

Consumer SDHC Class 4 Card

Performance and capacity redefined.

Kingston Technology's Secure Digital High Capacity (SDHC) memory cards are fully compliant with the latest SD Association specification. They are a performance class of SD memory cards designed to meet the storage demands of high-quality digital still and video cameras and other personal electronic devices.

Starting at 4GB, SDHC cards offer larger-volume data storage and optimised recording performance with support for FAT 32 file formats. In addition, Kingston's SDHC cards feature Class 4 speed ratings that deliver a minimum data transfer rate of 4MB/s for optimum performance with SDHC devices.

Although identical in size to standard SD cards, SDHC cards are designed differently and are recognised only by SDHC & SDXC host devices. To ensure compatibility, look for the SDHC logo on cards and host devices (cameras, camcorders etc.).

For added reliability and durability, our solid-state SDHC memory cards are built of non-volatile memory components and have no moving parts that could wear out or break. All cards are 100 percent tested and backed by a lifetime warranty.
