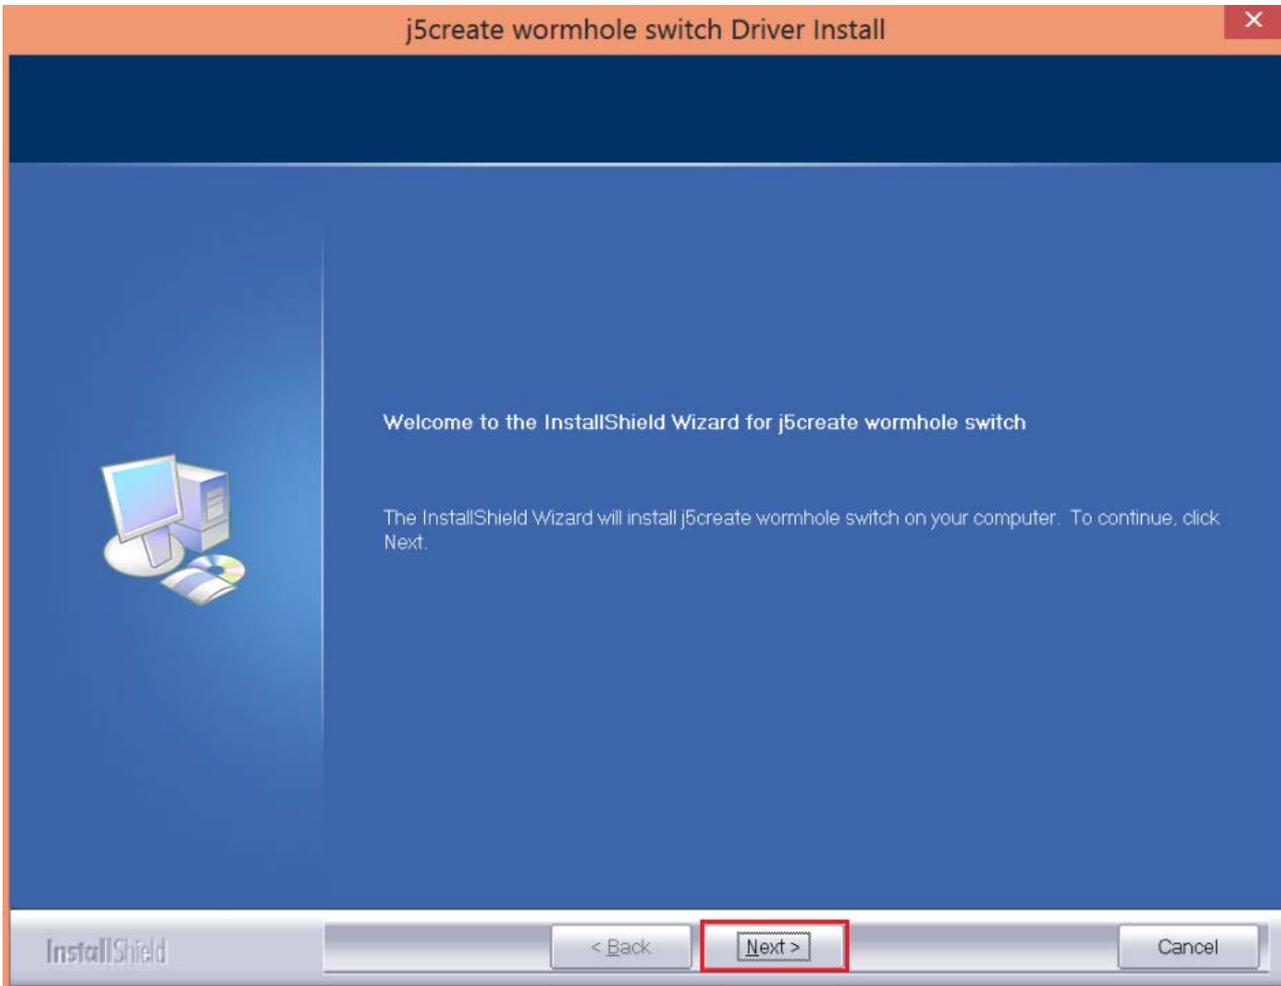

※Please make sure the USB cable of **USB 3.0 WORMHOLE SWITCH JUC700** is unplugged from your PC or Notebook before executing the installation program.

1. The installation page will be launched. To start click on **Install the Latest Driver** (Please make sure your computer is connected to the internet or press **Install Driver** to start the installation).

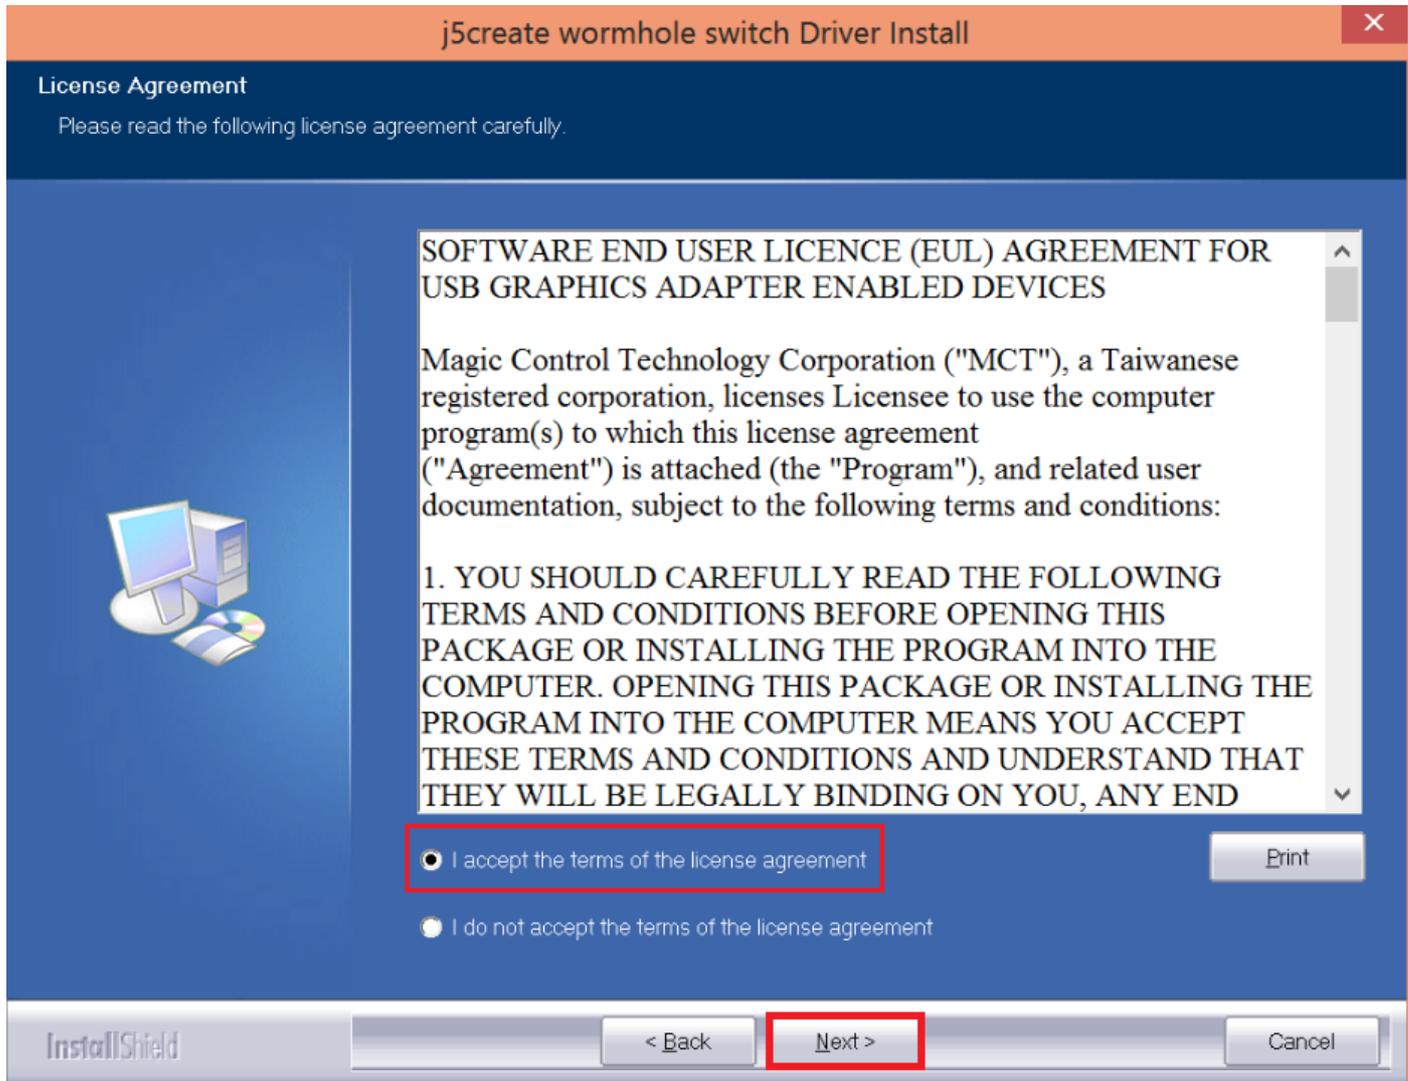

The screenshot shows the driver installation interface for the j5create USB3.0 Wormhole Switch. On the left, there is a sidebar with the j5create logo and several navigation options: 'Install the Latest driver' (highlighted in blue), 'Install Backup driver', 'View User Manual' (with a link to 'JUC700 USER MANUAL'), and 'View Product Video' (with links to 'DISPLAY ADAPTER', 'WORMHOLE SWITCH', 'NEWPORT STATION', and 'WORMHOLE STATION'). At the bottom of the sidebar, there is a 'TECHNICAL SUPPORT' section with a toll-free number (888-689-4088) and an email address (service@j5create.com). The main content area features the product name 'USB3.0 Wormhole Switch' and the tagline 'Display Data Device Sharing'. Below this, two USB3.0 Wormhole Switch devices are shown: one with a green top and one with a blue top. An 'INNOVATIONS AWARDS 2014' badge is visible in the top right corner. The website URL 'www.j5create.com' and copyright information '2013 All Rights Reserved j5create. All other Software and trademarks are property of their owners' are at the bottom right.

2. After choosing the installation option, the InstallShield Wizard will launch, click to continue

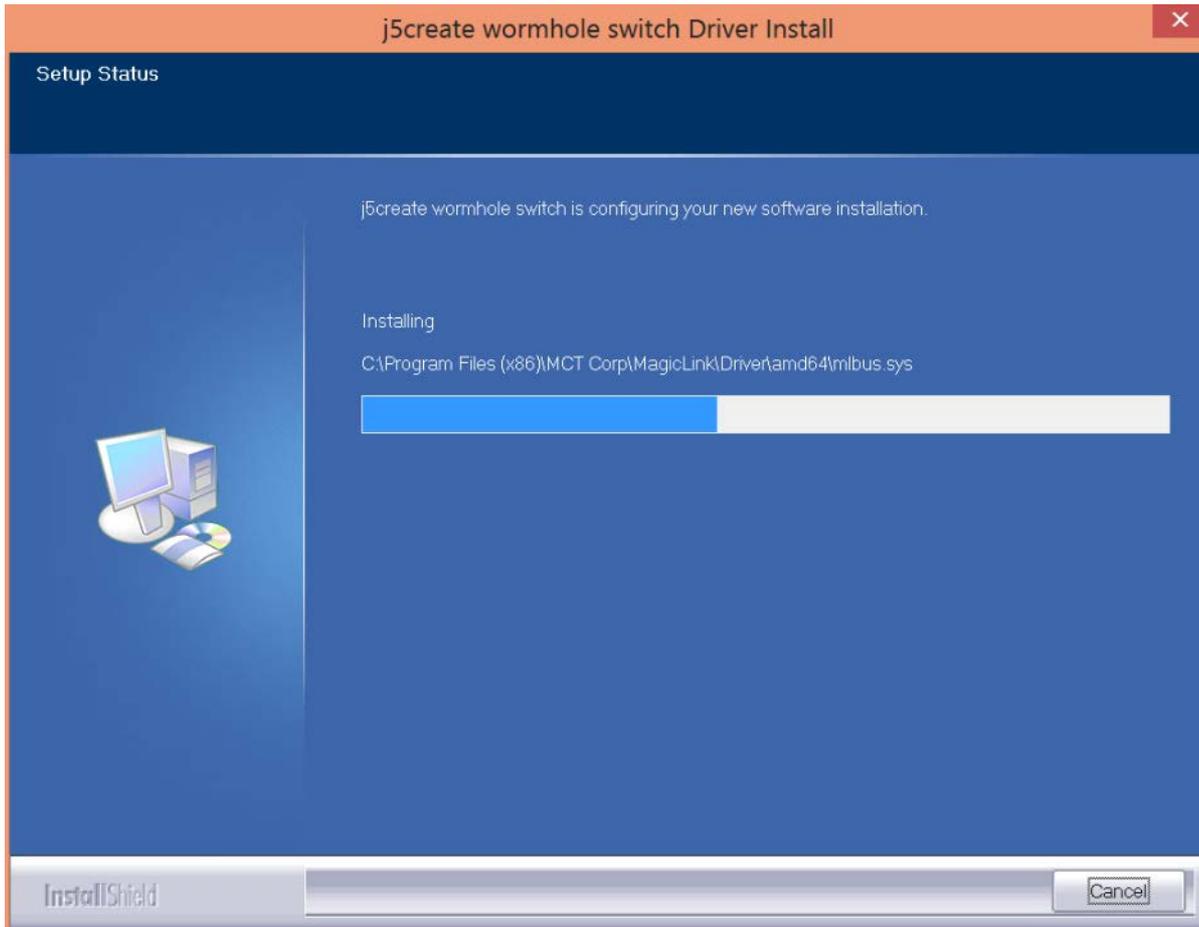

Next>

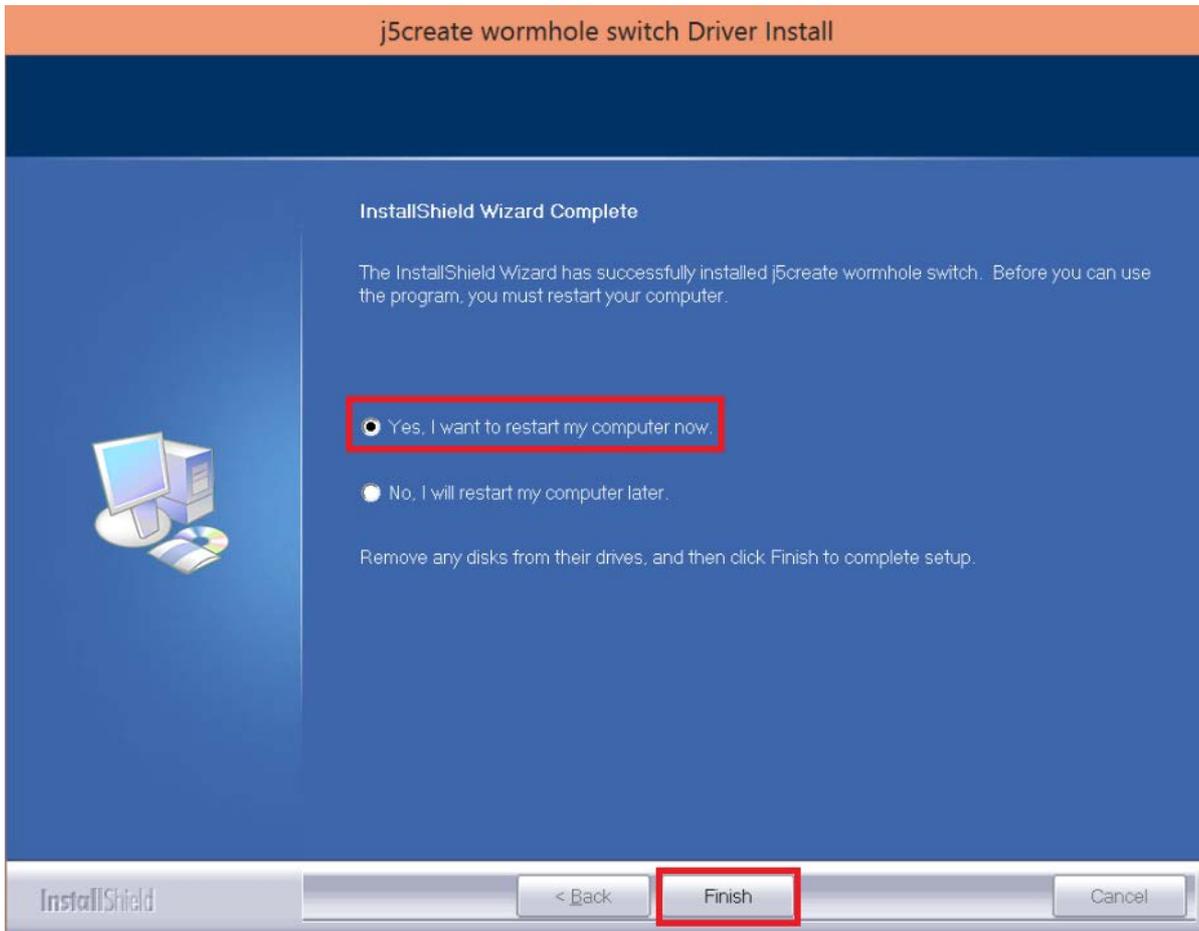

3. Read the license agreement and check **I accept the terms of the license agreement**. Click **Next >** to accept and continue.

4. Driver installation in process

5. When InstallShield Wizard is complete, select **Yes, I want to restart my computer now**. Click **Finish** to restart.

6. Please repeat the driver installation on the second computer that will be connected to the JUC700.

Tips: Verify Driver Installation

To verify the **WORMHOLE SWITCH JUC700** has been installed successfully. Go to the **Control Panel – Programs**, the j5create **WORMHOLE SWITCH JUC700** driver

 j5create wormhole switch 13.20.1128.3186 should be in the list.

II. Device connection

After the computer is rebooted, connect either end of the **WORMHOLE SWITCH JUC700** into a USB 3.0 port on one of the two computers. And connect the other end of the **WORMHOLE SWITCH JUC700** into the second computer.

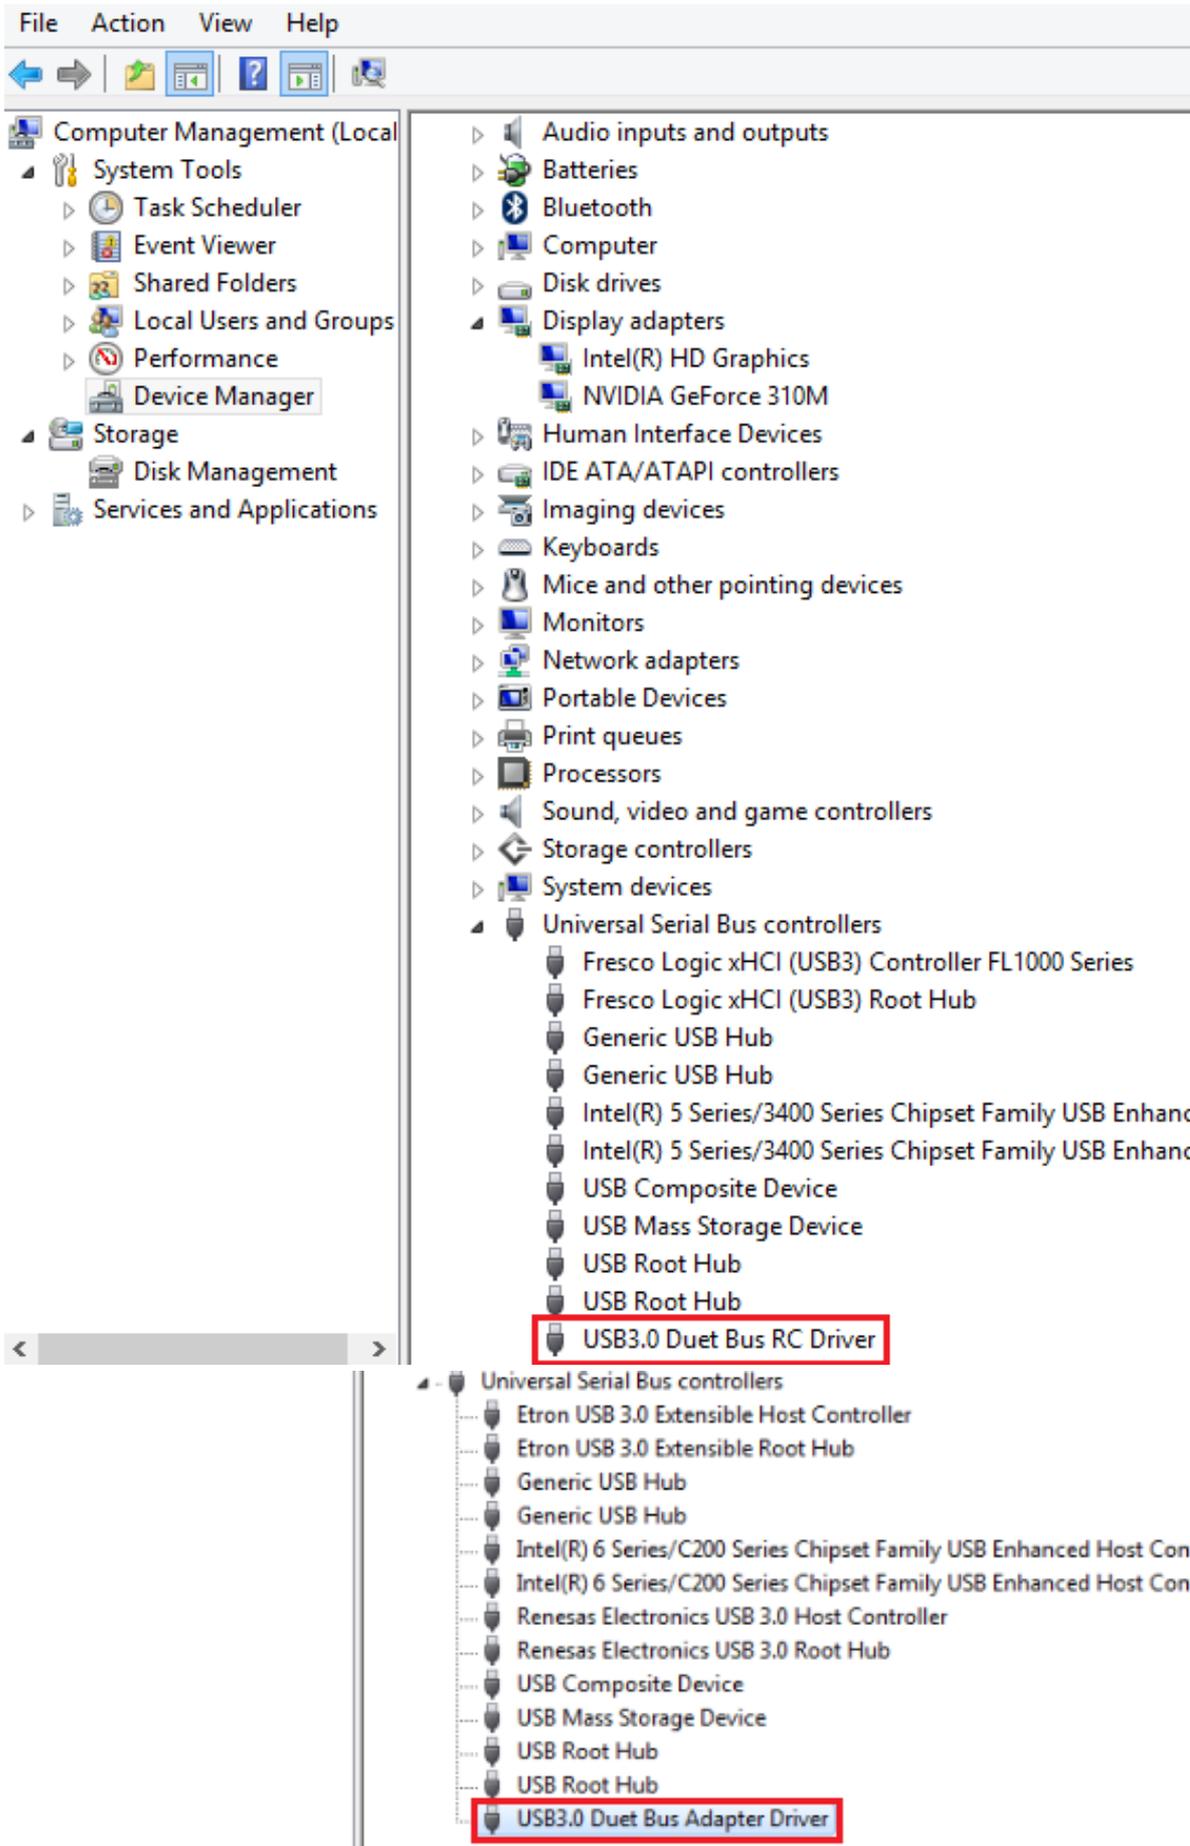

(The computer might take some time to recognize the JUC700 the 1st time it is plugged in)

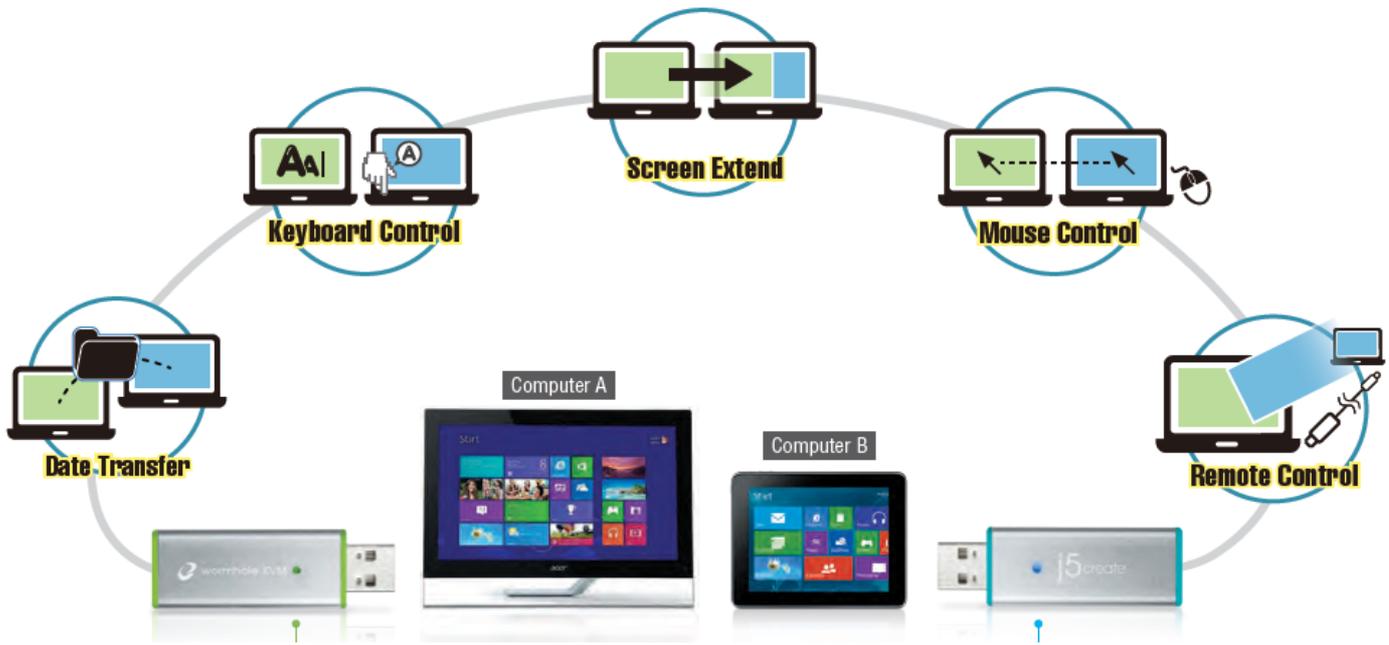

Tips: Verify Device Driver Installation and Hardware connections

The following procedure helps you to verify the success of **WORMHOLE SWITCH JUC700** driver installation after connecting it to both computers.

Right-click **My Computer** → **Manage** → **Device Manager** click + sign of **Universal Serial Bus controllers**, the device name for the **WORMHOLE SWITCH JUC700** will be shown on the list.

Various applications between 2 computers

Tips: WORMHOLE SWITCH JUC700 has two side connectors in two colors (blue & green) the icons that appear in the control bar will help you to distinguish between the two computers.

On the computer with the blue side of the cable plugged in, the computer shows the blue icon along with the blue control bar.

This will be the **Blue computer**

On the computer with the green side of the cable plugged in, the computer shows the green icon along with the green control bar

This will be the **Green computer**

III. Settings for both computers

Once the **WORMHOLE SWITCH JUC700** is plugged in, there are a few settings to adjust on both computers (NB/PC/AIO/Tablet):

Select the position of the other computer

Choose Extended Mode or Mirror Mode

Check the box if you wish to keep the same settings, the program will skip the above process the next time you connect.

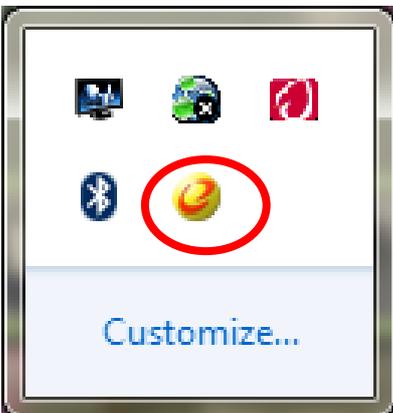

Functions and how to use

After the settings have been adjusted, a control bar appears in the righthand corner of both screens. The control bar allows you to control Display and Data sharing between the two computers.

Close Control bar:

Re-start Control bar: Double click the icon on the tast bar

I. Display Share

View Blue computer:

You can view the blue computer on either computer screen. Simply select the blue icon and the green computer's display will turn into the 2nd monitor for the blue computer. You can then choose either extend or mirror mode for the blue computer.

View Green computer:

You can view the green computer on either computer screen. Simply select the Green icon and the blue computer's display will turn into the 2nd monitor for the green computer. You can then choose either extend or mirror mode for the green computer.

Stop display sharing:

◆ EXTENDED MODE

- ✧ This feature allows the attached computer to work as an **Extended** display of the on-board screen. The extended working space improves work efficiency.
- ✧ You may change the relative position of the two computers under **Display Settings**.

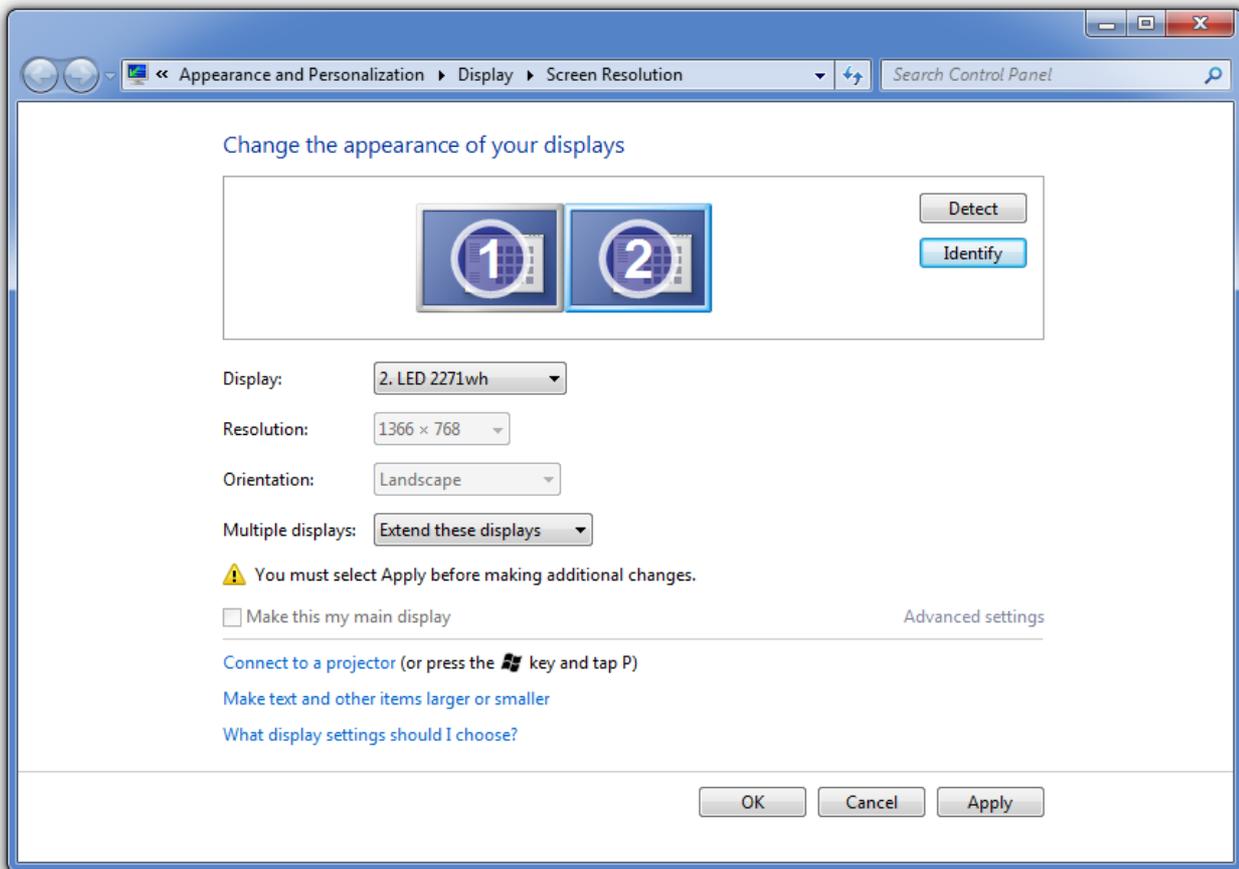

◆ MIRROR MODE

- ✧ This feature allows the same contents of the on-board screen to be displayed (mirroring) on the other computer.
- ✧ The screen resolution setting on the attached computer will follow the on-board screen's resolution. For example, if the on-board screen's resolution is 1024x768x32bit, then the mirrored computer will retain the same resolution.

Resolution Setting for shared display

For fast access to the system choose **Display Settings**. When the **Screen Resolution** window pops up, you can identify each monitor's number by clicking **Identify**. You can then change the

resolution of the two screens.

Touch Screen Control sharing:

If the computer has a touch screen, you can directly use the touch screen to control the computer being mirrored or extended on the touch screen.

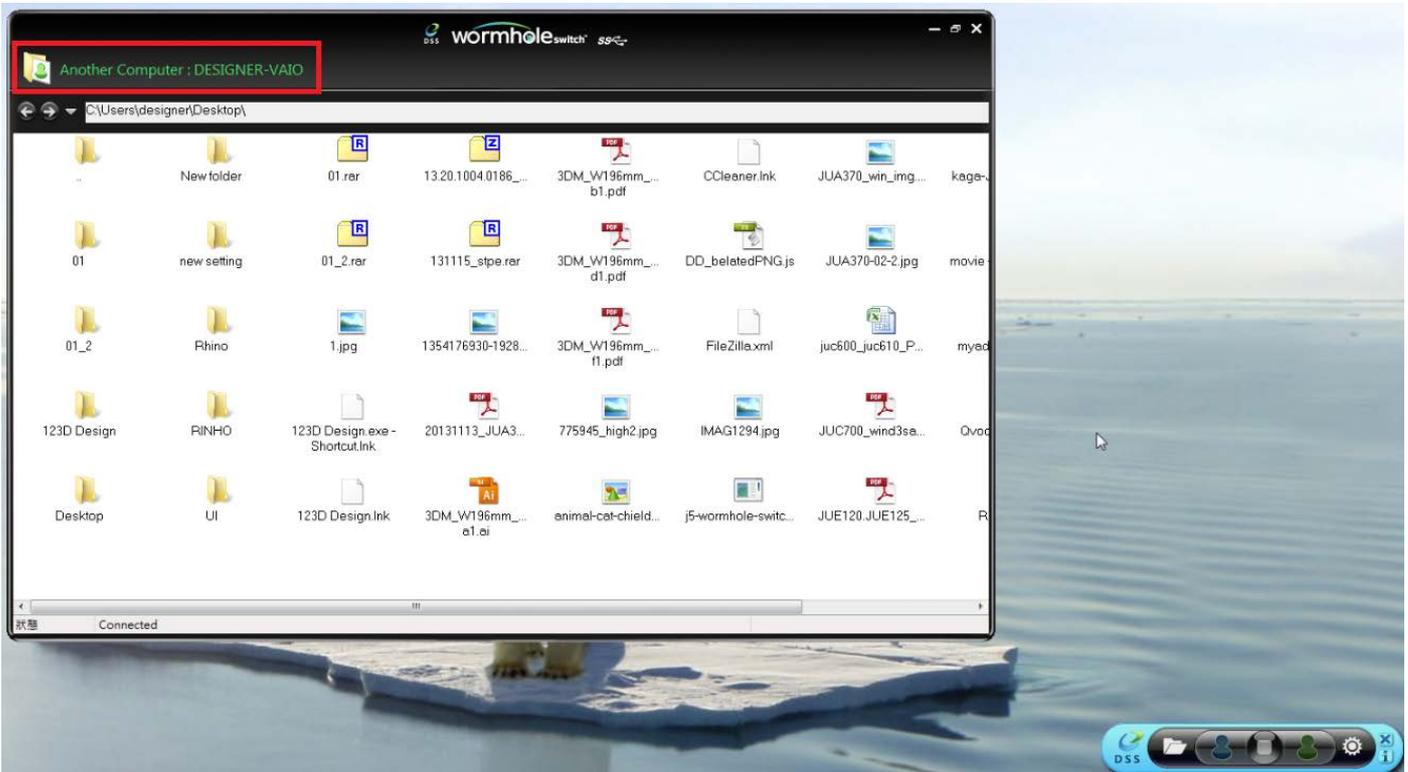

II. Data share

View and transfer data from the opposite computer (**Green computer**), by clicking the **folder** icon on the blue tool bar

A file transfer shuttle tool will appear enabling you to transfer data from the **Green computer** to the **Blue computer**.

The JUC700 supports file and data transfer through Drag/Drop or Copy/Paste from the opposite computer at 5Gbps transfer rate.

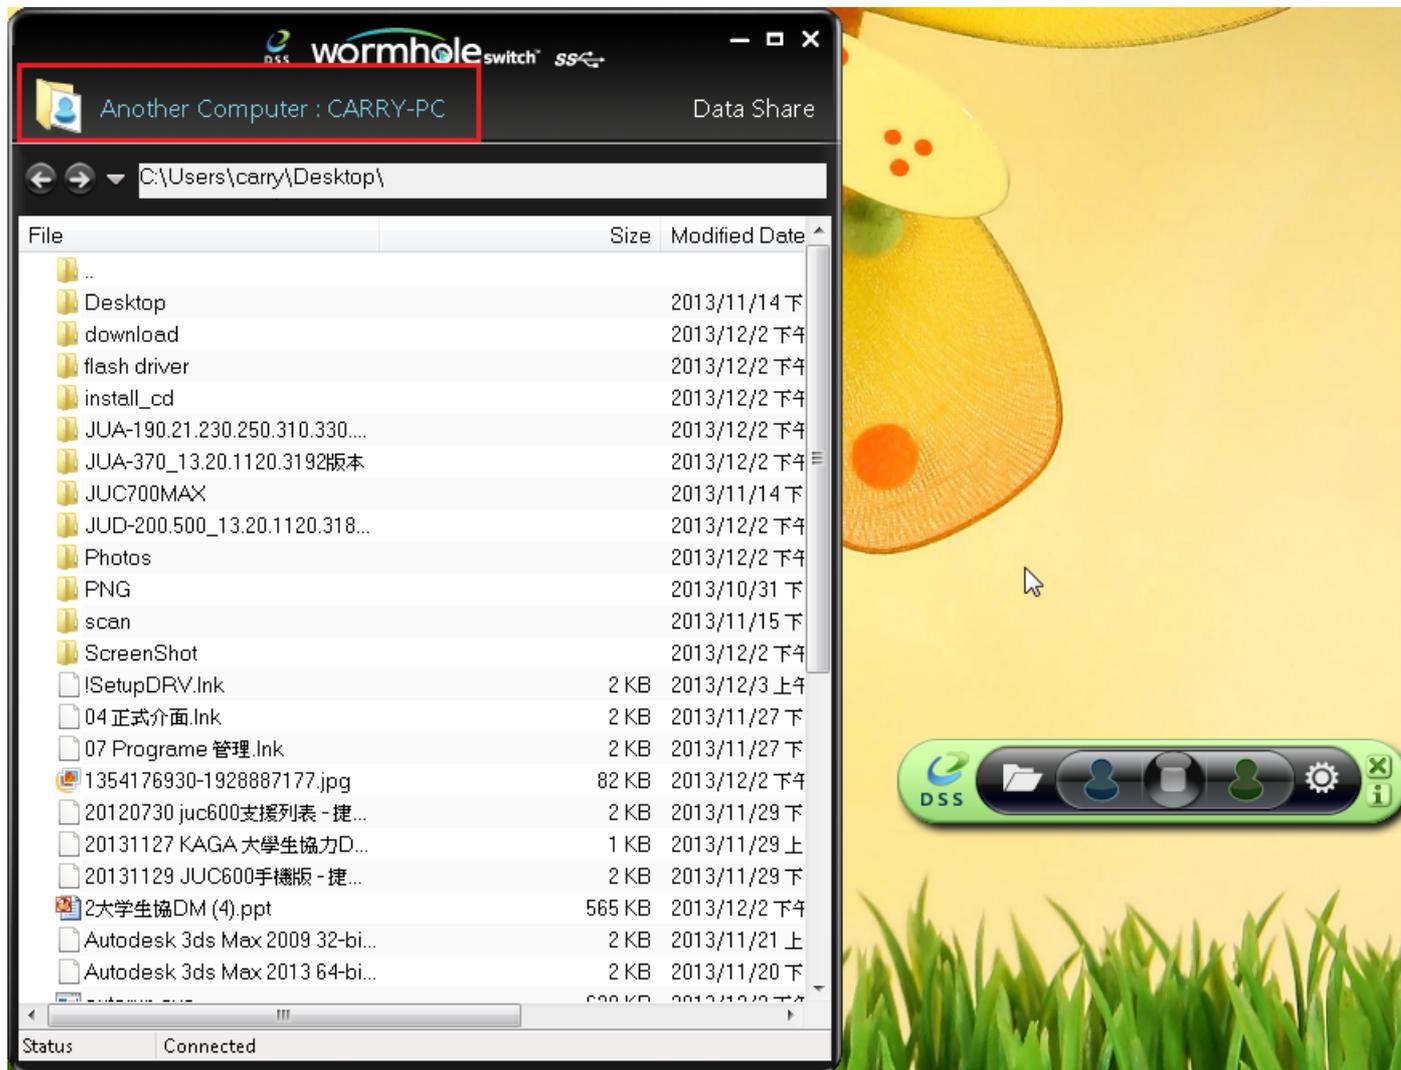

View and transfer data from the opposite computer (**Blue computer**), by clicking the **folder** icon in the tool bar in the green tool bar

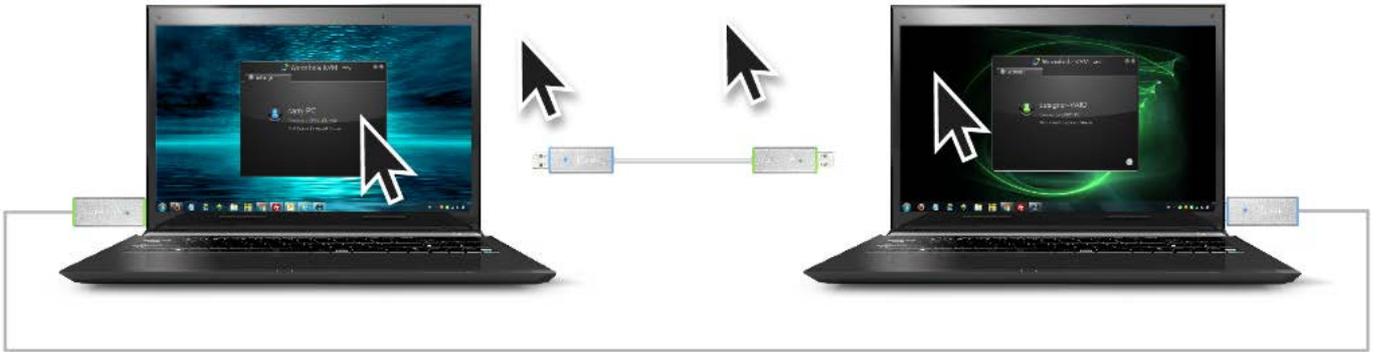

A file transfer shuttle tool will appear enabling you to transfer data from the **Blue computer** to the **Green computer**.

The JUC700 supports file and data transfer through Drag/Drop or Copy/Paste from the opposite computer at 5Gbps transfer rate.

III. Device Share: Keyboard and Mouse Sharing

- ✧ Move your mouse cursor between two computers naturally and seamlessly.

- ✧ Switch the Keyboard usage to the other computer. Use the keyboard of the first computer to type on the second computer.

Note: Please use a Mouse and Keyboard set, because the Keyboard Switching function always follows the mouse cursor.

Clipboard Sharing

With the **clipboard sharing** feature you can easily edit, copy or paste clipboard content bi-directionally between two computers.

1. Open a file and select the content (text/ pictures) you want from the first computer, right click and select **“Copy”**.
2. Move the cursor to the location of the 2nd computer to place the Content (text/ pictures), and right click and select **“Paste”**

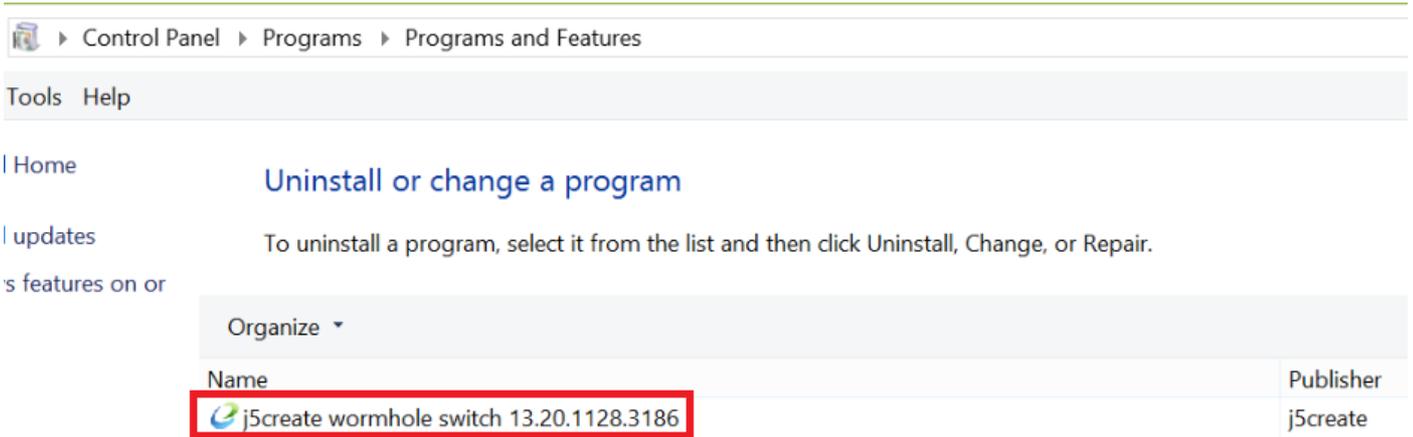

Driver Un-Installation

Device Driver Un-installation

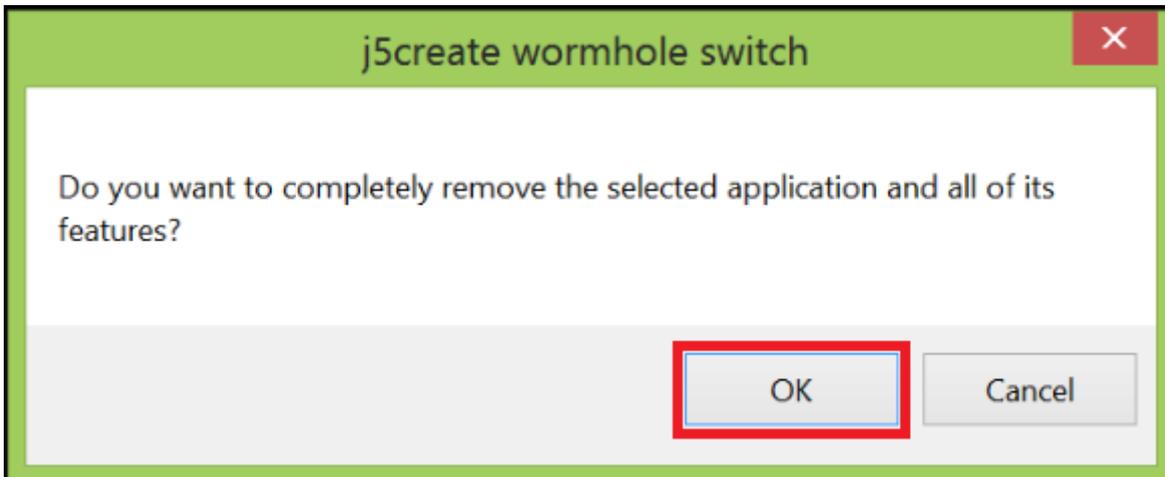

※ Unplug the **USB 3.0 WORMHOLE SWITCH JUC700** before un-installing the driver.

1. Click **Start**→ **Control Panel** → **Programs and Features**→ **Uninstall or Change a Program**

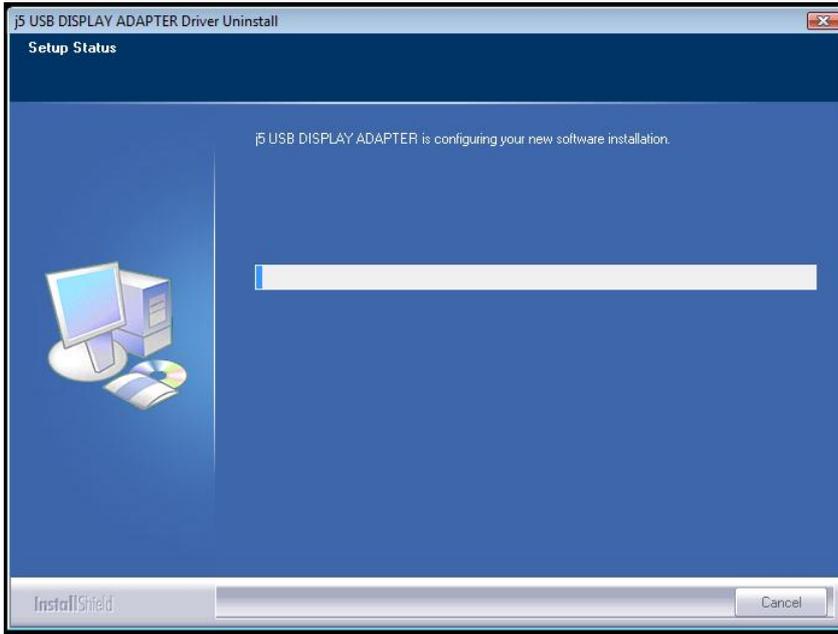

Select **j5 WORMHOLE KVM.xxxxx** Click **Uninstall**

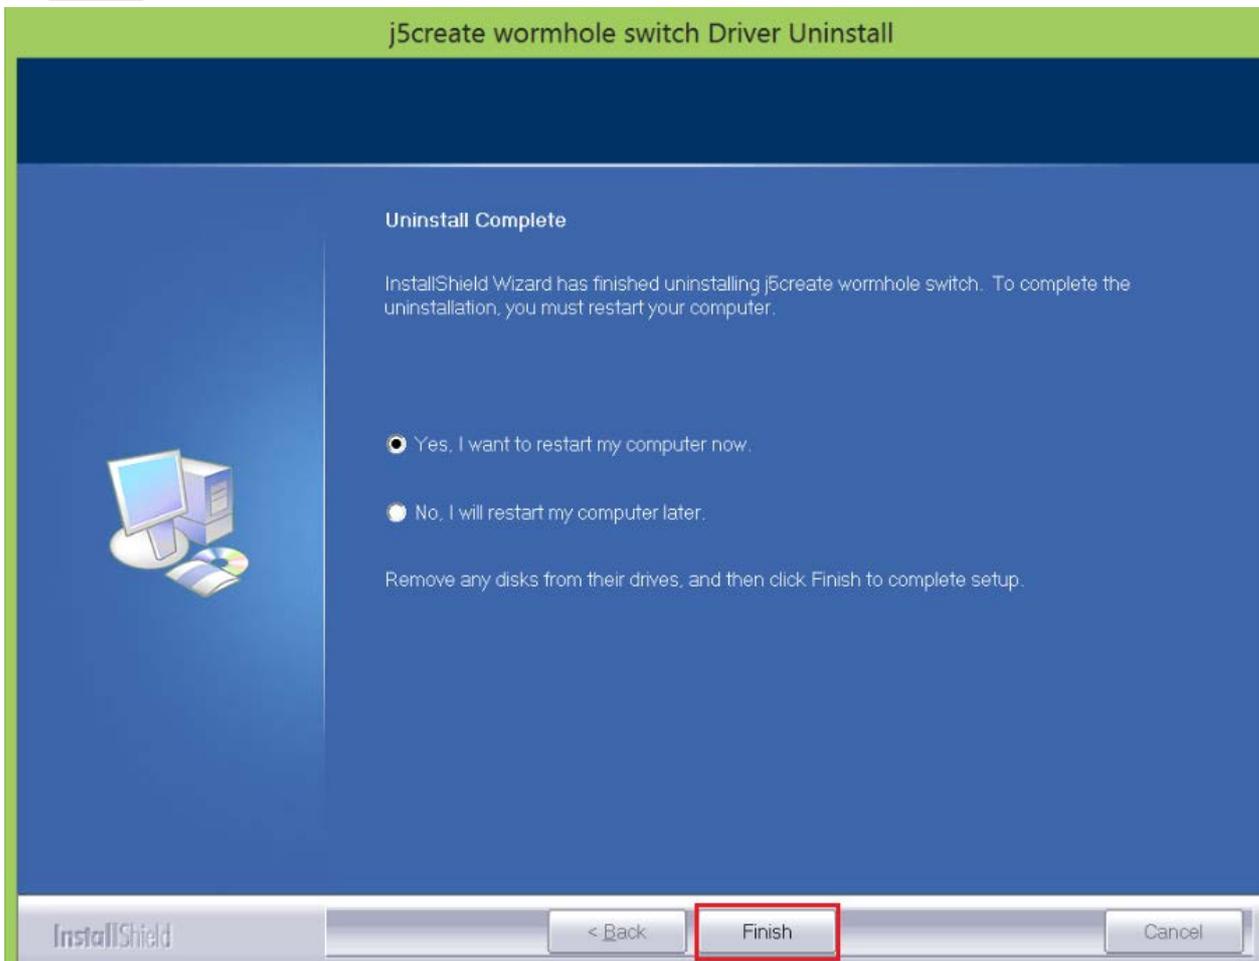

2. A message will appear asking if you want to remove the selected application. Click **OK** to continue.

3. Driver un-installation in process.

4. When the driver uninstall is completed select **Yes, I want to restart my computer now**. Click **Finish** to restart.

If you have any questions about the use of the JUD500 ULTRA STATION, please follow the instructions below. If any further assistance is needed, please visit our website or call j5 create support hotline.

Known Issues

- Direct 3D is not supported under XP. It would be supported under Win 7 Aero mode.

General Recommendations

- Incompatibilities exist when using other Video over USB Devices on a single system. Please ensure that all other Video over USB drivers are uninstalled before continuing with j5 create installation.
- Check to make sure that the device is plugged in correctly to the host system.
- Make sure that the USB port that you are using is ULTRA STATION.
- Unplug the USB cable of USB Display device and re-insert it.
- Check to see that the monitor is connected correctly and is powered ON.
- Make sure to restart your computer after the driver installation.
- Try a different USB port and/or computer.
- Unplug all other USB devices from the system.
- Try connecting the USB cable of USB Display device directly to the computer instead of through a hub.
- Reset/refresh/resynchronize your monitor.

Media Playback

- During video playback on all platforms, please do not change the display mode, position or arrangement of the video player window (such as dragging the video player window between the main display and attached display). This may cause the video player to stop playing. We suggest stopping the video playback, moving the window to the USB graphics device attached display and then selecting the video clip to start playing.
 - Cursor movement is slower when the mouse hovers on the video region of the Flash player,
 - Downsizing your screen landscape lower than 50 % will help smooth out Jerky video playback for videos running in Full Screen Mode,.
 - You may experience poor video performance on USB graphics devices with low spec PC systems.
 - Video rendering using hardware overlays is supported.
 - Some DVD playback software packages do not support playing on a second display adapter of any kind. You may try to open the media player in the secondary display first before you start playing the DVD.
 - Your PC may lack certain media codec to support the playback of certain video formats. Please use the link below to install license free media codec.
- K- Lite:** http://www.free-codecs.com/download/K_Lite_Codec_Pack.htm
- Video/Media players have different decoding capabilities under different display modes. For better performance watching DVDs or certain video formats on the attached USB graphics display attached, it is recommended to use the following license free software:

Media Player Classic: <http://sourceforge.net/projects/guliverkli/>

Others

- Some graphics card, i.e. Intel, prevents other secondary graphics chipset from being set as the primary card. As the result of this, *primary mode* might not work or the display maybe disabled.
- If you have problems during the boot up process, start your computer in Safe Mode and uninstall the driver. Hold the CTRL key until the Windows startup menu appears and select Safe Mode.
- To verify the driver version that you installed, please click "Control Panel" → "Add or Remove Programs" to check the program: USB Display Device (Trigger 2) 9.xx.xxxx.0159 (the number means the driver version). Some limitation exists in different media player on file format support. We enclose our compliance test result in the tables according to different operating system, main system graphics card/chipset, media players, and the supported media format. It will be updated periodically with new version of media players or our latest driver.

TECHNICAL SUPPORT

If you have any issue using this product please follow instruction below before returning this product to the store.

1. The User Manual

It contains the detail instruction and troubleshooting section. Many common issues can be easily resolved by reading the user manual.

2. Online Support

Please visit the j5 create website (www.j5create.com) to find the latest software for your device. If you are still experiencing the same issue, you can submit a description of your problem via email service@j5create.com . Our j5 create technical service support team will reply to you within the next 24 business hours.

3. Telephone Support

Please feel free to call us at 888-689-4088 and one of our support technicians will be happy to assist you
