

## 21:9 UltraWide Monitor

Perfect Choice For Multitasking

▶ 25UM55-P

25" class (25" measured diagonally)

### More Comfortable and More Convenient

#### PROTECT YOUR EYES WITH TUV CERTIFIED FLICKER-SAFE AND READER MODE

Protect your eyes from exhausting flickers and blue lights. LG's new Flicker-Safe system is always on to reduce flicker level to almost zero. In addition, switch to Reader Mode with a simple touch of a hot key to minimize exposure to harmful blue light. Spend as much time as you want working, playing games, or watching movies without straining your eyes. Use the convenient and easy-to-use hot keys for increased satisfaction.

#### CONTROL FUNCTIONS WITH EASE BY USING THE INTUITIVE JOYSTICK

The joystick is designed to ensure accurate menu controls and analogue sensitivity. Patterned after a conventional joystick, its modern technology and design enable simple touch controls. In addition, its intuitive UI has no overlapping functions, making it easier to understand and select desired menus.

#### 21:9 ULTRAWIDE FULL HD OFFERS CONVENIENCE FOR EVERYONE

Let everyone enjoy the finest visual quality of a 21:9 ratio wide screen in your room. Watch movies or surf the web. You will be astonished by the great visual quality of the IPS UltraWide Full HD. Enjoy a panoramic theater experience from your couch.

• The 21:9 Full Screen or 2560 x 1080 Resolution may not work, depending on your content, device, interface, or graphic card.

### MAKE LIFE EASIER

The 25 inch-monitor supports a 21:9 UltraWide ratio, giving you more advantages over a conventional 16:9 monitor. This will help you improve your work efficiency and get more fun from entertainment choices and multitasking that existing conventional 16:9 screens cannot provide. It will maximize your enjoyment with remarkable immersive viewing pleasure from its amazing, ultra-high picture quality.

### WITH THE ULTRAWIDE AS YOUR DUAL MONITOR, YOU GET TRIPLE THE SCREEN

When you connect the UltraWide to your laptop as a dual monitor, it provides not one but two separate and large screens. From a narrow workspace in your laptop, now you can have three screens to allow you to work with three different programs. Put Outlook and PowerPoint on the UltraWide, and freely cruise the Internet on your laptop. A convenience unthinkable with conventional 16:9 monitors.

### A NEW, EFFICIENT MULTITASKING ENVIRONMENT WITH 21:9 RATIO

The 25UM55's 21:9 ratio provides a better environment for multitasking in comparison to 23-inch 16:9 monitors. You will see the full lengths of your spreadsheets, and be able to pursue research in a separate window, spaciouly located beside them. Maximize your work efficiency, and eliminate scrolling and window switching.

• Tested in the same condition. (100% view)

### RECOGNIZED BY EXPERTS, LG IPS

The LG IPS monitor has won several prestigious awards for its utmost picture quality. It is the perfect solution for those who need the most lifelike color expression, bringing the original image to life on the screen.
