

TWINX2048-3200C2

The TWINX2048-3200C2 is a pair of 1024 MByte DDR SDRAM DIMMs designed for extreme speed are some of the fastest 1 GByte modules available. TWINX matched memory pairs are specifically designed for motherboards using chipsets with dual memory channels. This part delivers outstanding performance at high clock speeds. It has been tested extensively in a variety of motherboards commonly used in gaming rigs. This memory has been verified to operate at 200 MHz (DDR400) at aggressive latencies of 2-3-3-6. This module is also available as a single module.

FEATURES

- ▶ 2048 Megabytes of memory
 - ➔ *Two matched CMX1024-3200C2 modules*
- ▶ Dual channel testing environment
 - ➔ *200MHz Canterwood based test setup*
- ▶ Tested and packaged in pairs
 - ➔ *Packaged together immediately following system test*
- ▶ Benchmarked using both Athlon and Pentium test platforms
- ▶ Integrated aluminum heat spreader for improved thermal performance
- ▶ Lifetime warranty

TEST SPECIFICATIONS

- ▶ Tested at aggressive latency settings of 2-3-3-6 for all platforms.
 - ➔ *2-3-3-6 on Intel and AMD based systems*
 - ➔ *Test voltage: 2.75V*
