Ecologic EC750G UPS

Offering advanced energy-saving battery backup and surge protection against power surges and interruptions.

The CyberPower Ecologic EC750G UPS safeguards PCs and other electronics from blackouts, brownouts, surges, spikes, sags, and other power abnormalities. Its composite integrated circuitry offers reliable surge protection and battery backup during power interruptions. This UPS utilizes GreenPower UPS™ high efficiency design to reduce power consumption and is an ENERGY STAR® qualified battery backup.

The CyberPower EC750G has three surge protected ECO outlets. When ECO mode is on and the battery backup detects that your computer is off or in Sleep mode, computer peripherals connected to the ECO outlets will be turned off (USB connection required). This reduces unneeded power usage and provides greater energy savings.

A Three-Year Warranty ensures that this UPS has passed our highest quality standards in design, assembly, material or workmanship and further protection is offered by a $100,000 Connected Equipment Guarantee.

ENERGY-SAVING ECO MODE
Ecologic UPS systems offer energy-conserving ECO Mode functionality with surge protected ECO outlets. When the ECO Mode outlets are activated and the computer is connected to the UPS, the UPS can detect when the connect computer is off or in Sleep mode. The UPS will then safely remove power to the ECO outlets, shutting down connected devices, which reduces power usage and provides energy cost savings.
