

HDMI over Cat5/Cat6 Active Extender, Wallplate Remote Receiver for Video and Audio, 1080p @ 60 Hz

MODEL NUMBER: **B126-1A0-WP-1**

Description

The B126-1A0-WP-1 HDMI over Cat5/Cat6 Active Remote Receiver works with Tripp Lite's [B126-002](#) or [B126-004](#) transmitter to extend an HDMI signal to multiple projectors, monitors or televisions in a chain. It's ideal for digital signs, trade shows, presentations, classrooms, churches, retail settings and other applications where the video source is located farther than conventional cables allow or that require multiple displays connected to one source.

The receiver uses HDMI cable(see Tripp Lite's P568-Series) to connect to the monitor and Cat5e/6 cable to receive the signal from the transmitter or a remote repeater in the chain(for best results, use 24 AWG solid-wire Cat5e/6 cable, such as Tripp Lite's N202-Series). No 110 punchdown connection is required.

The B126-1A0-WP-1 can extend a 1080i(60 Hz) signal up to 200 feet, a 1080p(60 Hz) signal up to 150 feet and a 3D signal up to 125 feet. You can connect up to three [B126-110](#) remote repeaters in the chain for a total of four HDMI displays and full signal extension of 700 feet(1080i), 500 feet(1080p) or 400 feet(3D).

In addition to crystal-clear video, the B126-1A0-WP-1 delivers full, rich stereo and 7.1-channel surround sound(multi-channel or PCM) audio when paired with a [B126-002](#) or [B126-004](#) transmitter. Built-in equalization control lets you fine-tune the image quality at each remote display. Supports 24-bit True Color(8 bits per channel) and HDCP compatibility. Easy to set up with no software or drivers to install. Mounts to a wall using the included hardware.
