

SD-5000

1080i* Upconverting DVD Player

ADVANTAGE TOSHIBA

Video Upconversion* displays a pure digital signal at 720p or 1080i, matching the resolution of the HD display and thus eliminating signal degrading A/D-D/A conversion.

HDMI™ is a convenient, single cable connection. This cable transfers uncompressed digital video and multi-channel audio to home theater components and high definition televisions.

Multiformat playback capability** now includes DVD-/R, DVD-/RW, VCD, SVCD, DivX®, CD-R, CD-RW, MP3 and WMA playback for flexible playback options.

HD JPEG provides the ability to view megapixel images in their enhanced resolution when using HDMI and an HD display device.

New Super Slim (40mm) chassis height is combined with a high gloss black acrylic panel with attractive silver accents and a bright front display to complement the latest TV designs.

SD-5000 SPECIFICATIONS

Video

Video Upconversion*	720p/1080i

Product & Packaging

Unit Dimension (WHD) in.	16.93 x 1.57 x 7.83
Carton Dimension (WHD) in.	19.21 x 3.15 x 11.38
Unit Weight	3.52
Carton Weight	4.99
UPC Code	022265000212

*A HDTV or HD Monitor with an HDCP capable HDMI or DVI input is required for video upconversion. To upconvert to 720p or 1080i resolution, a 720p or 1080i capable HDTV or HD Monitor (as applicable) is required.

**Some DVD-R/DVD-RW and CD-R/CD-RW discs may be incompatible due to laser pick up and disc design. CD-R/CD-RW discs must be recorded using CD-DA method for CD audio playback. The DVD player may not support some MP3/WMA/JPEG/DivX recordings due to differences in recording formats, disc structure, or condition of the disc (use of CD-RW for MP3 files is not recommended). See owner's manual for more information.
