SAMSUNG

Samsung K5

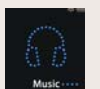

Digital Audio Player with Built-in Speaker

Features

Bass Enhanced Earphones

The K5 comes with earphones that boast innovative two-part ear buds that boost bass response and create surround sound quality. The form of the ear buds fits naturally in the ear and limits extraneous noise. Please be careful, these get LOUD.

MP3-The most common format in the market. These files can have near-CD sound quality and are compatible with most digital audio players.

WMA-Microsoft's Windows Media Audio file. WMA delivers MP3-like sound quality with better compression. This helps improve download speeds.

DRM-Janus, WMA DRM10

This version of WMA allows for subscription services to provide unlimited downloads to the device.

FM Tuner-Auto preset scan in less than one minute. Adjustable FM sensitivity: - low - medium - high

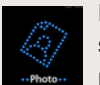

Photo Viewer-Show JPEG slideshows while music is playing.

Alarm-

- Wake up to your music or to a built-in alarm sound.
- Custom snooze times.
- Set multiple alarms.
- Alarms work from the powered-off position.
- Recurrence settings:
 - Off
 - Once
 - Everyday
 - Monday - Friday
 - Monday - Saturday
 - Saturday - Sunday

Language Support

English, Korean, Japanese, Chinese, Italian, French, Spanish, German, Russian, Portuguese, Hungarian, Dutch, Polish, Swedish.

Preset EQ-5 modes

Normal, Vocal, Bass boost, 3D sound, Concert hall

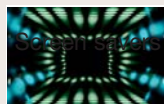

Equalizer (DNSe)

Samsung's Proprietary Sound Effect "DNSe portable" is a revolutionary sound technology, providing rich, more natural effects and a true-to-life surround sound experience. DNSe surround sound provides a simulated surround effect for headphone users that is much closer to real sound.
