## TECHNOLOGY & BENEFITS

### VIDEO

**15" 4:3 TFT LCD Display** - 4:3 Amorphous (a-Si) silicon TFT active matrix display is perfect for viewing standard television signals and DVD movies.

**Digital Cinema Progressive (3:2 Pulldown)** - Delivers the smoothest, most film-like images to the attached screen and ensures maximum resolution.

**JPEG Viewer** - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

### AUDIO

**WMA & MP3 Playback** - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats are compatible with the DVD player.

### CONVENIENCE

**Digital Picture Zoom** - This interactive DVD feature allows the user to select an area of the picture to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.

**VESA® Compliant Bracket Holes** - Designed for tabletop or wall mounting applications, the 15DLV76 has VESA compatible mounting holes in the 100mm design format.

**Tri-Lingual On-Screen Display** - Allows viewers to read menu selections in three different languages (English, French, and Spanish) to ensure user-friendly programming.
