

# Step-by-Step Instructions

(PRINT this set of instructions to follow every time you refill your cartridge)

## Kodak #30B Cartridge

**Before Refilling Cartridge, Please Review Step Number 7**

**Items Needed: Black Ink, Syringe with Needle Tip, Paper Towels, Gloves, Review Hints and Tips, and Check List.**

**Syringe: Attach needle tip to the syringe tightly. Unscrew lid on ink bottle. Puncture silver seal with needle tip making a small hole in the center of seal. Using the correct color pull the correct amount of ink into the syringe. Rinse syringe and needle tip after every use and before using syringe with another color. Rinse syringe and needle tip with water until the water runs clear.**

1. Put the cartridge on some paper towels in an area where you can tolerate a spill.
2. Peel off the top label.
3. You will see a hole under the label. This will be your fill hole.
4. Fill the syringe with 5ml of black ink and S-L-O-W-L-Y dispense the ink into the fill-hole. If ink begins to “bubble” out of the fill-hole, draw 1-2ml of ink back into the syringe. Bubbling occurs when a cartridge is either over-filled or if the ink is being inserted too quickly. Wait several minutes and then try to slowly insert more ink (if needed). If ink begins to bubble out the fill-hole or leak from the printhead, you have plenty of ink in the cartridge.
5. Clean the fill-hole and seal it with fill hole plugs or a drip of hot glue. Make sure the opening is sealed tightly to prevent ink from leaking.

6. After refilling the cartridge, you have to exchange the chip that monitors the filling level of the cartridge.

7. **Exchanging the chip:**

Hold the Kodak #30 cartridge as shown in picture 3 and push down the lever. Then carefully remove the chip and replace it with the new one. Please make sure to insert the chip in the right direction (picture 4). Your Kodak #30 cartridge is now ready to print and you can reinsert it into your printer.

When black is visible on paper towel, place cartridge back into the printer and run 1-3 cleanings.

And print the following test pages:

[http://www.refills4you.com/support/black\\_print\\_test.html](http://www.refills4you.com/support/black_print_test.html) Black Ink Test

[http://www.refills4you.com/support/color\\_print\\_test.html](http://www.refills4you.com/support/color_print_test.html) Color ink Test

**For best results, leave cartridge in printer for 8 hours after refilling so the ink can saturate the entire sponge. This allows ink to flow to the printhead.**

**PLEASE NOTE: If you have tried printing with your cartridge completely out of ink, you may have damaged the printhead. Inkjet printers work by heating a resistor inside the printhead which heats the ink before it is sprayed onto the paper. If there is no ink to keep the resistors cool, you stand the chance of frying them. In your worst case you will need to buy a new cartridge.**
