

SL90 SERIES

1080p LED HDTV

At less than 1.2" thin, the SL90 is our slimmest 1080p LED HDTV ever! This state-of-the-art HDTV series features a borderless, edge-to-edge design along with a Mega Contrast ratio of 3,000,000:1 and a TruMotion 120Hz panel.

Borderless Design

A seamless, edge-to-edge panel of glass delivers a sleek, elegant design that will make everything else seem just ordinary.

LED Mega Contrast 3,000,000:1

This series employs an edge-lit LED system which produces superior image quality, with deeper blacks and a wider color gamut, and allows for an ultra-slim design with a 3,000,000:1 Mega Contrast Ratio.

TruMotion 120Hz

By responding quickly to color changes, TruMotion technology helps eliminate motion blur and improves picture quality at different viewing angles.

Intelligent Sensor

Automatically optimizes the picture to the lighting conditions in the room for a personalized and enjoyable viewing experience.

Full HD 1080p Resolution

Enjoy enhanced picture quality over standard HDTV with almost double the pixel resolution. See sharper details like never before. Just imagine a Blu-ray disc or video game seen on your new LG Full HD 1080p TV.
