

KeyShair

Bluetooth Keyboard/Mouse sharing for smartphones and tablets

GKMB02

Bluetooth™

USB
Plug-n-Play

The IOGEAR KeyShair Bluetooth Keyboard/Mouse Interface for Tablets & Smartphones allows you to use your computer's keyboard and mouse with up to 4 Bluetooth enabled mobile devices, for faster texting, emailing, etc. By incorporating hotkey switching, the KeyShair allows you to quickly and easily change the focus of your computer's keyboard and mouse between the computer and up to four smartphones, tablets or other Bluetooth HID enabled devices. The KeyShair features a super compact USB stick style form factor so it slips easily into your briefcase, backpack or computer bag to take anywhere.

KeyShair is ideal for multitasking professionals to consolidate a computer, tablets and/or smart phone into a single connected work area. Instead of picking up your phone and pecking your way through numerous texts messages throughout the day, you can simply switch the your computer's keyboard focus to your mobile device and type as if responding from your computer. IOGEAR's KeyShair also provides cut and paste integration from computer to Bluetooth device, so now you can find that contact in Microsoft Outlook® or copy some text from a Word® document, etc. directly into your mobile device.

IOGEAR's KeyShair Bluetooth Keyboard/Mouse Interface is easy to set up and use. Built-in software requires no special setup discs or driver installation- just plug it into any computer's USB port and it does the rest. KeyShair works with both PC and Mac keyboards, and is compliant with Bluetooth HID enable mobile devices such as iPad®, iPhone®, Galaxy Tab® and Galaxy S® series smartphones and more.

* Some mobile devices do not support mouse function; please consult your mobile device manufacturers for details.

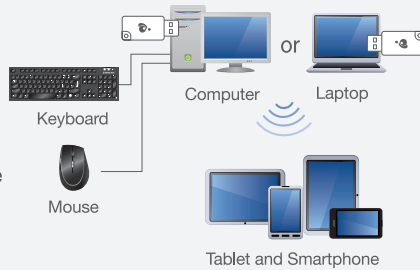

KeyShair

Bluetooth Keyboard/Mouse sharing for smartphones and tablets
