## TECHNOLOGY & BENEFITS

### VIDEO

- **7" Widescreen TFT LCD Display** - Perfect for viewing standard, letterbox, and anamorphic DVD movies.
- **Digital Picture Zoom** - This interactive DVD feature allows you to select an area of the picture you want to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when you're zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.
- **JPEG Viewer** - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.
- 

### AUDIO

- **WMA & MP3 Playback** - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.
- **3-D Virtual Surround Sound** - Provides a simulated surround sound effect from sources that contain only a stereo soundtrack. Convenient when playing older DVD films or for use with home theaters not equipped with multi-channel playback compatibility. Also active via the headphone output jacks.

### CONVENIENCE

- **3-Hour Battery** - Completely recharges the battery in approximately three hours so you never have to wait long between movies.
- **2 Headphone Output Jacks** - Supplies audio to two independent headphones at the same time so enjoy your entertainment with someone else.
- **Car Cord Adapter Included** - Take your player on the road and use the car's cigarette lighter to power endless hours of movies and music.
