

27" Widescreen Touch of Color LCD Monitor

- Ultra-Slim, Clear Neck Design
- Eco-Friendly
- High Contrast Ratio & Fast Response Time
- Full HD Resolution

Presenting the 27" P2770H Touch of Color widescreen LCD monitor. A truly stunning monitor to behold, it features a rose black gradation. The crystal-like clear acrylic stand gives the illusion of a floating monitor, and the thin profile defines elegance. 70,000:1 dynamic contrast ratio gives you tremendous detail, while 2 ms (G to G) response time gives you razor-sharp motion video. And the P2770H does it in 1920 x 1080 full HD resolution. The Samsung Touch of Color widescreen LCD monitors.

Ultra-Slim, Clear Neck design

The P2770H Touch of Color monitor features a rose-black gradation and the tapered neck adds another level of refinement. The high-gloss bezel actually changes color with the room's light. Turn it on, and the function button automatically fades off.

Eco-Friendly

ENERGY STAR rated, the P2770H uses up to 33 % less power. Plus, the Power-Off feature automatically shuts off the monitor when you're not using it, not only saving energy but also prolonging the monitor life. Being green never felt so good, or was this easy.

High Contrast Ratio & Fast Response Time

Don't be afraid of the dark. Or the light. The P2770H ensures your dark and light colors are never compromised. It uses a contrast ratio of 70,000:1, partnered with a response time of only 2 ms, making images clearer, more vivid and more likely to move you to the edge of your seat.

Full HD Resolution

You'll want to take a second look at the P2770H monitor. And a third and a fourth. At 1920 x 1080 it delivers breathtakingly vivid HD on a wide screen. There's so much photorealistic detail that every time you watch something on it, you'll feel like you're seeing it for the very first time.

See the Big Picture

The only time you'll see an image stretched or distorted on the screen of the P2770H is when the director wants you to. The monitor has been optimized for Full HD sources. So what you'll see is as perfect as a home theater, a 16:9 ratio. In other words, the way your games and movies were meant to be seen.

HD Multimedia Hub

HDMI (High Definition Multimedia Interface) connections are the fastest, most intelligent way of connecting HD digital peripherals with your monitor.

Rated EPEAT Silver

EPEAT registered products contain reduced levels of cadmium, lead, and mercury to better protect human health and the environment. EPEAT registered Samsung monitors are more energy efficient, which saves money and reduces greenhouse gas emission by providing a design that is easy to disassemble and upgrade. EPEAT Silver monitor meets all 23 required criteria plus 50 percent of 28 optional criteria.
