CrossFire Xpress 3200: Award Winning Platform

With a pair of X1900XTX's in CrossFire configuration, you can rest assured you'll have the one of the fastest gaming systems money can buy.

The CrossFire Xpress 3200 chipset is one of the most power-efficient northbridge chipsets we have seen in a long time.

There is simply no getting around that the Asus A8R32-MVP is probably the best motherboard I have ever tested.

"Both the ATI Radeon XPress 3200 chipset and the Asus A8R32-MVP motherboard made a splash ...

"ATI seems to be on something of a roll. Its X1900 series is current the fastest graphics platform out at the moment, and the RD580 chipset seems to finally be a mainboard chipset that gamers and enthusiasts can really get enthusiastic about"

According to our benchmarks boards with CrossFire Xpress 3200 deliver the highest performance of a double PCI Express x16 bus..
