

LightScribe Technology

The complete solution for all your media needs

LightScribe technology brings together existing data burning capabilities and a new labeling solution to revolutionize CD/DVD labeling. This new technology uses a LightScribe CD/DVD drive to burn data on compatible media, then the disc must be flipped over, re-inserted into the drive and using the LightScribe-supported software it permanently etches labels onto the media giving it a professional looking, high quality, easy to create, durable quality label. The LightScribe media was developed by Verbatim's parent company, Mitsubishi® Kagaku Media Co., Ltd., (MKM) in collaboration with HP.

Features & Benefits

- High-quality labeling with the precision and fine detail previously only available on professional and entertainment industry labels. No more messy, marker-scrawled labels or sticky adhesive labels
- Special LightScribe coating provides long-lasting, scratch-resistant labels
- Labels and data can be burned using the same drive wherever and whenever necessary, no need for a separate printer.
- Freedom to combine text and graphics in simple or complex labels that reflect one's personality and attitude.

Part Numbers	Description	Capacity	Speed	Pack Size	UPC
95115	LightScribe CD-R	80MIN/700MB	52X	10-Pack Spindle Box	0 23942 95115 5
95092	LightScribe CD-R	80MIN/700MB	52X	20-Pack Slim Case	0 23942 95092 9
94934	LightScribe CD-R	80MIN/700MB	52X	30-Pack Spindle	0 23942 95092 9
95116	LightScribe DVD+R	4.7GB/120MIN	8X	10-Pack Spindle Box	0 23942 95116 2

95091	LightScribe DVD+R	4.7GB/120MIN	8X	30-Pack Spindle	0 23942 95091 2

1 MB = 1,000,000 bytes / 1 GB = 1,000,000,000 bytes

Some of the capacity is used for formatting and other functions, and thus is not available for data storage. As a result, your operating system may report as fewer megabytes (gigabytes).
