Acer ColorBoost II+ Technology

ColorBoost II+ is an advancement that refines the form of light waves to improve color performance based on lamp spectrum and color-wheel properties. Acer ColorBoost II+ enriches natural color temperature to achieve optical color balance, and enhances content-based color brightness.

Acer ColorSafe II

Acer projectors that feature ColorSafe II are virtually immune to color decay – the yellow or green tint of images displayed by some projectors that have been used for extended periods of time. Acer projectors with ColorSafe II take advantage of DLP® technology and Acer's unique optics-based color-compensation technology to guarantee picture integrity even after prolonged use. The resulting extended lifespan and consistent image quality lower the total cost of ownership.

DLP® 3D Ready

This projector supports DLP® 3D glasses for viewing in 3D any 120 Hz frame-sequential 3D content from a PC with a 120 Hz graphics card and 3D stereoscopic player.

Acer EcoProjection

Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 75%. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
