2.2 Dual Band Wireless Adapter Driver and Utility Installation

Please follow the following instructions to install your new wireless network card:

1. Insert the USB wireless network card into an empty USB 3.0 port of your computer when computer is switched on. Never use force to insert the card, if you feel it’s stuck, flip the card over and try again.

2. Insert device driver CDROM into the CD/DVD ROM drive of your computer, and execute “Setup.exe” program in “Driver” folder.
3. The following message will appear on your computer, click “Close”.

4. Insert device driver CD-ROM into the CD/DVD ROM drive of your computer. Select “Driver/Utility Installation” to install the software program.

5. Then Click “Next” to continue. Installation procedure needs few minutes to complete, please be patient.

6. Click “Finish” to restart your computer to complete installation procedure. If you don’t want to restart computer now, select “No, I will restart my computer later” option and click “Finish”.

7. Please note you have to restart your computer before you can use your new USB wireless network adapter.

**Connect to Wireless Access Point**
Using Configuration Utility to Connect to Wireless Access Point:
1. After installation is complete, wireless configuration utility will be shown in the desktop of your computer automatically. You will also see an icon at the bottom-right corner of your windows system. You can click the icon by right mouse key, and select the configuration utility you want to use.

2. Wireless utility will appear. Click “Available Network” tab to search for wireless access points nearby.
3. Please wait for a while, and all wireless access points which can be reached by this wireless network adapter will be displayed here.

4. Please select the access point you want to connect, and then double click on it or click “Add to Profile”.

5. If the wireless access point you want to connect does not show here, please click “Refresh”.

6. If a password (Network Key) is required to access the wireless access point, please enter it in “Network key” (and enter it again in “Confirm network key” for confirmation). Click “OK” when password is properly inputted.
7. The network adapter will attempt to connect to access point now, this may require few seconds to minutes, please be patient. When the “Status” become “Associated” in “General” tab, your computer is connected to access point you selected. Click “Close” to close configuration menu.

**NOTE:** If you insert the USB wireless network adapter into an USB 3.0 port and connect to an 11ac AP, device driver will perform an auto USB mode switch and shown the message as below photo, or you will heard sounds of USB insert or unplug, this is the normal states.

For advanced settings and other features of this USB wireless network adapter, please refer to user manual enclosed in supplied CD-ROM.
