

EXPEDITION XP308i

300-Watt Portable PA

PRODUCT INFORMATION

2014

© 2014 Samson. Preliminary Literature. All product descriptions and specs subject to change.

The Expedition XP308i offers a PA solution that combines powerful stereo sound with portability and simplicity. With its clever design, the XP308i packs up into a single unit that weighs just under 40 pounds. Perfect for schools, conferences and presentations, as well as musicians and singer-songwriters, the XP308i is the ultimate in portable sound.

A removable 8-channel mixer powers the XP308i with a 300-watt (2 x 150) Class D amplifier. The mixer features four Mic/Line channels with XLR and 1/4-inch inputs, allowing you to connect microphones or line signals. It also includes two stereo input channels for connecting external devices like MP3 players, keyboards and more. You can even engage the Phantom Power switch if you are using condenser microphones. There's also a built-in DSP to add Digital Reverb to your voice or instrument. Each channel features 2-band (Bass and Treble) controls.

The XP308i's 2-way vented speakers give you a clean, powerful stereo sound. They produce deep bass tones, as well as pure dispersion and loud, lucid audio, through 8-inch low frequency drivers and custom 1-inch tweeters with 60° x 90° coverage. For display flexibility, these ABS, high impact plastic enclosures feature integrated 1 3/8-inch speaker stand mounts, as well as a kickback design for use as floor monitors.

For enhanced convenience and versatility, the XP308i features an onboard iPod dock that easily connects to most iPod models for seamless music playback. You can also use the iPod to incorporate background tracks or repeat a commercial message at a fair or tradeshow.

The Expedition XP308i stands out as a complete portable PA system that is perfect for medium-sized musical, educational, business and recreational applications.
