

HDTV WONDER®

Empower Your PC with the HDTV WONDER®

Wonderful HDTV is Coming Fast

High Definition Television (HDTV) is the technology of the future. It offers much higher resolution and clarity than analog TV and over twice the resolution of DVDs. The FCC has mandated that it replace analog TV. Broadcasters across North America are well on their way to achieving this objective:

- A growing portion of TV shows are currently broadcast in HDTV
- Over 80% of USA households are in areas that are broadcasting five or more DTV channels

Until now, a TV with high definition capability costing in excess of \$1000 was required to receive and view HDTV signals.

HDTV WONDER® Delivers Our Leading Digital TV Technology...

ATI is a world leader in the science of HDTV reception. Our digital demodulation hardware is the technology of choice for major HDTV television manufacturers. The digital demodulator plays the most important role in determining the quality of DTV signals a user is able to receive. The compelling performance of the HDTV WONDER® is built on a combination of our digital television expertise brought by ATI's NXT2004® digital demodulator and our PC multimedia experience evidenced by 8 years of ALL-IN-WONDER® success.

... to your PC at a fabulous price!

The HDTV WONDER® for the PC is ready to become the home's first HDTV device with quality and features not available even in today's consumer electronics experience. Now you can enjoy crystal clear HDTV

broadcasts right on your current PC monitor at the quality level they were intended, for a fraction of the price of a HDTV television!

The HDTV WONDER® Receives, Records and Rewards

The HDTV WONDER® is a PCI card for analog TV, free-to-air digital TV (DTV: SDTV and EDTV), and full quality free-to-air HDTV reception. The HDTV WONDER® allows consumers to experience free-to-air HDTV broadcasts without having to subscribe to potentially expensive cable or satellite service charges. It offers personal video recorder capabilities, with the controls to watch, pause and record all forms of TV to your system's hard disk or to CD's and DVD's.

HDTV WONDER®

You'll Be Listening to Digital Audio HDTV

High definition television does more than just increase image quality. All DTV shows are broadcast in digital stereo sound and most primetime content today comes in as Dolby® digital surround sound. Either way, you will be enjoying the soundtracks to your favorite movies and shows at a new level of quality.

How FREE HDTV with the HDTV WONDER® Works

You can receive DTV programming in more places than ever before, and at no cost! In the USA, for instance, there are currently 1,216 DTV stations on air in 207 markets, serving 99.7% of households: With the HDTV WONDER® and a HDTV antenna (included), you can access this expanding universe of DTV for free! To find out what DTV programming is available in your area go to www.checkhd.com (an independent information resource for PC HDTV users not affiliated with ATI).

Want to Expand Your Multimedia Capabilities Further?

The HDTV WONDER® is a powerful first step to unlock the multimedia capabilities of your PC. ATI has the most expansive, leading edge array of products that can take you to the next level of PC multimedia enjoyment: ATI's RADEON™ line of video cards deliver the industry's only full HDTV decoder and display capabilities. With their powerful visual processing unit (VPU) technology, they transform 3D action graphics into cinematic quality without a drain on your main CPU. With ATI's industry leading ALL-IN-WONDER® line of multimedia products you get the power of a RADEON™ VPU plus a comprehensive suite of multimedia tools. The ALL-IN-WONDER® products offer enhanced multimedia software with a user friendly interface, expanded video and audio editing software, dual monitor support, advanced FM-ON-DEMAND, and remote control ease with the REMOTE WONDER™ to name a few.

How to Buy The HDTV WONDER® and Accessories

The HDTV WONDER® PCI card is offered online at www.ati.com or at leading electronics retailers. Treat yourself to the fantastic image quality of HDTV on your PC today with the very affordable HDTV WONDER® and expand your digital universe.
