# Color laser printing gets personal

## Color Laser Printing Just for You

The magicolor® 2400W from KONICA MINOLTA is the color laser alternative to ink jet printers. It's small, quick, and ready for any print job—from letters and reports to family photos and fun flyers. There's no special paper required and it's got long-lasting supplies so you can print page after page of durable, high-impact color. Don't try this with a bargain-bin ink jet!

## Laser Performance

- The **magicolor 2400W** prints up to 20 ppm in black & white and 5 ppm in color—delivering best-quality, 2400 dpi prints at full speed.
- Its high-speed USB interface offers quick data throughput for fast “click-to-print” speed.
- Compatible with Windows® XP, 2000, Me, and 98SE, the **magicolor 2400W** is perfect for the small office, home office, and executive desk.

## Quick & Easy

- Just a few simple steps and the **magicolor 2400W** is up and running. Factory-installed, color-coded supplies make for quick set-up and easy replacement.
- Use the desktop Status Display to conveniently check on your print job. It even reports how much toner remains so you'll never have to guess.

## Laser Quality & Reliability

- Unlike ink jet printers, the **magicolor 2400W** doesn't require special media. This versatile color laser can use plain paper for everyday printing, glossy paper for photos, label stock for address and CD labels, thick paper for cards and brochures, and envelopes for mailings.
- With toner cartridges that last up to 4,500 prints and a duty cycle of 35,000 pages per month, this color laser offers print after print of uninterrupted progress.
