

**Amplified medium range antenna  
provides standard and HD local  
programming FREE!** (no monthly programming fees)

# HD7694P

Amplified VHF/UHF  
Digital Antenna

The HD7694P employs the highest performance antenna design on the market, allowing it to extend beyond the range of most other antennas. For receiving the full range of DTV channels in Suburban or Rural environments, no other antenna design can compare.

Unit dimensions 35"W x 65"L x 44" turning radius

Shipping weight and dimensions 6 lbs., 78" x 6.5" x 6.5"

- Extended wing design for improved VHF reception
- Rugged Construction
- Best Performance
- Medium to Long Range 0 - 45 miles
- H-VHF/UHF Antenna (channels 7 - 51)

Antenna mileage figures based on average terrain with the antenna mounted at least 30' above the ground. Actual receiving distance will vary based on transmitting power, transmitting antenna tower height, lobal pattern of transmitter, height of receiving antenna, weather conditions and terrain between receiving path including trees, buildings, hills, mountains, etc. Attic installations reduce signal an average of 50%. Certain building materials can totally shield the signal from the receiving antenna.

Digital broadcast signals traveling through your home or apartment lose an average of 50% of signal making it harder to receive a quality DTV signal. If digital TV reception is not obtained, try moving your antenna closer to a window.

## Accessories

### AP-8700

**Pre-Amp  
for higher input  
and lower gain  
(recommended when  
>20 miles from tower)**

### MOUNT OPTIONS

**SW-0010**  
Tripod w/  
TB-0005 5' pole

**SW-0012**  
gable end w/  
TB-0005 5' pole

### COAX OPTIONS

**CX-0605** 5' RG6  
**CX-0612** 12' RG6  
**CX-0625** 25' RG6  
**CX-0650** 50' RG6  
**CX-6100** 100' RG6
