

USB OVER CAT5/5E/6 EXTENSION ADAPTERS (USB-RJXT)

Extend a USB port over Cat5/5E/6 cable (not included in box) on your desktop or notebook running Windows/Mac. Ideal for use with USB cameras, printers, webcams, keyboard/mouse extensions, and any other USB devices. Easy installation, Plug&Play.

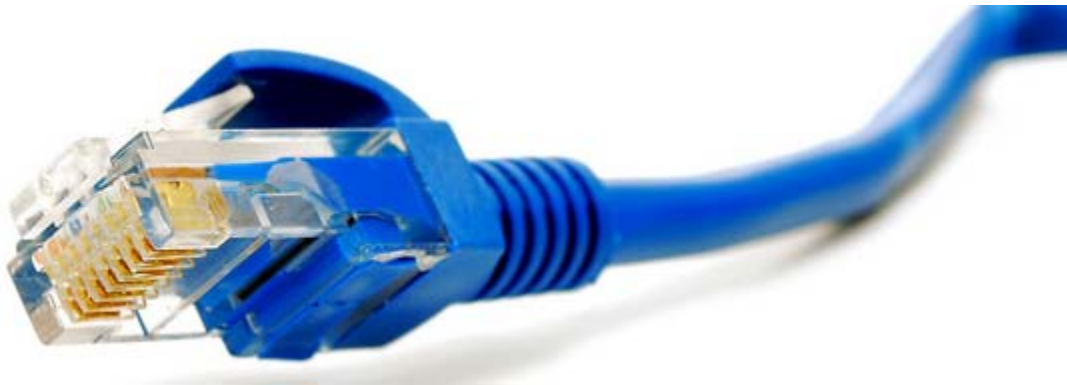

1. Connect the SENDER unit to an available USB port on you PC/notebook.

NOTE: SENDER unit LED illuminates when connected. You might not hear the Windows or Mac plug in sound when connected. This is normal on some versions so please continue onto the next step.

3. Connect your network cable to the SENDER unit.

Note: Cables up to 150 feet.

4. Connect the other end of the cable to the RECEIVER unit.

NOTE: RECEIVER unit LED should also illuminate.

5. At this time you are ready to extend your devices. Connect your device to the RECEIVER unit via USB.

FAQ's

1) We recommend installing the driver for USB-RJC2 on our website if you are having issue with your devices being recognized.

<http://www.sabrent.com/downloads.php>

2) We also recommend you try it on a different USB port or computer if issues arise.

3) Insure your network cable is functioning by testing or swapping out with spare.
