Description

DisplayPort is a new digital display interface standard put forth by the Video Electronics Standards Association (VESA). It defines a digital audio/video interconnect intended to be used between computer and display monitors, or computers and home theater systems. Similar to HDMI, in that it supports both Digital Video/Audio signals, DisplayPort is geared more toward the computer market, where HDMI dominates the Home Theater market. Tripp Lite's DisplayPort cables support a maximum bandwidth of 10.8Gbps, as well as DPCP (DisplayPort Content Protection) , HDCP, and resolutions up to 1080p. In most applications, a signal booster ([B121-000](#)) should be used with this cable to ensure a signal strong enough for your display.
