SET UP & USE:

MONITOR

To Use in Video and Audio Mode:

- Step 1:** Place the Monitor in the room from which you want to monitor your baby (ie. bedroom or living room). Plug the AC Adapter into the monitor's AC Adapter Jack and the other end into a standard electrical outlet.
- Step 2:** Press and hold "POWER" button for 4 seconds to turn on until video or Summer logo appears on screen.
- Step 3:** For audio and no video, press the VIDEO ON/OFF button on top of the unit.
- Step 4:** To turn the monitor off completely, press and hold the "POWER" button for 3 seconds.

Tips:

- Before using Monitor in portable mode (battery), be sure to charge battery 12-16 hours.
- To charge battery, plug the larger AC Adapter into the Monitor's AC Adapter Jack. Plug the other end into a standard electrical outlet.
- After initial 12-16 hour charge, to achieve optimal battery life, charge battery overnight and unplug all day during use.
- **Note:** Only charge battery when low indicator light comes on. Constant recharging of your battery before low battery indicator light comes on will decrease the life of your batteries.
- When battery is low, the Power On LED will illuminate amber, indicating that the battery needs to be recharged.
- To conserve battery power, use AC Adapter whenever possible. Remove battery during long periods of non-use.
- If battery is exhausted, remove immediately from the Monitor.
- Properly dispose of exhausted battery.
