WGR101
54 Mbps Wireless Travel Router

### Convenient, Pocket-sized Connectivity When You're On the Road

Untethered wireless connectivity in your hotel room can be critical to your productivity (and sanity) as a mobile professional. Conference or hotel rooms with only one Ethernet port are no longer a problem because now you can bring convenient wireless networking with you. NETGEAR's 54 Mbps Wireless Travel Router is lightweight and compact, and it provides both single and multiple users wireless access without any need for a direct cable connection to the network. Expertly designed and protected with Double Firewall security, this portable high-speed travel router is your best insurance for wireless access wherever you go.
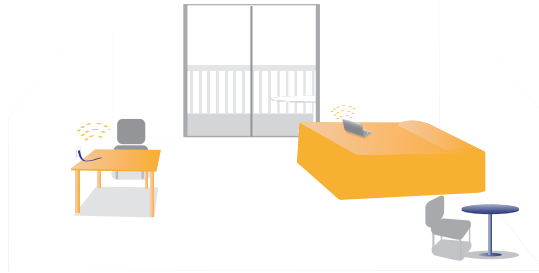

Portability
Turns your hotel room into a hotspot so as you travel you can count on peace, privacy, and wireless connectivity while you work. No larger than a deck of cards, the travel router is compact and convenient to carry while traveling, with an internal antenna so there's nothing to bend or break during packing. It comes with a small-scale power adapter and an attractive carrying case with extra compartments for other essentials.

High-Performance
Delivering up to 5x the speed of 802.11b networks, the 54 Mbps Wireless Travel Router creates a wireless network from an Internet connection in a hotel room or conference room. Works with both 802.11g and 802.11b devices.

Dual Use
External switch lets you select between single user, multiple user, and configuration mode. In single user mode, next door guests cannot access your wireless network. Multi user mode allows more than one person to simultaneously share one Internet connection.

Safe and Secure
Complete security with Double Firewall – Stateful Packet Inspection (SPI) and Network Address Translation (NAT) – protects against malicious hackers. Supports IPSec and PPTP pass-through for Virtual Private Network (VPN) and 64- or 128-bit Wired Equivalent Privacy (WEP) encryption for maximum security, plus wireless SSID broadcast on/off capability as an added safeguard.

54 Mbps 2.4 GHz 802.11 g

router

NETGEAR®
Everybody's connecting.

In single user mode guests next door cannot access your wireless network.

Multi user mode allows mutiple users to share one internet connection.

Product Specifications

- Wireless Speeds:
  - 1, 2, 4.4, 5, 9, 11, 12, 18, 24, 36, 48, 54 Mbps (auto rate capable), compatible with 802.11g or 802.11b**

- Security:
  - NAT routing
  - SPI firewall
  - VPN with IPSec and PPTP pass-through
  - Wi-Fi Protected Access™ (WPA) upgradeable
  - 64- or 128-bit WEP encryption
  - Wireless SSID broadcast on/off

- Power Adapter:
  - 5V, 2A; plug is localized to country of sale

- Physical Specifications:
  - **Dimensions (H x W x D):** 0.7 x 2.3 x 3.4 in. (17.8 x 58.4 x 86.4 mm)
  - **Weight:** 0.17 lbs (80 g)

- Electromagnetic Compliance:
  - FCC Part 15 Class B, and Class C

- Standards Capability:
  - Windows 98SE, Me, 2000, and XP
  - 802.11g wireless standard

- Warranty:
  - NETGEAR 1-year warranty
  - 1-year power supply

Package Contents

- 54 Mbps Wireless Travel Router WGR101
- Ethernet cable
- Power adapter
- Carrying case
- Resource CD
- Installation guide
- Warranty/Support information card

System Requirements

- Pentium class PC
