

# S-915 and S-917 Mini-ITX Cases

## Ready to Maximize Your Storage Space

The more we work and play, the more we find ourselves racking up gigabytes of music, movies, photos, and documents. Then comes the challenge of managing these precious but hefty digital goods. That's when your system is crying out for a NAS system to help wash down the plug.

Network-attached storage (NAS) is what can make wrangling data a piece of cake. Imagine a single machine on your network slinging files to every PC in your home, managing backups, and safeguarding all of your important memories or sensitive data. iStarUSA's new S-915, S-917, and S-919 Mini-ITX cases are ideal for those wanting to build their own NAS storage server. They're designed to house high performing systems in a compact form factor and at high storage capacity.

These Mini-ITX cases are easy to install and maintain, and are suitable for every environment from home to office to store. They're also equipped with a security lock to prevent unauthorized HDD access, and aluminum front bezels that adorn a solid-steel chassis, making for great looks and a powerhouse data manager.
