INTRODUCTION

The Spawn gaming mouse is lightweight, ergonomically designed and forged with a reassuringly solid design. It is built for professional FPS gamers that prefer a claw grip.

Engineered to execute precise in-game tactics, Spawn comes loaded with an ultra high-performance 3500 DPI sensor that includes on-the-fly adjustment, an ultra-step wheel encoder – providing extremely accurate scrolling, and Japanese-made Omron micro-switches that are meant to endure up to five million clicks.

Presented in a eye-catching crimson red high-gloss finish, Spawn compliments a gamers setup by adding a truly breathtaking peripheral. Take part in the Spawn experience and pick one up today.

ANTI-DRIFT CONTROL SENSOR

The Spawn gaming mouse utilizes a high performance optical engine that ensures extreme stability. Built with an anti-drift system, it provides lossless performance during lifts and drops. With a built-in angle snapping option, one can formulate the perfect flick shot to maximize their kill rates with sheer accuracy.

ONBOARD SENTINEL-X™ 32 KB

The Sentinel-X™ microprocessor safeguards your mouse setting by storing button assignments, advanced macros and other mouse customization - allowing gamers to plug and play on any other system without losing their initial settings.

OMRON MICRO SWITCHES (5 MILLION CLICKS)

Ultra tactile mouse clicks for in-game fragging is afforded through the utilization of Omron's patented micro switch technology. Backed by a minimum guarantee of 5 million clicks, the Spawn gaming mouse offers an extended gaming life-span for the avid gamer.

JAPANESE-MADE ULTRA-STEP WHEEL ENCODER

Ultra precise stepping encoder allows gamers to navigate small distances with the scroll wheel while establishing great control and precision.

DPI ON THE FLY

Comfortably placed under the scroll wheel, gamers can switch DPI settings easily to 800, 1800, and 3500.

SUPERIOR ANTI-SLIP RUBBERIZED GRIP DESIGN

Sweat proof and highly slip resistant, Spawn includes two thick rubber grips that have been deployed on both sides of the mouse. This affords full control to lift-off style gamers during game play.
