- Nearly invisible. You'll forget it's even on your device.
- Each shield slips onto your device in seconds, and is reusable and recyclable.
- Use your device while keeping it dry and safe.
- High-grade durable plastic material.
- Soft and stretchy. Slips on and off in seconds.
- IP-68 Waterproof. Allows use of camera and video under water.
- Fits both the iPad® 2 and the new iPad®.

Seal Shields™ Model SSVPD2. Waterproof Shields with Antimicrobial Protection for iPad® 2 and the new iPad®

Each shield slips onto your device in seconds, and is reusable and recyclable

Cleaning Instructions

Seal Shields™ are easy to use! They can be quickly cleaned and disinfected with your iPad® still inside. We recommend you protect your iPad® with Seal Shields™ so you can regularly clean and disinfect them with bleach wipes (Clorox® Disinfecting Wipes or similar), or quaternary ammonia wipes (PDI Super Sani-Cloth™ Wipes or similar). When using wipes, be sure to clean all surfaces thoroughly and allow to dry before using

Alternatively, the product can be washed in a solution of any of the products below and then rinsed under running water. Before washing, please inspect your device carefully for any openings or splits in the plastic that may cause leakage.

- Clorox® Bleach.....Up to 50% dilution to warm water
- Pine Quat 64 Disinfectant.....100% concentration
- 64 General Purpose Disinfectant.....100% concentration
- VirkonS™.....10% dilution to warm water
- Softsoap®.....Approximately 2% dilution to warm water
- Ali-Flex®.....100% concentration
- Windex®.....100% concentration

Product testing was performed by submerging the unit in each of the above cleaning/disinfecting solutions at the recommended concentrations with no apparent damage to the Seal Shields™ plastic sleeve or the Stay Dry Seal.

Silver Seal™ Protection

This product is Silver Seal™ protected. It contains an antimicrobial, fungistatic agent which protects the product and keeps it cleaner, greener and fresher by inhibiting the growth of microbial bacteria, mold, mildew and fungi on the product's surface.
