

PD-9601G Midspan

PoH 95W, Single-port Gigabit Midspan

Overview

Microsemi's PD-9601G midspan is a single port solution for remote powering of current as well as emerging high power applications. The Microsemi PD-9601G is designed to power wireless and cellular base stations, pan-tilt-zoom (PTZ) and dome cameras, physical access control with door locks, televisions and interactive displays, Point of Sales (POS) and information kiosks, thin clients and other high power Ethernet end terminals with 95W of power, and is also backward compatible and safe to use with any IEEE802.3af or IEEE802.3at terminal such as VoIP phones, IP cameras and wireless LAN access points. It can power both existing 10/100Base-T devices and emerging wireless Gigabit devices. With the midspan's plug-and-play installation, they are easy and cost effective to implement leveraging existing Ethernet infrastructure while at the same time providing the assurance of a future proof network.
