

## What will you do with the 20 minutes per burn you save?

**DOUBLE LAYER  
DVD+R**

**UP TO 6X SPEED**

**8.5GB CAPACITY**

Seems like everyone is jumping on the double layer DVD bandwagon. But no one beats the speed, quality, and pure consistency of Verbatim. Compare burn times of 19 minutes or less and premium quality to competitive write times exceeding 43 minutes along with fluctuating error performance. No wonder the pros who design the drives always do their testing with Verbatim media.

That also means 100 percent compatibility with every DL burner out there. It doesn't take much deep thought to see who's miles ahead in double layer DVD speed and quality. Verbatim. The fastest. The finest. The best.

**Verbatim**

# DVD+R Double Layer for Data and Video

<b>Description</b>	DVD+R DL 8.5GB/240Min 2.4X 3Pk Jewel Case Box
<b>Reorder Number</b>	Verbatim 95014
<b>Pack Size</b>	3Pk Jewel Case Box
<b>Capacity</b>	8.5GB / 240Min
<b>Brand</b>	Verbatim

Preferred by DVD drive manufacturers, Verbatim DVD media continues to set the standard for high-speed disc performance, reliability, and compatibility. DVD+R Double Layer nearly doubles the storage capacity with two AZO recording layers on a single-sided disc. Certified and supported by the industry high speed Double Layer writers, Verbatim discs are approved for high speed burning up to 6X speeds. Store up to 8.5GBs of video in approximately 19 minutes or less while maintaining compatibility with most DVD video players or DVD-ROM drives. All backed by Verbatim's limited lifetime warranty.

<b>Minimum Order Qty</b>	(6) 3Pk Jewel Cases

## Features & Benefits

- 8.5 Gbyte's of storage capacity on a single-sided disc--No need to flip the disc
- Largest compatible DVD back-up and data archiving format for computer drives
- Record 4 hours of DVD quality television and video (16 hours of VHS quality)
- Compatible with DVD+R DL drives from Sony, Philips, Lite On and other leading manufacturers
- Ideal for archiving home movies
- Limited Lifetime Warranty

1MB = 1 million bytes / 1GB = 1 billion bytes

Some of the capacity is used for formatting and other functions, and thus is not available for data storage. As a result, your operating system may report as fewer megabytes [gigabytes].
