Safety Instructions

Notational

Please read the following safety instructions as they are designed to prevent damage to property and harm to the user.

Warning / Caution

Failure to follow directions noted by this symbol could result in bodily harm or damage to the equipment.

Notational Conventions

Prohibited

Important to read and understand at all times

Do not disassemble

Disconnect the plug from the outlet

Do not touch

Ground to prevent an electric shock

Power

When not used for an extended period of time, set your computer to DPM. If using a screen saver, set it to active screen mode.

The images here are for reference only, and are not applicable in all cases (or countries).

Shortcut to Anti-Afterimage Instructions

- Do not use a damaged or loose plug.
 - This may cause electric shock or fire.
- Do not pull the plug out by the wire nor touch the plug with wet hands.
 - This may cause electric shock or fire.

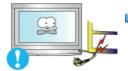

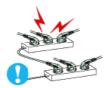

- Use only a properly grounded plug and receptacle.
 - An improper ground may cause electric shock or equipment damage.(Class I Equipment only.)

- Insert the power plug firmly so that it does not come loose.
 - A bad connection may cause fire.

- Do not excessively bend the plug and wire nor place heavy objects upon them, which could cause damage.
 - This may cause electric shock or fire.

- Do not connect too many extension cords or plugs to one outlet.
 - This may cause fire.

- Do not disconnect the power cord while using the LCD Display.
 - A surge may be caused by the separation and may damage the LCD Display.

- Do not use the power cord when the connector or plug is dusty.
 - If the connector or plug of the power cord is dusty, clean it with a dry cloth.
 - Using the power cord with a dusty plug or connector may cause electric shock or fire.

- To disconnect the apparatus from the mains, the plug must be pulled out from the mains socket, therefore the mains plug shall be readily operable.
 - This may cause electric shock or fire.

Installation

- Place your LCD Display in a location with low humidity and a minimum of dust.
 - Failure to do so may cause electric shock or fire inside the LCD Display.

- Do not drop the LCD Display when moving it.
 - This may cause damage to the product or the person carrying it.

- Install the LCD Display base in a showcase or shelf so that the end of the base does not protrude from the showcase or shelf.
 - Dropping the product may cause damage to the product or the person carrying it.

- Do not place the product on an unstable or small surface area.
 - Place the product on an even and stable surface ,as the product may fall and cause harm to someone walking by, specifically children.

- Do not place the product on the floor.
 - $\bullet\;$ Take care, as someone, specifically children may trip over it.

- TO PREVENT THE SPREAD OF FIRE, KEEP CANDLES OR OTHER OPEN FLAMES AWAY FROM THIS PRODUCT AT ALL TIMES.
 - Otherwise, this may cause fire.

- Keep any heating devices away from the power cable.
 - A melted coating may cause electric shock or fire.

- Do not install the product in places with poor ventilation, for instance, a bookshelf, closet, etc.
 - $\bullet\,$ Any increase in the internal temperature may cause fire.

- Put down the LCD Display carefully.
 - Failing to do so may damage the LCD Display.

- Do not place the LCD Display face down.
 - This may damage the TFT-LCD surface.

- The installation of the bracket must be done by a qualified professional.
 - Installing the bracket by unqualified personnel may result in injury.
 - Always use the mounting device specified in the owner's manual.

- When installing the product, make sure to keep it away from the wall (more than 10 cm / 4 inches) for ventilation purposes.
 - Poor ventilation may cause an increase in the internal temperature of the product, resulting in a shortened component life and degraded performance.

- ▶ Keep the plastic packaging (bag) out of children's reach.
 - The plastic packaging (bag) may cause suffocation if children play with it.

Clean

When cleaning the LCD Display case or the surface of the TFT-LCD screen, wipe with a slightly moistened, soft fabric.

- Do not spray water or detergent directly onto the LCD Display.
 - This may cause damage, electric shock or fire.

Use the recommended detergent with a smooth cloth.

If the connector between the plug and the pin is dusty or dirty, clean it properly using a dry cloth.

• A dirty connector may cause electric shock or fire.

Make sure to unplug the power cord before cleaning the product.

• Otherwise, this may cause electric shock or fire.

- Unplug the power cord from the power outlet and wipe the product using a soft, dry cloth.
 - Do not use any chemicals such as wax, benzene, alcohol, thinners, insecticide, air freshener, lubricant or detergent.

Others

- Do not remove the cover (or back).
 - This may cause electric shock or fire.
 - Refer to a qualified servicing company.

- If your LCD Display does not operate normally in particular, if there is any unusual sound or smell coming from the LCD Display unplug it immediately and contact an authorized dealer or the Service Center.
 - This may cause electric shock or fire.

- Keep the product away from places exposed to oil, smoke or moisture; do not install inside a vehicle.
 - This may cause a malfunction, electric shock or fire.
 - In particular, avoid operating the LCD Display near water or outdoors where the LCD Display could be exposed to snow or rain.

- If the LCD Display is dropped or the casing is damaged, turn the LCD Display off and unplug the power cord. Then contact the Service Center.
 - The LCD Display may malfunction, causing electric shock or fire.
- Disconnect the plug from the outlet during storms or lightning or if it is not used for a long period of time.
 - Failure to do so may cause electric shock or fire.

- Do not try to move the LCD Display by pulling only the wire or the signal cable.
 - This may cause a breakdown, electric shock or fire due to damage to the cable.

- Do not move the LCD Display right or left by pulling only the wire or the signal cable.
 - This may cause a breakdown, electric shock or fire due to damage to the cable.

- Do not cover the vents on the LCD Display cabinet.
 - Bad ventilation may cause a breakdown or fire.

- Do not place water containers, chemical products or small metal objects on the LCD Display.
 - This may cause a malfunction, electric shock or fire.
 - If a foreign substance enters the LCD Display , unplug the power cord and contact the Service Center.

- Keep the product away from combustible chemical sprays or inflammable substances.
 - This may cause an explosion or fire.

- Never insert anything metallic into the LCD Display openings.
 - This may cause electric shock, fire or injury.
- Do not insert metal objects such as chopsticks, wire and tools or inflammable objects such as paper or matches into the vent, headphone port or AV ports or etc.
 - This may cause electric shock or fire. If an alien substances or water enters
 the product, turn the product off, unplug the power connector from the wall

- When viewing a fixed screen for an extended period of time, residual image or blurriness may appear.
 - Change the mode to energy saving mode or set a screensaver to a changing picture when away from the LCD Display for an extended period of time.

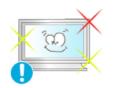

- Adjusts the resolution and frequency to the level appropriate for the model.
 - An inappropriate resolution may cause undesirable picture quality.

57 inch (143 cm) - 1920 x 1080

Viewing the LCD Display continuously at a too close angle may result in damage to your eyesight.

To ease eye strain, take at least a five-minute break after every hour of using the LCD Display.

- Do not install the product on an unstable, uneven surface or a location prone to vibrations.
 - Dropping the product may cause damage to the product or the person carrying it. Using the product in a location prone to vibrations may shorten the lifetime of the product or may cause the product to catch fire.

- When moving the LCD Display, turn off and unplug the power cord. Make sure that all cables, including the antenna cable and cables connected to other devices, are disconnected before moving the LCD Display.
 - Failure to disconnect cables may damage it and cause fire or electric shock.
- Make sure there are more than two people when moving the product.
 - Dropping the product may cause a malfunction or injury to the person carrying it.

- Place the product out of children's reach, as they could damage by hanging onto it.
 - A falling product may cause injury to the person or even fatality.

- When not using the product for an extended period of time, keep the product unplugged.
 - Otherwise, this may cause heat emission from the accumulated dirt or degraded insulation, causing electric shock or fire.

- Do not place your children's favorite toys or any other objects of interest on the product.
 - Children may try to climb on the product to retrieve an object. The product could fall, causing injury or even fatality.

- When removing batteries from the remote control, be careful that they are not swallowed by children. keep the batteries out of children's reach.
 - If the batteries are swallowed, see a doctor immediately.

- When replacing batteries, place the batteries in the correct +/polarity position as indicated on the battery holder.
 - The incorrect polarity may cause a battery to break or leak and may cause fire, injury, or contamination (damage).

- Use only specified standard batteries. Do not use new and used batteries together.
 - This may cause a battery to break or leak and may cause fire, injury, or contamination (damage).
- The batteries (and rechargeable batteries) is not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling purposes as the consumer.
 - The customer can return used or rechargeable batteries to a nearby public

recycling center or to a store selling the same type of the battery or rechargeable battery.

7) Dower button

Turns the LCD Display On/Off.

8) Brightness Sensor

The product's Brightness Sensor function automatically detects the surrounding brightness using a brightness sensor and adjusts its brightness accordingly.

9) Power indicator

Shows PowerSaver mode by blinking green.

10) Remote Control Sensor

Aim the remote control towards this spot on the LCD Display.

☑ Note

See PowerSaver described in the manual for further information regarding power saving functions. For
energy conservation, turn your LCD Display OFF when it is not needed or when leaving it unattended for
long periods.

Rear

☑ Note

For detailed information concerning cable connections, refer to Connecting Cables under Setup. The LCD
Display 's configuration at the back may vary slightly depending on the LCD Display model.

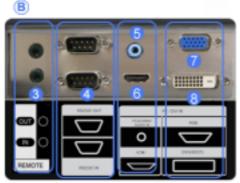

POWER S/W ON [|] / OFF [O]
 Switches the LCD Display On/Off.

2) POWER IN

The power cord plugs into the LCD Display and the wall plug.

B) REMOTE OUT/IN

You can use a wired remote control by connecting it to your monitor.

- 4) RS232C OUT/IN (RS232C Serial PORT)
 MDC(Multiple Display Control) Program Port
- DVI / PC / HDMI IN [PC/DVI/BNC AUDIO IN] (PC/DVI/BNC/HDMI Audio Connection Terminal (Input))
- 6) DVI / PC / HDMI IN [HDMI]

Connect the HDMI terminal at the back of your monitor to the HDMI terminal of your digital output device using a HDMI cable.

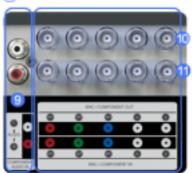

7) DVI / PC / HDMI IN [RGB] (PC Video Connection Terminal)

Using a D-Sub Cable (15 pin D-Sub) - PC mode (Analog PC)

8) DVI / PC / HDMI IN [DVI(HDCP)] (PC Video Connection Terminal)

Using a DVI Cable (DVI-D to DVI-D) - DVI mode (Digital PC)

- COMPONENT AUDIO IN [L-AUDIO-R] (Component Audio Connection Terminal
- 10) BNC/COMPONENT OUT [R/PR, G/Y, B/PB, H, V] (BNC/Component Connection Terminal (Output))

BNC (Analog PC) Connection: connecting the R, G, B, H, V ports Component Connection: connecting the PR, Y, PB ports

11) BNC/COMPONENT IN [R/PR, G/Y, B/PB, H, V] (BNC/Component Connection Terminal (Input))

- 12) AV AUDIO IN [L-AUDIO-R] (LCD Display Audio Connection Terminal (Input))
- 13) AV OUT [VIDEO] (VIDEO Connection Terminal): AV mode (Output)
- 14) AV IN [VIDEO] (VIDEO Connection Terminal) (Input)
- 15) AV OUT [S-VIDEO] (S-VIDEO Connection Terminal): S-VIDEO mode (Output)
- 16) AV IN [S-VIDEO] (S-VIDEO Connection Terminal) (Input)
- 17) EXT SPEAKER(8 Ω)[--L-+, --R-+] (EXT **Speaker Connection Terminal)**
- 18) AUDIO OUT [L-AUDIO-R] (LCD Display Audio Connection Terminal (Output)) AUDIO OUT is the terminal for sound output of PC, DVI or BNC.

- 19) LAN (LAN Connection Terminal)
- 20) USB (USB Connection Terminal) Keyboard / Mouse, Mass Storage Device Compatible.

☑ Note

· The number of LCD Displays that can be connected to loopout may differ depending on the cables, signal source etc. With cables where there is no degradation or signal source, up to ten LCD Displays can be connected.

21) Kensington Lock

The Kensington lock is a device used to physically fix the system to something when using it in a public place. (The locking device has to be purchased separately.)

For using a locking device, contact the place of purchase.

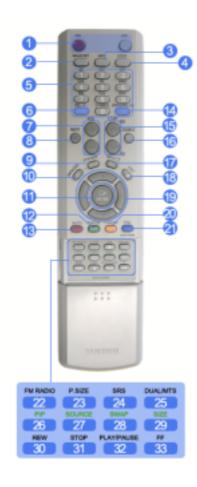

☑ Note

• See Connecting the LCD Display for further information regarding cable connections.

Remote Control

☑ Note

• The performance of the remote control may be affected by a TV or other electronic device operating near the LCD Display , causing a malfunction due to interference with the frequency.

1) ON/OFF

Turns the LCD Display On/Off.

2) MAGICNET

MagicNet Quick Launch Button.

3) MDC

MDC Quick Launch Button.

4) LOCK

Activates or deactivates all function keys on both the remote control and the LCD Display except for the Power and LOCK buttons.

5) MagicNet buttons

Used for MagicNet.

- · Alphanumeric: Used to enter the Internet address.
- DEL: Functions as the backspace.
- SYMBOL: Used to enter the symbols. (.O -)
- ENTER: Used to enter values.

6) +100 -/--

Press to select channels over 100.

For example, to select channel 121, press "+100", then press "2" and "1".

- This fuction does not work for this monitor.

7) VOL

Adjusts the audio volume.

8) MUTE

Pauses (mutes) the audio output temporarily.

This is displayed on the lower left corner of the screen.

The audio resumes if MUTE or - VOL + is pressed in the Mute mode.

9) TTX/MIX

TV channels provide text information services via teletext.

- This fuction does not work for this monitor.

10) MENU

Opens the on-screen menu and exits from the menu screen or closes the screen adjustment menu.

11) ENTER

Activates a highlighted menu item.

12) M/B P.MODE

When you press this button, current picture mode is displayed on the lower center of the screen.

AV / S-Video / Component : P.MODE

The Monitor has four automatic picture settings that are preset at the factory.

Then push button again to circle through available preconfigured modes.

(Dynamic \rightarrow Standard \rightarrow Movie \rightarrow Custom)

PC/DVI/BNC : M/B (MagicBright™)

MagicBright™ is a new feature providing the optimum viewing environment depending on the contents of the image you are watching.

Then push button again to circle through available preconfigured modes.

(Entertain \rightarrow Internet \rightarrow Text \rightarrow Custom)

13) AUTO

Adjusts the screen display automatically in PC mode.

By changing the resolution in the control panel, auto function is performed.

14) ENTER/PRE-CH

Returns to the immediately previous channel.

- This fuction does not work for this monitor.

15) Y CH/P A

In TV mode, selects TV channels.

- This fuction does not work for this monitor.

16) SOURCE

Changes the video source.

17) INFO

The current picture information is displayed in the top left corner of the screen.

18) * EXIT

Exits from the menu screen.

19) Up-Down Left-Right buttons

Moves from one menu item to another horizontally, vertically or adjusts selected menu values.

20) ¹ S.MODE

When pressing this button, the current mode is displayed at the bottom centre of the screen.

The LCD Display has a built-in high fidelity stereo amplifier.

Then press the button again to circle through available preconfigured modes.

(Standard \rightarrow Music \rightarrow Movie \rightarrow Speech \rightarrow Custom)

21) STILL

Press the button once to freeze the screen. Press it again to unfreeze.

22) FM RADIO

Turns the FM Radio on/off.

In PC/DVI mode, sets the SOUND to FM Radio.

In general Video mode, selects FM Radio, and turns off the screen.

In areas where the signal is weak, noise may occur during FM radio broadcasts.

- This fuction does not work for this monitor.

23) P.SIZE

Press to change the screen size.

24) ()SRS

SRS

25) I-IIDUAL/MTS

DUAL-

STEREO/MONO, DUAL I / DUAL II and MONO/NICAM MONO/NICAM STEREO can be operated depending on the broadcasting type by using the DUAL button on the remote control while watching TV.

3. Speaker

4. Installation VESA Bracket

- When installing VESA, make sure to comply with the international VESA standards.
- Purchasing VESA Bracket and Installation Information : Please contact your nearest Samsung Distributor to place an order. After your order is placed, installation professionals will visit you and install the bracket.
- At least 2 persons are needed in order to move the LCD Monitor.
- Samsung is not responsible for any product damage or any injury caused by installation at customer's discretion.

For securing the bracket on a wall, use only machine screws of 6 mm diameter and 8 to 12 mm length.

▲ Up

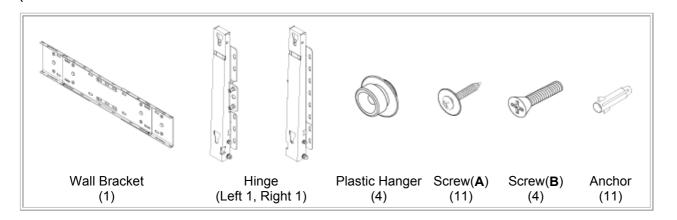

5. Wall Bracket Installation

- Contact a technician for installing the wall bracket.
- Samsung Electronics is not responsible for any damages to the product or harm to customers when the installation is done by the customer.
- This product is for installing on cement walls. The product may not stay in place when installed on plaster or wood.

Components

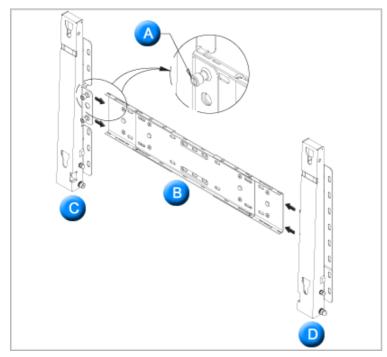

Only use the components and accessories shipped with the product.

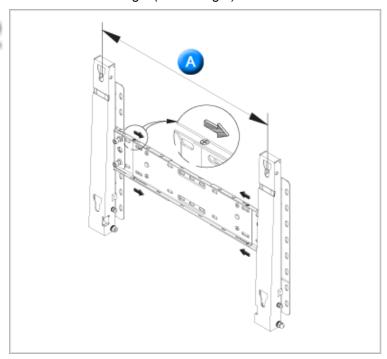

Insert and tighten the Captive Screw in the direction of the arrow. When done, mount the wall bracket on the wall.

- A. Captive Screw
- B. Wall Bracket
- C. Hinge (Left)
- D. Hinge (Right)

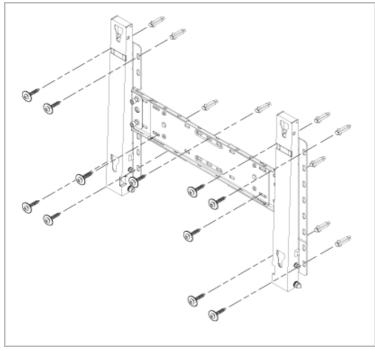

There are two hinges(left and right). Use the correct one.

Before drilling into the wall, check if the length between the two locking holes at the back of the product is correct.

If the length is too short or long, loosen all or some of the 4screws on the wall bracket to adjust the length.

A. Length between the two locking holes

Check the installation diagram and mark the drill points on the wall. Use the 5.0 mm bit to drill holes deeper than 35 mm. Fix each anchor in the corresponding hole.

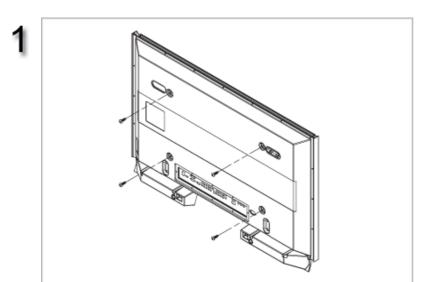

Match each of the brackets and hinge holes to the corresponding anchor holes and insert and tighten the 11 screws **A**.

2

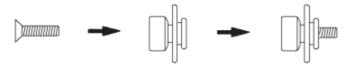

To mount the product on the wall bracket

The shape of the product may vary depending on the model. (The assemblies of the plastic hanger and the screw are the same)

Remove the 4 screws on the back of the product.

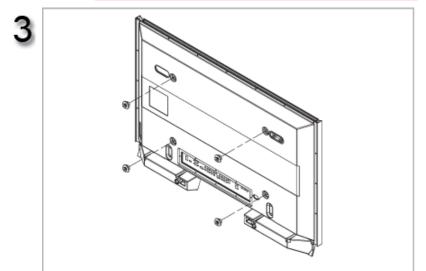

Insert the screw **B** into the plastic hanger.

- Mount the product on the wall bracket and make sure it is properly fixed to the left and right plastic hangers.
- 2. Be careful when installing the product on the bracket as fingers can be caught in the holes.
- 3. Make sure the wall bracket is securely fixed to the wall, or the product may not stay in place after installation.

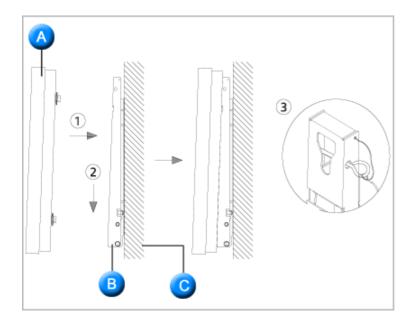

Tighten the 4 screws in step 2 (plastic hanger + screw **B**)to the rear holes of the product.

4

Remove safety pin (3) and insert the 4 product holders into the corresponding bracket holes (1). Then place the product(2) so that it is firmly fixed to the bracket. Make sure to re-insert and tighten the safety pin (3) to securely hold the product to the bracket.

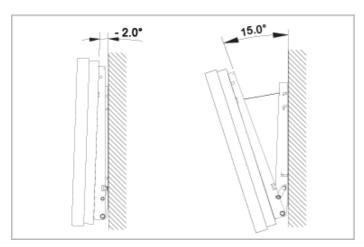

- A. Monitor
- B. Wall Bracket
- C. Wall

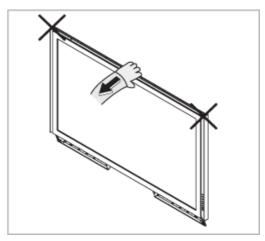

Wall Bracket Angle Adjustment

Adjust the bracket angle to -2° before installing it on the wall.

- 1. Fix the product to the wall bracket.
- 2. Hold the product at the top in the center and pull it forward (direction of the arrow) to adjust the angle.
- 3. You can adjust the bracket angle between -2° and 15°.

Make sure to use the top center, and not the leftor the right side of the product to adjust the angle.

The color and appearance of the product may vary depending on the model, and the product specifications are subject to change without prior notice for reasons of performance enhancement.

Connections

Installing the Stand KIT

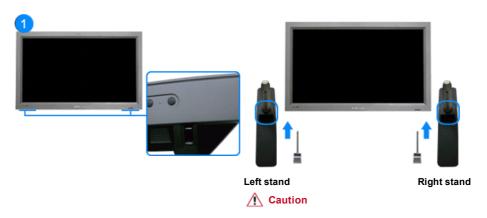

☑ Note

· Only the supplied bolts should be used.

Samsung Electronics will not be responsible for damages caused by using a base other than those specified.

> Installing the Semi Stand

Make sure to install the stand with the Caution label folded backwards

- 1) To protect your product, a Cover Hole is included as an accessory. This protects the hole at the bottom of the monitor where the stand is inserted. If you install a wall mount kit for your monitor, please place the
- Insert it into the hole at the bottom of the monitor. Insert the screw provided with the Cover Hole into the marked place and fasten it firmly.

The resolution may differ for each product model. For information on the optimal resolution, refer to the user manual

Using a Power cord with Earth

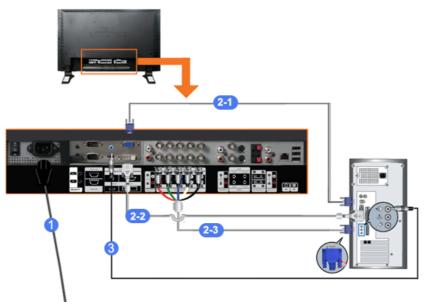

In the event of failure, the earth lead may cause electric shock. Make sure to wire the earth lead in correctly, before connecting the AC power. When un-wiring the earth lead, make sure to disconnect the AC power in advance.

✓ Note

AV input devices such as DVD players, VCR's or camcorders as well as your computer can be connected
to the LCD Display. For detailed information on connecting AV input devices, refer to the User Controls
under Adjusting Your LCD Display.

> Connecting a Computer

- Connect the power cord for your LCD Display to the power port on the back of the LCD Display.
 Trun on the power switch.
- 2) There are 3 ways to connect the D-sub to your LCD Display. Choose one of the following:
 - Using the D-sub (Analog) connector on the video card.
 Connect the D-sub to the 15-pin, RGB port on the back of your LCD Display and the 15 pin D-sub Port on the computer.

2-2) Using the DVI (Digital) connector on the video card.

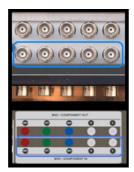

Connect the DVI Cable to the **DVI(HDCP) port** on the back of your LCD Display and the **DVI port** on the computer.

2-3)

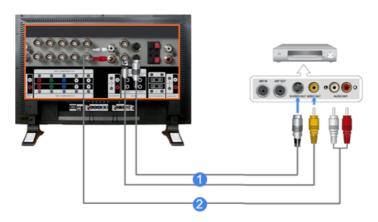

Using the BNC (Analog) connector on the video card.

Connect the BNC Cable to the **BNC/COMPONENT IN - R, G, B, H, V ports** on the back of your LCD Display and the **15 pin D-sub Port** on the computer.

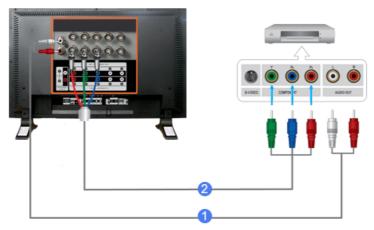

- 3) Connect the audio cable for your LCD Display to the audio port on the back of your computer.
- ☑ Note
- Turn on both your computer and the LCD Display.
- ☑ Note
- The DVI cable or BNC cable is optional.
 Contact a local Samsung Electronics Service Center to buy optional items.

➤ Connecting a VCR

- AV input devices such as VCRs or Camcorders are connected via the AV IN [VIDEO] or AV IN [S-VIDEO]
 of the LCD Display using an S-VHS or BNC cable.
- Connect the Audio (L) and Audio (R) terminals of a VCR or Camcorders to the LCD Display 's AV AUDIO IN [L-AUDIO-R] using audio cables.
- ☑ Note
- Select AV or S-Video for a connected VCR or Camcorder using the SOURCE button on the front of the LCD Display or on the remote control.
- Then, start the VCR or Camcorders with a tape inserted.
- ☑ Note
- The S-VHS or BNC cable is optional.

> Connecting a DVD Player

- Connect a set of audio cables between the COMPONENT AUDIO IN [L-AUDIO-R] on the LCD Display and the AUDIO OUT jacks on the DVD player.
- 2) Connect a Component cable between the **BNC/COMPONENT IN PR, Y, PB port** on the LCD Display and the PR, Y, PB jacks on the DVD player.

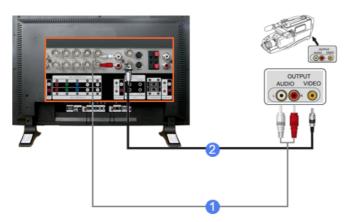

☑ Note

- Select Component for the connection to a DVD player using the SOURCE button on the front of the LCD Display or on the remote control.
- Then, start the DVD Player with a DVD disc inserted.

☑ Note

A component cable is optional.
 For an explanation of Component video, consult your DVD manual.

> Connecting a Camcorder

- Locate the A/V output jacks on the camcorder. They are usually found on the side or back of the camcorder.
 - Connect a set of audio cables between the AUDIO OUTPUT jacks on the camcorder and the **AV AUDIO IN [L-AUDIO-R]** on the LCD Display.
- Connect a video cable between the VIDEO OUTPUT jack on the camcorder and the AV IN [VIDEO] on the LCD Display.

☑ Note

- Select AV for the Camcorder connection using the SOURCE button on the front of the LCD Display or on the remote control.
- · Then, start the Camcorders with a tape inserted.
- ☑ Note

• The audio-video cables shown here are usually included with a Camcorder.

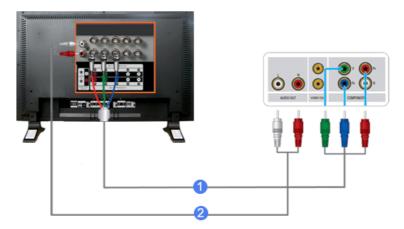

(If not, check your local electronics store.)

If your camcorder is stereo, you need to connect a set of two cables.

> Connecting a DTV Set Top Box

☑ Note

• The connections for a typical Set Top Box are shown below.

- 1) Connect a Component cable between the **BNC / COMPONENT IN PR, Y, PB** port on the LCD Display and the PR, Y, PB jacks on the Set Top Box.
- 2) Connect a set of audio cables between the **COMPONENT AUDIO IN [L-AUDIO-R]** on the LCD Display and the AUDIO OUT jacks on the Set Top Box.

✓ Note

 Select Component for the connection to a DTV Set Top Box using the SOURCE button on the front of the LCD Display or on the remote control.

☑ Note

For an explanation of Component video, see your Set Top Box owner's manual.

> Connecting Speakers

☑ Note

- Fasten the SET and the speaker using the screws.
 - * Mount the speaker set without the speaker stand.

☑ Note

• Connect the speaker connection cable between the speaker connection jack on the back of the SET and the speaker connection jack on the back of the speaker.

☑ Note

Do not move the SET while the SET is connected to the speakers.
 The speaker-bracket for connecting the SET speaker my become damaged.

> Connecting to an Audio System

☑ Note

• Connect a set of audio cables between the AUX L, R jacks on the **AUDIO SYSTEM** and the **AUDIO OUT [L-AUDIO-R]** on LCD Display.

> Connecting to a Wired Remote Control

✓ Note

- You can control your monitor by allowing it to receive the remote control signals of other devices through the REMOTE OUT terminal.
- You can control a device by allowing it to receive remote control signals from other devices through the REMOTE IN terminal.

☑ Note

• Restrictions: Available only if other devices support the wired remote control I/O terminals.

▶ Connecting HDMI

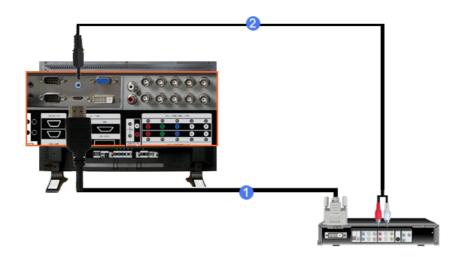

✓ Note

Input devices such as digital DVD are connected to the HDMI IN terminal of the monitor using the HDMI cable

☑ Note

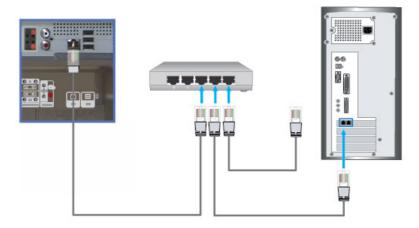

You cannot connect a PC to the HDMI IN terminal.

> Connecting Using a DVI to HDMI Cable

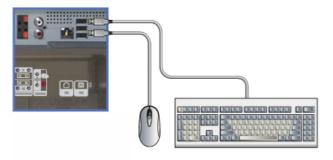

- Connect the DVI output terminal of a digital output device to the HDMI IN terminal of the monitor using a DVI to HDMI cable.
- Connect the red and white jacks of an RCA to stereo (for PC) cable to the same colored audio output terminals of the digital output device, and connect the opposite jack to the HDMI / PC / DVI-D AUDIO IN terminal of the monitor.

> Connecting a LAN Cable

1) Connect the LAN cable.

> Connecting a USB device

1) You can connect USB devices such as a mouse or keyboard.

> Using a USB Holder

When using a small external device such as a portable memory stick and it is connected to the USB terminal at the back of your monitor, it is exposed to the possiblity of theft or loss. By installing a USB holder after the installation of an external device, you can prevent theft or loss.

1) Insert part [6] of your USB holder into the groove in part [A] at the back of your monitor.

2) Align part 0 of your USB holder with the groove at the bottom of part 0 at the back of your monitor.

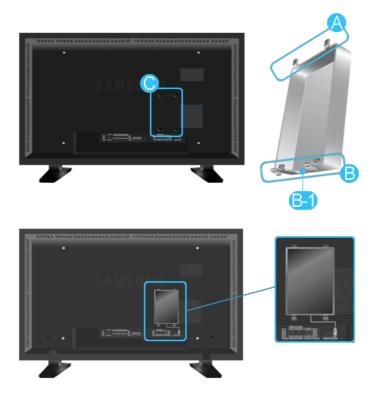

Align part 0 of your USB holder with the bottom of part 0 at the back of your monitor.

- 3) Insert a screw into the groove aligned in step [2], and fasten it.

> Using the HDD Cover

You can install an external 2.5" USB hard disk.

- Insert (A) into the groove at the top of (B), and then place and press (B) into the groove at the bottom of (B).
 The USB cable of the external hard disk can be connected via the (B-1) part to the USB connector of the monitor.
- 2) Check whether the parts are fixed correctly.

☑ Note

When removing the HDD Cover, pull the part slightly.

₩hat is MagicNet?

MagicNet uses an Ethernet network for servers and monitors, and transfers media files (image files, music files, and movies) and office files (HTML, PDF) from the server to the monitors over the network. Multiple monitors are connected to a server via a network and the server can transfer files to all the monitors at the same time or a single file to a single monitor. There are two ways to transfer files. The first is that the server registers a schedule to the monitors and then transfers files following that schedule. The second is that a monitor searches for the files registered in the library list of the server and receives and plays them. If more than one server is connected, the monitor can select a server and can receive a schedule from it. The monitor has a built-in Internet connection function. The servers and monitors are connected to the network. Each server or monitor has a unique name to identify itself on the network. A server and a monitor can only be connected if they have the same server name. For example, if the name of a server is 'MagicNet', only the monitors whose server name is 'MagicNet' can receive schedules from it. If a monitor cannot find a server whose name is the same as the server name configured in it, it waits until a server with that name appears. However, if Auto Connection is enabled, the monitor attempts to connect to other servers and connects to the first server that responds.

Major Functions of MagicNet

1. Free Screen Design

 \rightarrow You can configure the screens to be displayed on the monitor by placing and playing multiple areas on them feely and changing the area properties.

2. Content Downloading or Streaming

 \rightarrow You can select Stream or Download for the transfer mode to play content on the screens and thus play the screens according to your circumstances. The downloaded screens are played on the monitors at the scheduled time even though the monitors are not connected to the server.

3. Library Media File Management and Content Server

 \rightarrow You can manage the registered content in the library efficiently by creating folders. You can play the content on the screens according to your circumstances by operating the content server in accordance with the network status.

4. Network/Local Schedules and Publishing

ightarrow You can transfer the edited screens to selected monitors by using the publishing feature. You can also transfer screens to the monitors which are not connected to the network by using the local

schedules.

5. Instants message

 \rightarrow You can display a message on selected monitors regardless of schedules.

6. MDC and System

ightarrow The MDC and System functions allow you to control, view the status of, and diagnose monitors.

7. VNC

 \rightarrow The VNC function allows you to connect to a monitor remotely and view the status of and control and diagnose it.

8. Update and PXE

 $\stackrel{
ightharpoonup}{\sim}$ The Update function allows you to easily update the programs on the monitor. The PXE allows you to recover the operating system image for a monitor.

MagicNet Pro Using MagicNet What is MagicNet? Library Screen Schedule Client / Contents Remote Management | Option Troubleshooting

Server

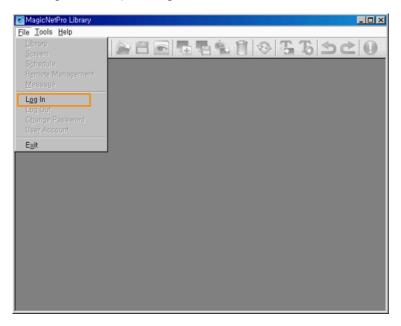

Using MagicNet

Running MagicNet

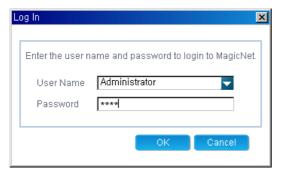

1. Click Programs -> MagicNetPro -> MagicNetPro.

Message

2. When MagicNetPro runs, select Log In from the File menu.

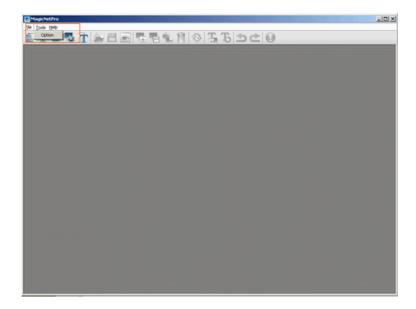

3. Enter the user name and password and click OK.

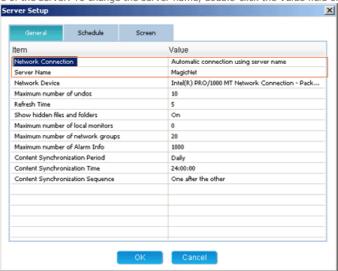

용 If you log in for the first time, select 'Administrator' as enter the user name and the password you set when installing the program. (For information on how to install MagicNet, refer to Installing MagicNet, Using the Software.)

Connecting a Monitor to a Server

- Setting Up a Server
 - 1. Click Option from the Tools menu to open the Server Setup window.

2. Configure the Network Connection settings In the General tab. Enter the server name on the monitor identical to the name of the server. To change the server name, double-click the Value field of the

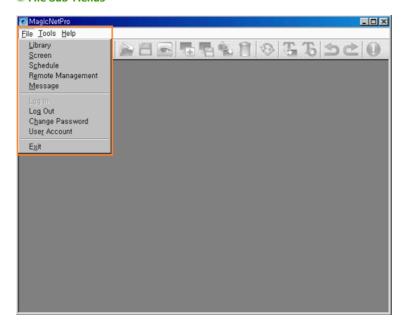

- Server Name item.
- 3. If there is more than one network card in the server, select a network card in the Network Device
- 4. If both the server and monitor are on the same network, make sure to select 'Automatic connection using a server name' in the Value field of the Network Connection item as the connection method. When setting up the monitor, make sure to use the same settings.
- 5. If the server and monitor are on different networks, make sure to select 'Direct connection using an IP address' in the Value field of the Network Connection item as the connection method. When setting up the monitor, make sure to use the same settings.
 - At this time, the IP address of the server which the monitor will connect to must be a public IP address. Make sure to enter this IP address in the Server IP Address item when setting up the monitor.
 - If the server is using a firewall, make sure to include the IP address of the monitor in the exceptions list for the firewall.

Setting up the Monitor

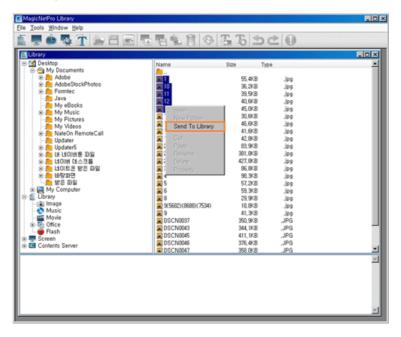

- Set the source of the monitor to MagicNet and then enter the IP address and server name using the Setup menu or the Network Connection item. They must be the same as the IP address and the name of the server to connect to. (For more information, refer to the description of setting up MagicNet in the OSD pages.)
- ${\hbox{2.}} \quad \hbox{A message is displayed to notify that the monitor is successfully connected to the server.}\\$

File Sub-Menus

Registering a Library

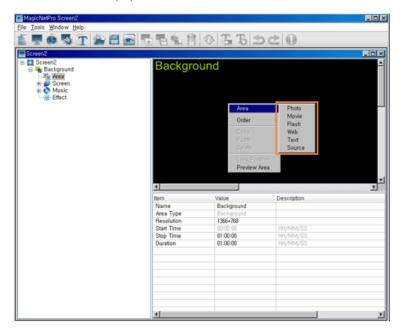

- 1. Select Library from the File menu to open the Library View.
- 2. Select a photo file, music file, movie file, document, or Flash file etc. on the server.
- 3. Right-click on the selected file and select Send To Library from the displayed menu to register it to the library.

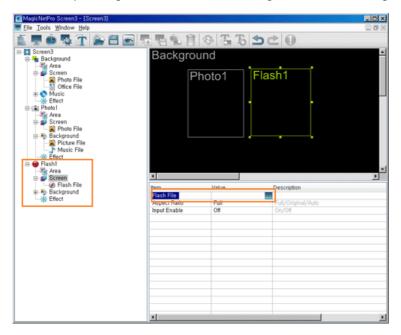

4. The registered library files are used by the monitor when the Operating Mode of the monitor is set to Player or is used when registering a screen.

Registering a Screen

- 1. Select Screen from the File menu to open a Screen View.
- 2. Right-click on the background view. Click on the Area and click either Photo, Movie, Flash, Web, Text, or Source from the displayed menu.

- 3. When the mouse pointer changes to the crosshair (+) icon, drag it to the Edit View to set the area for the file to be displayed.
- 4. When an area is set, tree items are added to the Tree View in the same order as shown under the Background item. The added tree items differ depending on the file type selected in step 2. You can select a file by selecting a screen item and then selecting an item below the Background item.

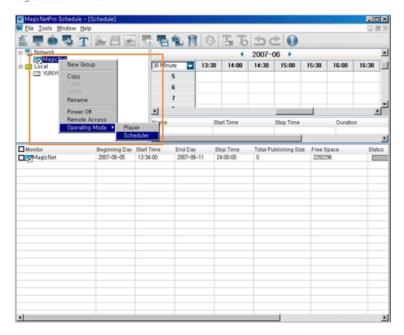

- 5. Repeat steps 2 to 4 to register other areas on a screen.
- 6. After finishing registering areas, select Save from the File menu to save the screen.
- 7. Register a schedule to display the saved screen on a monitor(s).

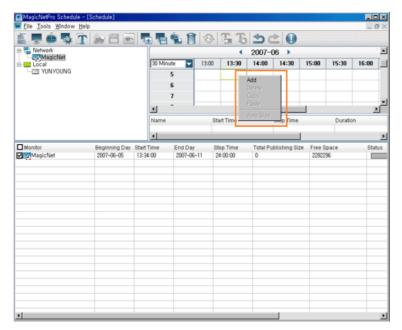

Registering a Schedule

1. Select Schedule from the File menu to open the Schedule View.

Select the monitors to which the schedule is to be registered in the Tree View at the left. The Operating Mode of the selected monitors must be set to Schedule if they can display the schedule registered on the server.

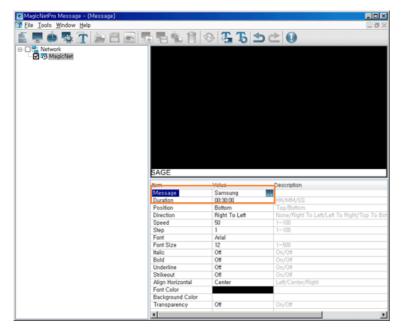

3. Click a date and time in the Edit View at the right to select the date and time when the schedule is to be performed. Right-click the Edit View and select Add from the displayed menu. At this time, you can only select the schedules for the screens you saved using the Screen menu.

- 4. If you want to change the date or time of the schedule, drag it to a different date or time.
- 5. Select Publish from the Tools menu. Select the checkbox next to the monitors for which you want to register the selected schedule.

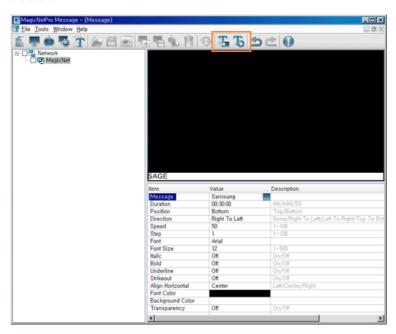

Sending a Message

- 1. Select Message from the File menu to open the Message View.
- 2. Select the checkbox next to the monitors for which you want to register a message.
- 3. Configure the settings for the message in the List View at the bottom right. The text you enter here will be displayed on the selected monitors.

4. To display the message on the selected monitors, click the Send Message icon in the toolbar under the menu bar.

To hide the message which will be displayed on the selected monitors, click the Stop Message icon in the toolbar.

Library / Screen / Schedule / Remote Management / Message

• Creates a view or selects a created view for each menu item so that you can perform a screen schedule and have basic control over the monitors from the server.

Close

 Closes the screen view you are working in. If there are unsaved changes, a new window is displayed so that you can save them.

Log In

You must log onto the server before you can use any one of its functions. You can log onto
the server to run a server program. The password you enter when installing MagicNet Pro
becomes the password of the Administrator account by default.

Log Out

Once you are logged onto the server, you can log out. If you log out from the server, all
created views are closed and if there are any unsaved changes, a new window is displayed
so that you can save them.

Change Password

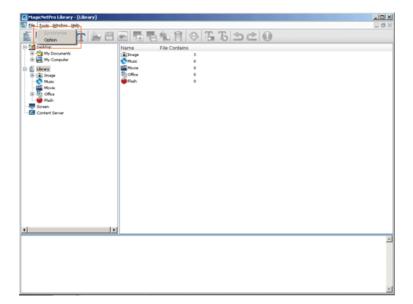

• Changes the password of the currently logged-in account.

User Account

- Creates, deletes and changes the user accounts that can log onto the server. There are two types of accounts that can be created: Administrator and User Accounts.
 - o Administrator : Has privileges for all server functions.
 - User: Has privileges for all functions except for changing the server options and user account features.

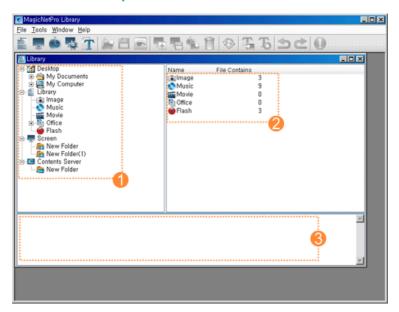

Exit

• Exits the program. If there are any unsaved changes, a new window is displayed in which you can save the changes.

- Synchronize
 - Synchronizes the library files of the main server with the files of the content server.
- Option
 - Changes the server settings. For more information, refer to the Options section.

Tree View

All the folders under My Computer on the Windows Desktop, library, screen, and content server are displayed in a tree view. If you select a folder, its subfolders and a list of files in it are displayed in the list

view in the right pane.

- Exploring Normal Files
- Exploring Libraries
- Exploring Screen Files
- 4 Exploring Content Servers

Exploring Normal Files

- Displays all the folders in the computer on which a server is installed in a tree view.
- Function: If you select a folder below the Desktop, its subfolders and the files that you can register to a library are displayed in the list view in the right pane.

Exploring Libraries

- $\ \, \color{red} \blacksquare \ \,$ Displays all the folders which are created in the libraries in a tree view.
- Function:
 - If you select a folder, its subfolders and a list of library files are displayed in the list view in the right pane.
 - Hot Key
 - F2 key: Renames the selected folder.
 - Delete key: Deletes the selected folder, its subfolder(s), and all the files in the selected folder.
 - Drag & Drop
 - Desktop File: If you drag and drop a file from the list view to a library, a check is performed whether it can be registered to that library and if possible it is registered.
 - Library File: If you drag and drop a file from the list view into a library, it is moved to the library if the content types of both the file and library are the same.

Exploring Screen Files

- Displays the screen management folders created with the Screen menu in a tree view.
- Function:
 - Displays the subfolders and screen files below the selected folder in the list window on the right by selecting a folder.
 - Hot Key
 - F2 key: Renames the selected folder.
 - Delete key: Deletes the selected folder, its sub folder(s) and all the files in the selected folder and subfolders.
 - Drag & Drop
 - Screen File: If you drag and drop screen files in the list view, they are moved to that folder.

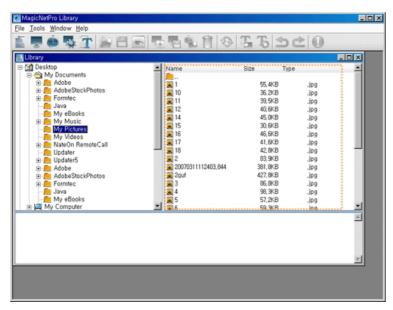

Exploring Content Servers

- Displays the management folders for the content servers in a tree view.
- Function:
 - If you select a folder, its subfolders and a list of content servers are displayed in the list view in the right pane.
 - Hot Key
 - F2 key: Renames the selected folder.
 - Delete key: Deletes selected folder, its sub folder(s) and all the files under the selected folder and its subfolder.
 - Drag & Drop
 - Contents Server: If you drag and drop the content servers onto a content server folder in the tree view, they are moved to that folder.

List View

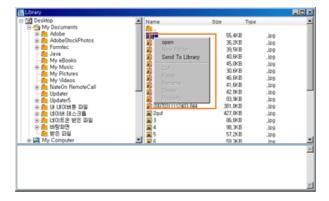

Displays all the folders and files or content servers under a folder selected in the tree window as a list. You can drag and drop items, use shortcut keys, and move, delete, and rename an item using the provided context menu.

Exploring Normal Files

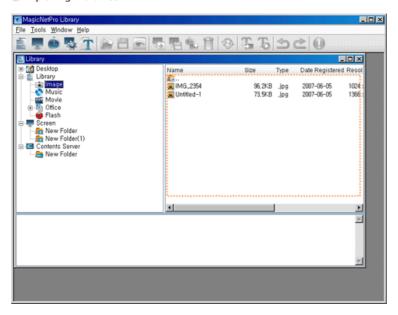

- Displays the subfolders and files under the selected folder.
- Function:
 - Double-Click
 - Double-click 🚉 to move to the upper folder.
 - Double-click is to move to the lower folder.
 - Double-click a file to run the file.
 - Drag & Drop
 - If you drag and drop a file from the list view into a library, it is registered to that library. However, the drag & drop function is not supported for folders.

ķ.

- Open: If you click Open for a folder, you are moved to that folder. If you click Open for a file, the file is run.
- Send To Library: If you click Send To Library for the selected files, they are registered to the library.

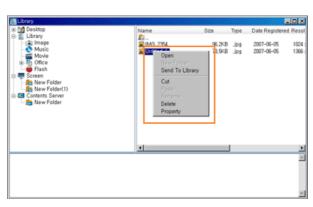

Exploring Libraries

- $\ \ \, \bigcirc$ Displays the subfolders and files under the selected folder.
- Function:
 - Double-Click
 - Double-click ... to move to the upper folder.
 Double-click to move to the lower folder.

 - Double-click a file to run the file.
 - Drag & Drop
 - If you drag and drop library files into a library folder in the tree view or list view, they are moved to that folder if the content types of both the library files and the library folder are the same. However, the drag & drop function is not supported for folders.

Context Menu

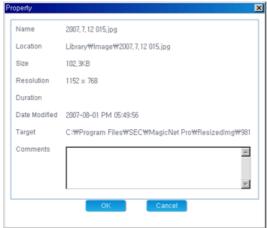

- Open: If you click Open for a folder, you are moved to that folder. If you click Open for a file, the file is run.
- Send To Library: Moves the selected library files to the topmost folder for each content item.

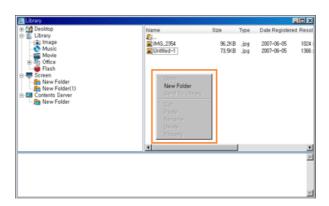

However, this menu item is deactivated when a folder is selected.

- Cut: Cuts the selected screen files to the clipboard so that you can paste them to another location. However, this menu item is deactivated when a folder is selected.
- Paste: Pastes the files cut to the clipboard to the selected location.
 However, this menu item is deactivated when the folder selected in the tree view is a Library or Office folder.
- Rename: Renames the selected folder.

 However, this menu item is deactivated when a library or office folder is selected in the tree view. This menu item is not supported for library files.
- Delete: Deletes the selected folders and library files.
 However, this menu item is deactivated when a library or office folder is selected in the tree view and the selection includes ".." which refers to a higher level folder.
- Property: Displays detailed information for the selected library file. You can add a comment to it.

Screen

• File Menu

- Library / Screen / Schedule / Remote Management / Message
 - Creates a view or selects a created view for each menu item so that you can perform a screen schedule and performs basic control for the monitors from the server.
- Create Workspace
 - Creates a new screen view to design more than one screen view. You can only create one view for other types of views except for the screen view.
- New
 - Initializes the screen view you are currently working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Open
 - Opens a screen file. If there are any unsaved changes, a new window is displayed so that you can save them.
- Save / Save As
 - Saves the changes in the current screen file or as a new screen file.
- Close
 - Closes the screen view you are working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Log In
 - You must log in to the server before you can use any one of its functions. You can log in to the server to perform a server program. The password you enter when installing MagicNet Pro becomes the password of the Administrator account by default.
- Log Out
 - Once you are logged into the server, you can log out. If you log out from the server, all
 created views are closed and if there are any unsaved changes, a new window is displayed
 so that you can save them.
- Change Password
 - Changes the password for the currently logged-in account.
- User Account
 - Creates, deletes and changes the user accounts able to log into the server. There are two
 types of accounts that can be created: Administrator and User Accounts

- O Administrator: Has privileges for all server functions.
- O User: Has privileges for all server functions except for changing server options and user account features.
- Exit
 - Exits the program. If there are any unsaved changes, a new window is displayed so that you can save them.

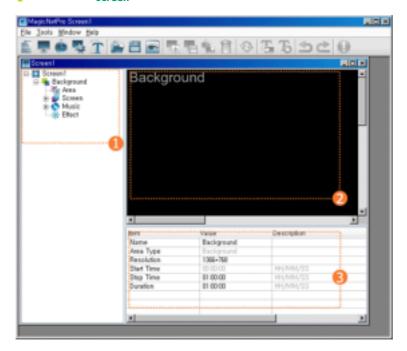

- Undo / Redo
 - Cancels the previously performed command or performs the canceled command again. You can change the maximum number of commands that you can undo using the Options menu.
- Copy / Paste / Delete
 - Copies, pastes, and deletes the currently selected area.
- Area
 - Select the type of area you want to create. You can create an area by dragging and dropping it into the Screen Edit window.
 - More than one Source Area cannot be played at the same time. Therefore, if the playing time of a source area overlaps, the source area whose playing time ends later is played.

(You can add areas for photo, movie, Flash, web, text, and source.)

- Order
 - Changes the order of the currently selected area.
 - The source area is always at the topmost position. (Bring to Front, Send to Back, Bring Forward, Send Backward)
- Lock All Position
 - Locks the position for all created areas. Once an area is locked, you cannot change its
 position and size using your mouse.
- Preview Screen
 - Previews the current state. A separate preview window is displayed. To close the preview window, double-click on it or press the ESC key.
 - + You cannot preview the office files for the source and background.
- Option
 - Changes the server settings. For more information, refer to the Options section.

© ****** Screen

Tree View

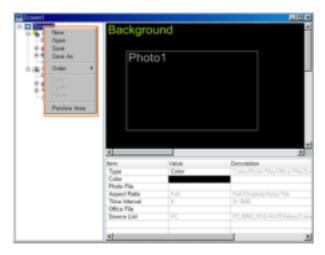

Edit View

Elist View

Tree View

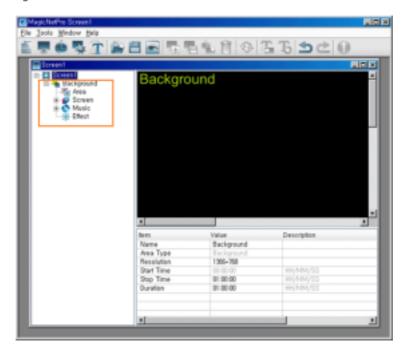

A tree is created in accordance with the order of the areas created in the Edit View. You can check the area currently selected in the Edit View using the Tree View. If you select a property of an area, the detailed property information is displayed in the List View.

Context Menu

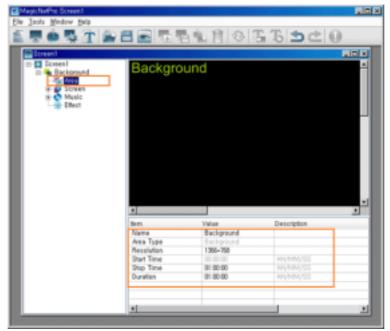

- New: Initializes the screen view you are currently working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Open: Opens a screen file. If there are any unsaved changes, a new window is displayed so that you can save them.
- Save / Save As: Saves the changes in the current screen file or as a new screen file.
- $\bullet\,$ Order: Changes the order of the currently selected area.
 - The source area is always at the topmost position.
 (Bring to Front, Send to Back, Bring Forward, Send Backward)
- Copy / Paste / Delete: Copies, pastes, and deletes the currently selected area.
- Preview Area: Previews the current state of the currently selected area.

Background

This is for configuring the background for all screens. The background consists of the Area, Screen, Music, and Effect functions. If a color or photo is used as the background, you can freely place other areas such as a movie and text on the background to compose a varied screen. If an office file or an external input is used as the background, you cannot place other areas on the background and will need to compose screens with the background only. The Area function allows you to set the size of the background and the total period of time that all screens are played. The Screen function allows you to set the background content you want to use. The Music function allows you to set the background music. The Effect function allows you to set the effect used when the background changes.

Area

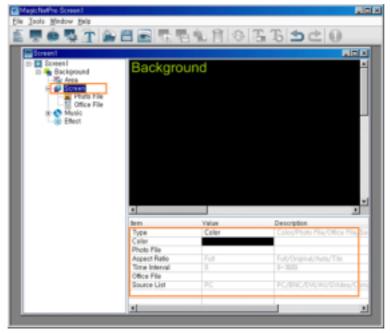

Name: Changes the background name.

You cannot use a name already used for another area name.

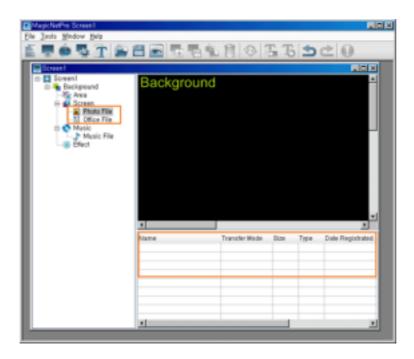

Resolution: Changes the resolution for the background. You can add a new resolution and set the default resolution using the Options menu.

- Start Time, Stop Time, Duration: Sets the playing time of the background in minutes.
 - The playing time of the background changes to that of the screen. It cannot be less than the playing time of the area contained in the background.

Screen

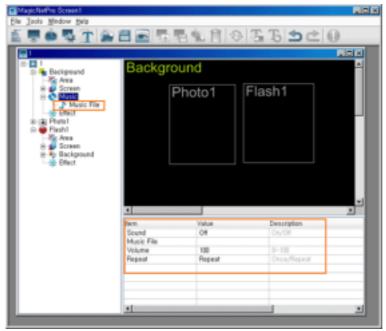

- Type: Sets the type of background (Color, Photo File, Office File, Source List).
 - If Office File or Source List is selected, you cannot create another area.
- $\hfill \Box$ Color: Selects the color to use when the background type is set to Color.
- Photo File: Selects the photo file when the background type is set to Photo File.
- Aspect Ratio: Selects the aspect ratio for the photo file when the background type is set to Photo File.
 - Full: The photo file is enlarged or reduced to fit the entire background.
 - Original: The photo file is displayed at the original size.
 - Auto: The photo file is enlarged or reduced to fit the entire background and keeps the original aspect ratio.
 - Tile: The photo file is tiled continuously across the entire background.
- Time Interval: Sets the slide show time between photo files when the background type is set to Photo File.
- Office File: Selects the office files when the background type is set to Office File.
 - You can create the background using a Power Point, Excel, Word, or PDF file. The office file used is not configured as an area and is just displayed in Full mode in the background. To use an office file, you must install the corresponding viewing program on your product.
 - You can select only one office file..
- Source List: Selects the source when the background type is set to Source List.
 - You can select only one source.
- Photo File / Office File / Music File

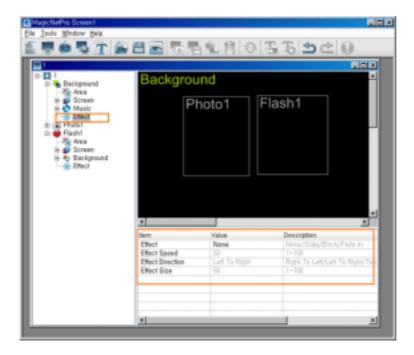

- Changes the detailed properties and transfer mode for the selected file of each type.
 - Transfer Mode: Changes the mode in which the selected file is transferred to the monitor.
 - Download: Downloads the file to the monitor and plays it.
 - Stream: Streams the file to the monitor.
 - Context Menu: Add, Delete, Up, Down: Adds and deletes a file and changes the playing order.

Music

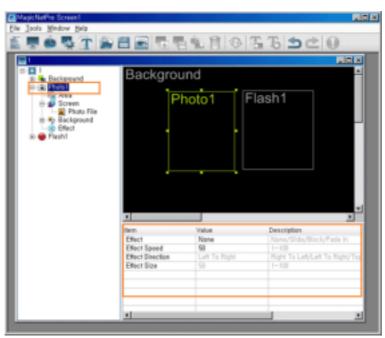

- Sound: Turns the background sound on or off.
- Music File: Selects a music file for the background.
- Volume: Controls the volume of the background music.
- Repeat: A music file can be played repeatedly. When set to Repeat, the music file is played repeatedly while the background is created.

Effect

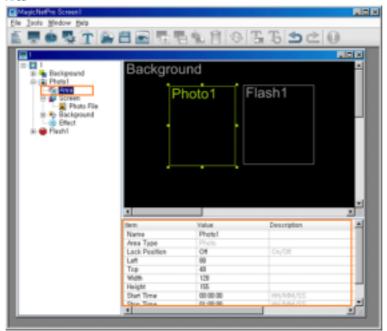

- Effect: Selects the type of effect to be applied when the background is created.
 - None: No effect is used.
 - Slide: The background is created while it is moving.
 - Block: The background is created with blocks.
 - Fade In: The background fades in when it is created.
- Effect Speed: Adjusts the speed of an effect being created.
- Effect Direction: Sets the direction when the Slide effect is selected.
- $\hfill \hfill \hfill$

Photo

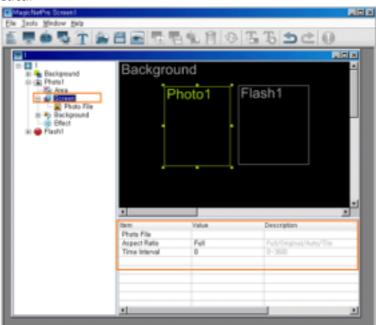

This function is for configuring screens using photo files and consists of the Area, Screen, Background, Effect functions. The Area function allows you to set the position where the photo is displayed and when and for how long it is displayed. The Screen function allows you to select photo files and how to display them. The Background function allows you to set the background image and music when the photo is displayed. The Effect function allows you to set an effect for when the background changes. The following section describes the detailed options used with the Photo function.

Area

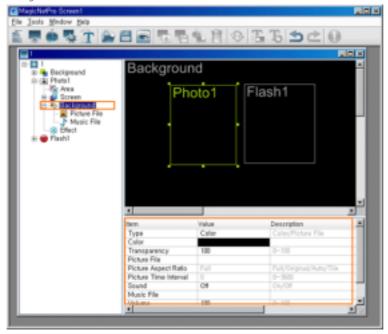

- Name: Changes the area name.
 - You cannot use a name already used for another area name.
- Lock Position: Locks the position of the area.
- Left, Top, Width, Height: Changes the position and size of the area.
 - The area positions must be within the background and the area size cannot be larger than the background size.
- Start Time, Stop Time, Duration: Sets the playing time in seconds.
 - It cannot be longer than the background playing time.

Screen

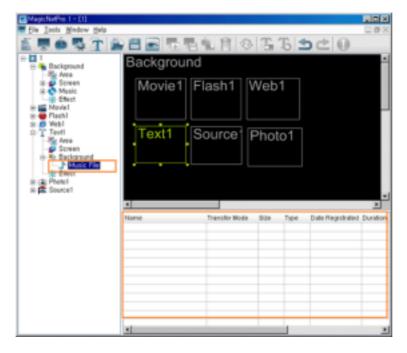

- Photo File: Selects a photo file to play in the Photo area.
- Aspect Ratio: Selects the aspect ratio for the photo files to be played in the Photo area.
 - Full: The photo file is enlarged or reduced to fit the entire background.
 - Original: The photo file is displayed at the original size.
 - Auto: The photo file is enlarged or reduced to fit the entire background and keeps the original aspect ratio.
 - Tile: The photo file is tiled continuously across the entire background.
- Time Interval: Sets the slide show time between selected photo files.

Background

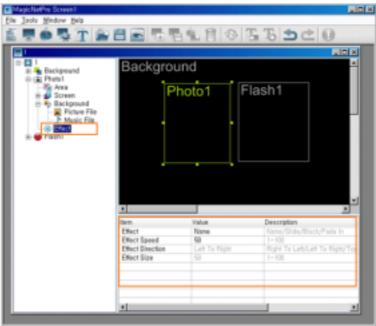

- Type: Sets the background type (Color, Picture File) for the Photo area.
- Color: Selects the color when the background type for the Photo area is set to Color.
- Transparency: Selects the degree of transparency when the background type for the Photo area is set to Color.
 - if the Transparency is set to a value under 100, the area which is placed beneath the present area is shown transparently. However, if a Movie is playing in one of the areas, the transparency doesn't affect the movie area.
- Picture File: Selects the photo file when the background type for the Photo area is set to Picture File.
- Picture Aspect Ratio: Selects the aspect ratio for the photo file when the background type of the Photo area is set to Picture File.
 - Full: The photo file is enlarged or reduced to fit the entire background.
 - Original: The photo file is displayed at the original size.
 - Auto: The photo file is enlarged or reduced to fit the entire background and keeps the original aspect ratio.
 - Tile: The photo file is tiled continuously across the entire background.
- Picture Time Interval: Sets the slide show time between selected photo files when the background type for the Photo area is set to Picture File.
- Sound: Turns the background sound for the Photo area on or off.
- Music File: Selects a music file for the background in the Photo area.
- Volume: Controls the volume for the background music in the Photo area.
- Repeat: A music file can be played repeatedly. When set to Repeat, the music file is played repeatedly while the background for the Photo area is created.
- Photo File / Office File / Music File

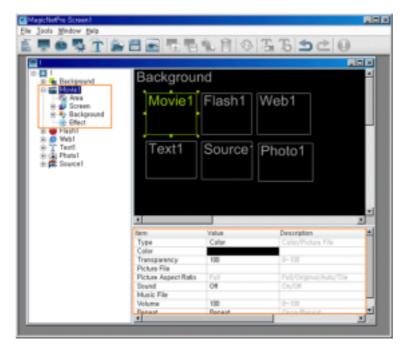

- Large the detailed properties and the transfer mode for the selected file of each type.
 - Transfer Mode: Changes the mode in which the selected file is transferred to the monitor.
 - Download: Downloads the file to the monitor and plays it.
 - Stream: Streams the file to the monitor.
 - Context Menu: Add, Delete, Up, Down: Adds and deletes a file and changes the playing order

Effect

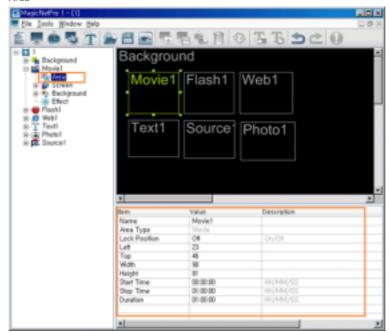

- Effect: Selects the type of effect to be applied when the Photo area is created.
 - $\ensuremath{\circ}$ None: No effect is used.
 - O Slide: The Photo area is created while it is moving.
 - O Block: The Photo area is created with blocks.
 - $\ensuremath{\mathsf{O}}$ Fade In: The Photo Area fades in when it is created.
- Effect Speed: Adjusts the speed of an effect being created.
- Effect Direction: Sets the direction when the Slide effect is selected.
- Effect Size: Sets the size of the blocks when the Block effect is selected.

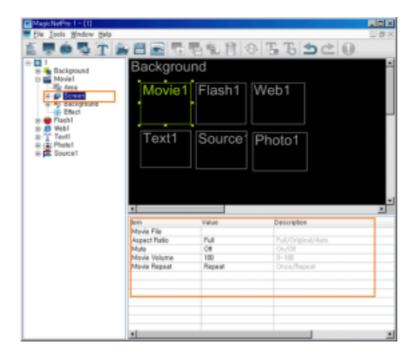

This function is for configuring screens using movie files and consists of Area, Screen, Background, Effect functions. The Area function allows you to set the position where the movie is played and when and for how long it is played. The Screen function allows you to select the movie file and how to play it. The Background function allows you to set the background image and music when the movie is displayed. The Effect function allows you to set an effect for when the background changes.

Area

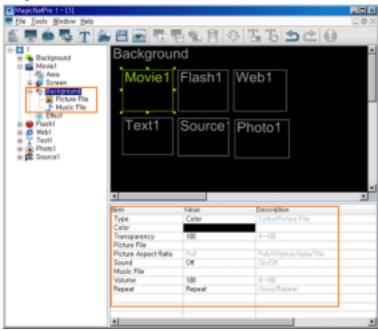

- Name: Changes the area name.
 - You cannot use a name already used for another area name.
- Lock Position: Locks the position of the area.
- Left, Top, Width, Height: Changes the position and size of the area.
 - The area positions must be within the background and the area size cannot be larger than the background size.
- Start Time, Stop Time, Duration: Sets the playing time in seconds.
 - # It cannot be longer than the background playing time.
- Screen

- Movie File: Selects the movie file to be played in the Movie area.
- Aspect Ratio: Selects the aspect ratio for the movie file to be played in the Movie area.
 - Full: The movie file is enlarged or reduced to fit the entire background.
 - Original: The movie file is displayed at the original size.
 - Auto: The movie file is enlarged or reduced to fit the entire background and keeps the original aspect ratio.
- Mute: Mutes the sound of the movie file to be played in the Movie area.
- Movie Volume: Controls the volume of the movie file to be played in the Movie area.
- Movie Repeat: A movie file can be played repeatedly. When set to Repeat, the movie file is played repeatedly while the background is created.

Background

h.

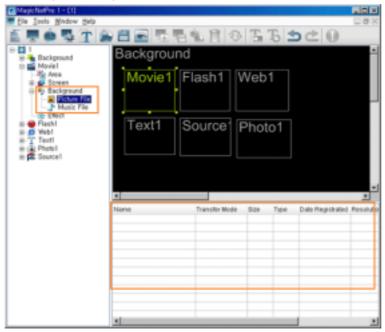

- Type: Sets the background type (Color, Picture File) for the Movie area.
- Color: Selects the color when the background type for the Movie area is set to Color.
- Transparency: Selects the degree of transparency when the background type for the Movie area is set to Color.
 - If the Transparency is set to a value under 100, the area which is placed beneath the present area is shown transparently. However, if a Movie is playing in one of the areas, the transparency doesn't affect the movie area.

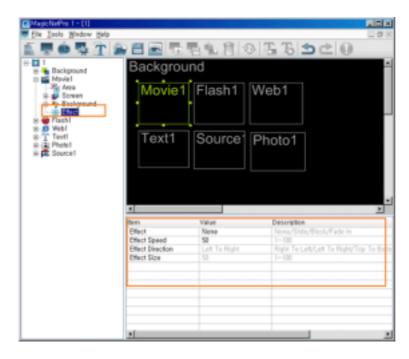

Picture File: Selects the photo file when the background type for the Movie area is set to Picture

File.

- Only one picture file can be selected in the Movie area.
- Picture Aspect Ratio: Selects the aspect ratio for the photo file to be played in the Movie area when the background type of the Movie area is set to Picture File.
 - Full: The photo file is enlarged or reduced to fit the entire background.
 - Original: The photo file is displayed at the original size.
 - Auto: The photo file is enlarged or reduced to fit the entire background, and keeps the original aspect ratio.
 - Tile: The photo file is tiled continuously across the entire background.

- Picture Aspect Ratio: Selects the aspect ratio for the photo file to be played in the Flash area when the background type of the Flash area is set to Picture File.
 - $\bullet\,$ Full: The photo file is enlarged or reduced to fit the entire background.
 - Original: The photo file is displayed at the original size.
 - Auto: The photo file is enlarged or reduced to fit the entire background and keeps the original aspect ratio.
 - Tile: The photo file is tiled continuously across the entire background.
- Picture Time Interval: Sets the slide show time between photo files when the background type for the Flash area is set to Picture File.
- Sound: Turns the background sound for the Flash area on or off.
- Music File: Selects a music file for the background in the Flash area.
- Volume: Controls the volume of the background music in the Flash area.
- Repeat: A music file can be played repeatedly. When set to Repeat, the music file is played repeatedly while the background for the Flash area is created.
- Flash File / Picture File / Music File

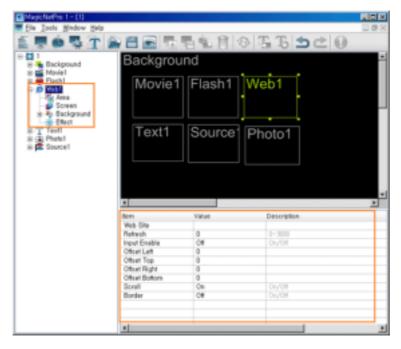

- Changes the detailed properties and the transfer mode for the selected file of each type.
 - Transfer Mode: Changes the mode in which the selected file is transferred to the monitor.
 - Download: Downloads the file to the monitor and plays it.
 - Stream: Streams to the monitor.
 - Context Menu: Add, Delete, Up, Down: Adds and deletes a file and changes the playing order.

Effect

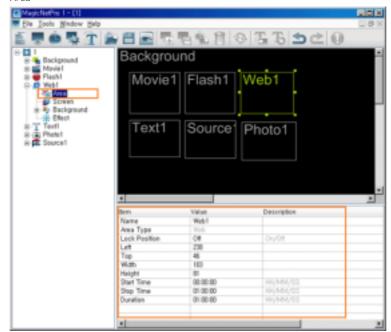

- Effect: Selects the type of effect to be applied when the Flash area is created.
 - O None: No effect is used.
 - O Slide: The Flash area is created while it is moving.
 - O Block: The Flash area is created with blocks.
 - O Fade In: The Flash area fades in when it is created.
- $\bullet\,$ Effect Speed: Adjusts the speed of an effect being created.
- Effect Direction: Sets the direction when the Slide effect is selected.
- Effect Size: Sets the size of the blocks when the Block effect is selected.

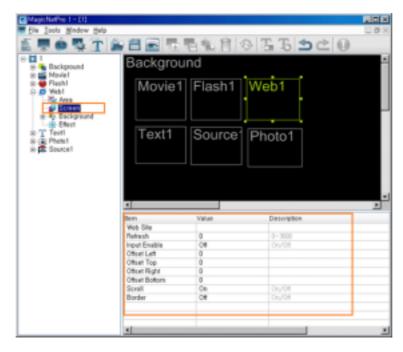

This function is for configuring screens by connecting website files and consists of the Area, Screen, Background and Effect functions. The Area function allows you to set the position of the webpage and when and for how long it is displayed. The Screen function allows you to set the website file to connect to and the location of the web page. The Background function allows you to set the background image and music when the web page is displayed. The Effect function allows you to set the effect for when the background changes.

Area

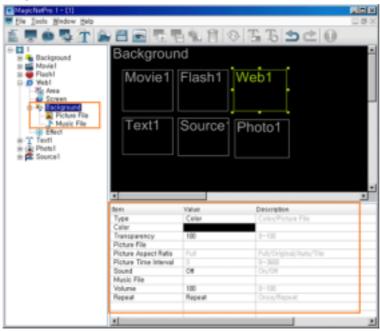

- Name: Changes the area name.
 - You cannot use a name already used for another area name.
- Lock Position: Locks the position of the area.
- Left, Top, Width, Height: Changes the position and size of the area.
 - The area positions must be within the background and the area size cannot be larger than the background size.
- Start Time, Stop Time, Duration: Sets the playing time in seconds.
 - It cannot be longer than the background playing time.
- Screen

- Website: Sets a web page to display in the Web area.
 - Only one URL can be selected in the Web Area.
- Refresh: Sets the refresh time for the URL displayed in the Web area.
- Input Enable: You can input using the mouse in the Web area.
- Offset Left /Top / Right / Bottom: Moves the position of the web page in the Web area.
- Scroll: Turns the scrollbar for web pages on or off.
- Border: Shows or hides the border for web pages in the Web area.

Background

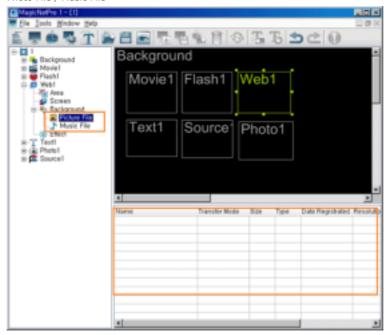

- Type: Sets the background type (Color, Picture File) for the Web area.
- Color: Selects the color when the background type for the Web area is set to Color.
- Transparency: Selects the degree of transparency when the background type for the Web area is set to Color.
 - If the Transparency is set to a value under 100, the area which is placed beneath the present area is shown transparently. However, if a Movie is playing in one of the areas, the transparency doesn't affect the movie area.
- Picture File: Selects the photo file when the background type for the web area is set to Picture File.

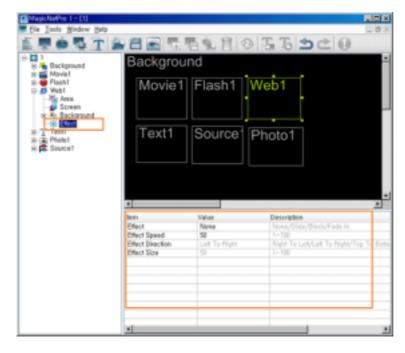

Picture Aspect Ratio: Selects the aspect ratio for the photo file to be played in the web area when the background type of the Web area is set to Picture File.

h.

- Full: The photo file is enlarged or reduced to fit the entire background.
- Original: The photo file is displayed at the original size.
- Auto: The photo file is enlarged or reduced to fit the entire background and keeps the
 original aspect ratio.
- Tile: The photo file is tiled continuously across the entire background.
- Picture Time Interval: Sets the slide show time between photo files when the background type for the Web area is set to Picture File.
- Sound: Turns the background sound for the Web area on or off.
- Music File: Selects a music file for the background in the Web area.
- Volume: Controls the volume of the background music in the Web area.
- Repeat: A music file can be played repeatedly. When set to Repeat, the music file is played repeatedly while the background for the Web area is created.
- Photo File / Music File

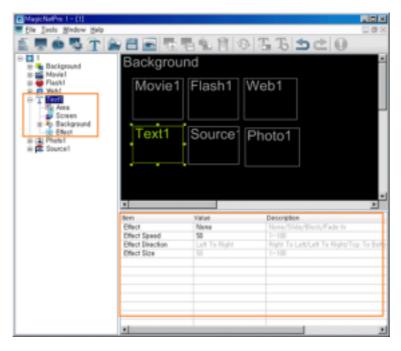

- $\begin{tabular}{lll} \blacksquare & \end{tabular}$ Changes the detailed properties and the transfer mode for the selected file of each type.
 - \bullet Transfer Mode: Changes the mode in which the selected file is transferred to the monitor.
 - Download: Downloads the file to the monitor and plays it.
 - Stream: Streams the file to the monitor.
 - Context Menu: Add, Delete, Up, Down: Adds and deletes a file and changes the playing order.
- Effect

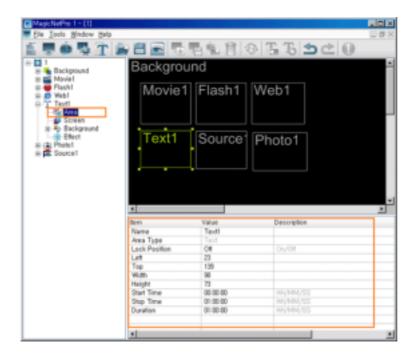

- Effect: Selects the type of effect to be applied when the Web area is created.
 - O None: No effect is used.
 - O Slide: The Web area is created while it is moving.
 - O Block: The Web area is created with blocks.
 - O Fade In: The Web area fades in when it is created.
- Effect Speed: Adjusts the speed of an effect being created.
- Effect Direction: Sets the direction when the Slide effect is selected.
- Effect Size: Sets the size of the blocks when the Block effect is selected.

Text

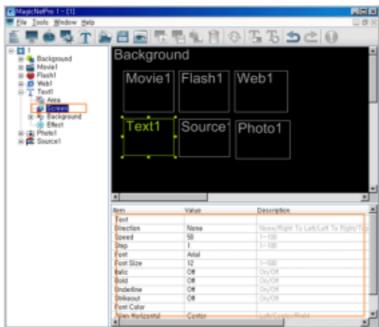

This function is for configuring screens by connecting text and consists of the Area, Screen, Background, Effect functions. The Area function allows you to set the position of the text and when and for how long it is displayed. The Screen function allows you to select the text and how to display it. The Background function allows you to set the background image and music when the text is displayed. The Effect function allows you to set the effect used when the background changes. The following section describes the detailed options used with the Text function.

- Name: Changes the area name.
 - + You cannot use a name already used for another area name.
- Lock Position: Locks the position of the area.
- Left, Top, Width, Height: Changes the position and size of the area.
 - The area positions must be within the background and the area size cannot be larger than the background size.
- Start Time, Stop Time, Duration: Sets the playing time in seconds.
 - It cannot be longer than the background playing time.

Screen

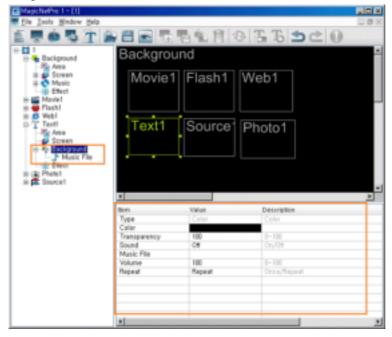

- Text: Sets the text to be displayed in the Text area.
- Direction: Sets the direction of the text flow in the Text area.
 - None
 - Right to Left
 - Left to Right
 - Top to Bottom
 - Bottom to Top Text
- $\hfill \Box$ Speed: Sets the speed of the text flow in the Text area.
- $\hfill \hfill \hfill$
- Font, Font Size, Italic, Bold, Underline, Strikeout, Font Color: Sets the formatting for the text in

the Text area.

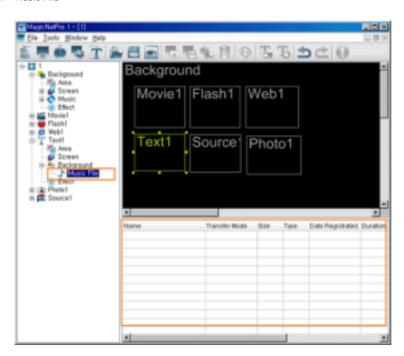

- The font type shows the font of the computer where the server is operating. The same font should be installed in the monitor so that the monitor can display the same font.
- Align Horizontal, Vertical: Aligns the text in the Text area.

Background

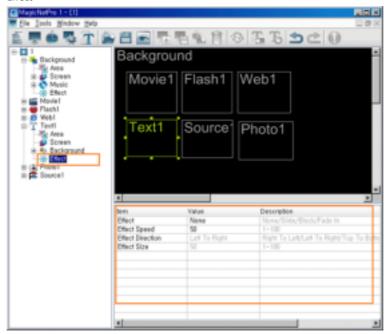

- Type: Sets the background type (Color) for the Text area.
 - You can only select Color for the background type (Color) for the Text area.
- Color: Selects the color to use when the background type for the Text area is set to Color.
- Transparency: Selects the degree of transparency to be used when the background type for the text area is set to Color.
 - If the Transparency is set to a value under 100, the area which is placed beneath the present area is shown transparently. However, if a Movie is playing in one of the areas, the transparency doesn't affect the movie area.
- Sound: Turns the background sound for the Text area on or off.
- Music File: Selects a music file for the background in the Text area.
- Volume: Controls the volume of the background music in the text area.
- Repeat: A music file can be played repeatedly. When set to Repeat, the music file is played repeatedly while the background for the Text area is created.

Music File

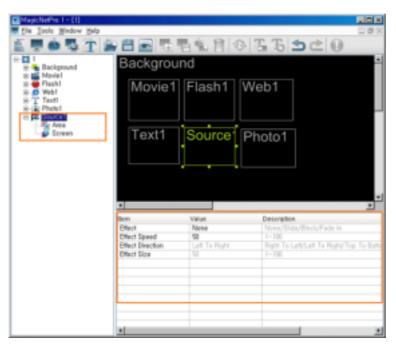

- Changes the detailed properties and the transfer mode for the selected file of each type.
 - Transfer Mode: Changes the mode in which the selected file is transferred to the monitor.
 - Download: Downloads the file to the monitor and plays it.
 - Stream: Streams the file to the monitor.
 - Context Menu: Add, Delete, Up, Down: Adds and deletes a file and changes the playing order.

Effect

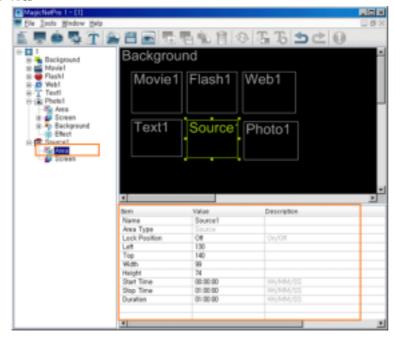

- Effect: Selects the type of effect to be applied when the Text area is created.
 - O None: No effect is used.
 - O Slide: The Text area is created while it is moving.
 - O Block: The Text area is created with blocks.
 - $\ensuremath{\mathsf{O}}$ Fade In: The Text area fades in when it is created.
- Effect Speed: Adjusts the speed of an effect being created.
- Effect Direction: Sets the direction when the Slide effect is selected.
- Effect Size: Sets the size of the blocks when the Block effect is selected.

Source

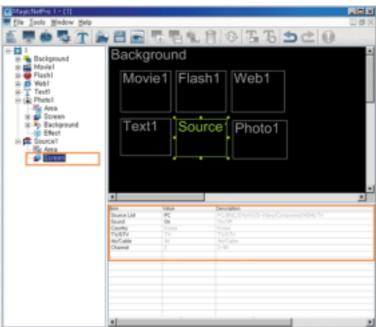

More than one Source Area cannot be played at the same time. Therefore, if the playing time of a source area overlaps, the source area whose playing time ends later is played..

Area

- Name: Changes the area name.
 - 4 You cannot use a name already used for another area name.
- Lock Position: Locks the position of the area.
- $\hfill \hfill \hfill$
 - The area positions must be within the background and the area size cannot be larger than the background size.
- Start Time, Stop Time, Duration: Sets the playing time in seconds.
 - It cannot be longer than the background playing time.

Screen

- Source List: Selects the source to be played in the Source area.
- Sound: Turns the sound for the source you want to play in the Source area on or off.
- TV/DTV: When selecting TV from the TV/External Input list, you can select either Analog TV or Digital TV. When selecting Digital TV, you can enter both the main and sub channels using the channel option. (460TXn Only)
- General Broadcasting/Cable Broadcasting: You can select general or cable broadcasting. (460TXn Only)
- Channel: You can select the channel for the selected TV (460TXn Only)

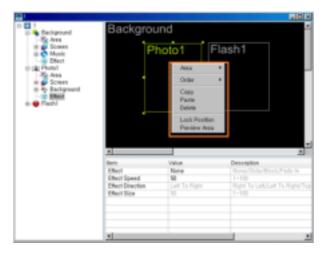

(TV: General broadcasting channel range - 2~69, Cable broadcasting channel range 1, 14~135)

(DTV: Main channel range - 0 to 999, Sub channel range - 0 to 999)

Edit View

This view is used for screen design and allows you to create, move and change the size of an area using your mouse. You can preview the current state by selecting Preview Area from the context menu or double-clicking on an area.

Context Menu

- Area: Selects the type of area you wish to create. You can create an area by dragging and dropping it into the Screen Edit window.
 - More than one Source Area cannot be played at the same time. Therefore, if the playing time of a source area overlaps, the source area whose playing time ends later is played.

(You can add areas for photo, movie, Flash, web, text, and source.)

- Order: Changes the order of the currently selected area.
 - The source area is always at the topmost position. ((Bring to Front, Send to Back, Bring Forward, Send Backward)
- Copy / Paste / Delete: Copies, pastes, and deletes the currently selected area.
- Lock Position: Locks the position for the currently selected area. Once an area is locked, you cannot change its position and size using your mouse.
- Preview Area: Previews the current state of the selected area.
 - You cannot preview the office files for the source and background.

List View

Displays the detailed functions of each property for the areas you selected in Edit View and Tree View. You can change the settings for the detailed functions by double-clicking on the cell that is displayed in the List View or clicking the created button. The changes are immediately applied to and displayed in the area being previewed.

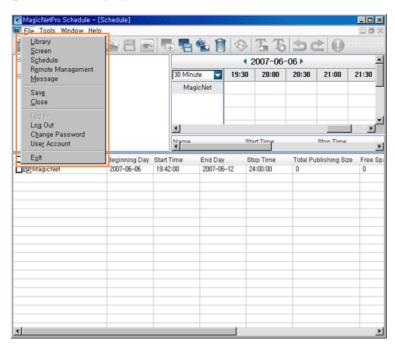

MagicNet Pro

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

Remote Management | Message | Option | Client / Contents | Troubleshooting

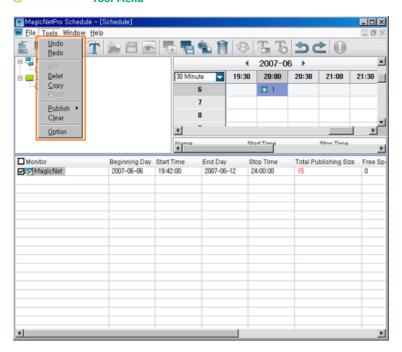

Schedule

••••• File Menu

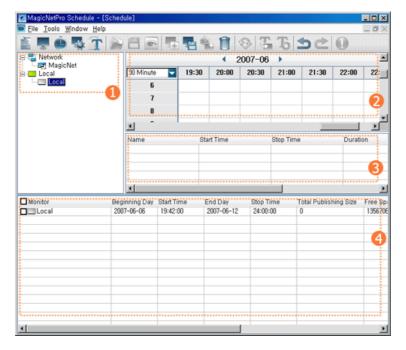

- Library / Screen / Schedule / Remote Management / Message
 - Creates a view or selects a created view for each menu item so that you can perform a screen schedule and performs basic control for the monitors from the server.
- Save
 - Saves all the schedule information currently configured in the EPG view in the database. The saved information is applied when the server restarts.
- Close
 - Closes the schedule view you are working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Log In
 - You must log in to the server before you can use any one of its functions. You can log in to the server to perform a server program. The password you enter when installing MagicNet Pro becomes the password of the Administrator account by default.
- Log Out
 - Once you are logged into the server, you can log out. If you log out from the server, all
 created views are closed and if there are any unsaved changes, a new window is displayed
 so that you can save them.
- Change Password
 - Changes the password of the currently logged-in account.
- User Account
 - Creates, deletes and changes the user accounts able to log into the server. There are two types of accounts that can be created: Administrator and User Accounts
 - o Administrator: Has privileges for all server functions.
 - User: Has privileges for all server functions except for changing server options and user account features.
- Exit
 - Exits the program. If there are any unsaved changes, a new window is displayed so that you
 can save them.

● • • • • • • • • Tool Menu

- Undo / Redo
 - Cancels the previously performed command or performs the canceled command again. You can change the maximum number of commands that you can undo using the Option menu.
- Add
 - Adds the screen you wish to schedule after selecting a monitor and time by clicking in the EPG window.
- Delete
 - Deletes the screen currently selected in the EPG window.
- Copy / Paste
 - Copies the currently selected screen and pastes it after selecting a monitor and time by clicking in the EPG window.
- Publish (Network)
 - Publishes the currently configured schedules to the network monitors checked in the Publish View via the network.
- Publish (Local)
 - Publishes the currently configured schedules to the local monitors checked in the Publish
 View. They are created in the folder named after the monitor name, which is used as the
 local publishing directory. If you copy all the files and subfolders under the folder created in
 the name of the monitor to the root of a USB memory device and connect it to the USB port
 of your computer, the schedules are performed automatically without connecting to the
 network.
 - You can set and change how to run schedules by changing the Local Schedule Option for the monitor. For more information, refer to the help on the monitor setup.
 - You can view and change the local publishing directory in the Schedule tab of the Option. The default is the folder where the server executable exists.
- Clear
 - Stops the publishing which is in progress for a monitor checked in the Publish View and stops the schedule the networked monitor is running.
- Option
 - Changes the server settings. For more information, refer to the Option tab.

Schedule

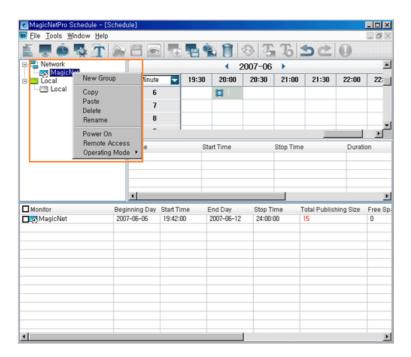

- Tree View
- EPG View
- List View
- Publish View

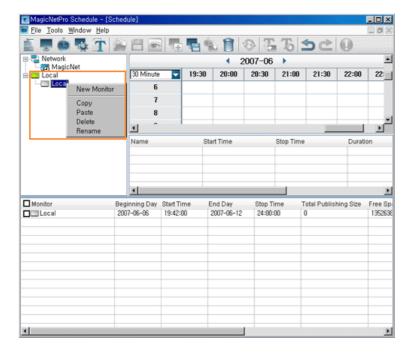

Tree View

Displays the connection state of the monitors currently connected to the server depending on the monitor icon. You can also efficiently manage the monitors by creating network groups. You can move a networked monitor by dragging and dropping it into a group.

- In server is connected to the monitor in Scheduler mode.
- The server is connected to the monitor in an unknown mode.
 The server is not connected to the monitor or the monitor is a local monitor.

- Network: A monitor which is connected to the server over a network.
 - New Group: Creates a new group that can include some networked monitors. You can drag and drop a networked monitor to a group.
 - Copy/Paste: Copies all the schedules configured on the selected monitor to the clipboard and pastes them to another monitor.
 - Rename: Changes the name of a monitor connected to the server.
 - You cannot use a name already used for another monitor.
 - $\hfill \Box$ Delete: Deletes a monitor which is not connected to the server.
 - Power On: Turns the selected monitor on or off.
 - If the server and the monitor are on a private network, the Power On function cannot be operated on that monitor. However, if there is content server operating on the same subnet, the Power On function can be used.
 - Remote Access: Allows you to remotely control a monitor connected to the server via VNC.
 - The Remote Access function can degrade the performance of the server and the monitor.
 - The Remote Access function does not support monitors on a private network. In addition, you cannot watch movies on the monitor which are played in overlay mode.
 - Operating Mode: Changes the mode of a monitor connected to the server (Player / Scheduler).

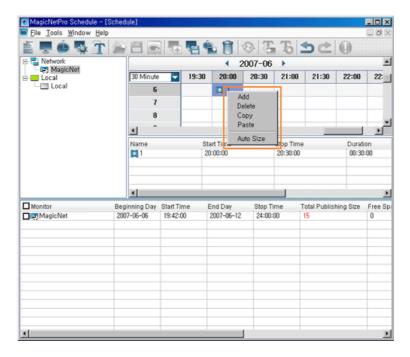

- This is a virtual monitor used to create schedules for a monitor used without being connected to the network. Local publishing can be performed for a local monitor to create schedules for it.
 - New Monitor: Creates a new virtual local monitor.
 - Copy / Paste: Copies the schedules set on the selected monitor and pastes them to another monitor.
 - Rename: Renames the selected monitor.
 - You cannot use a name already used for another monitor.
 - Delete: Deletes the selected monitor.

EPG View

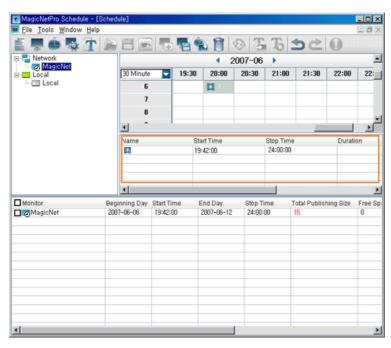

You can edit the schedule by selecting the monitor and time to schedule and register screens. You can move a registered screen by dragging & dropping it and changing the registered time by double-clicking it.

* You can change the screen times using your mouse and by the minimum unit on the time axis. You can change the detailed times in the list view. If you select a monitor group in the tree view, the screen configured for all the monitors is displayed. The screen can be displayed by the day. If you select a monitor in the tree view, the screen for it is displayed. The date can be changed by the months.

- Add: Adds the screen you wish to schedule after selecting a monitor and time by clicking in the EPG window.
- Delete: Deletes the screen currently selected in the EPG window.
- Copy / Paste: Copies the currently selected screen and pastes it after selecting a monitor and time by clicking in the EPG window.
- Auto Size: Changes the currently selected screen in accordance with the time of the background set when editing automatically.
- Time Combo Box: Changes the unit of the time axis to be currently displayed. (1/5/10/30/60/120 Min)

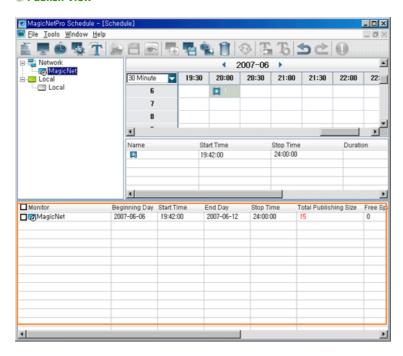

List View

- Sets the detailed items for the selected screen by double-clicking on the screen or by clicking the created buttons.
 - Name: Changes the name of the selected screen. Only the screen name changes and the time information is retained.

- Start Time / Stop Time / Duration: Sets the time information for the selected screen in minutes.
- Periodic: Sets how frequently the selected screen recurs. (None / Daily / Weekly / Monthly)
- End on: Sets an end date for the selected schedule to recur.

Publish View

- Publishes the schedules which are configured by the EPG view and the List view to the checked monitors.
 - Beginning Day/ Start Time / End Day / Stop Time: Sets the time information for the schedules to be published to the monitors. Only the screens within the specified period can be published.
 - Total Publishing Size: Indicates the total size of all the screens within the specified publishing period. This is the total size of the files whose play mode is set to Download in all screens. However, for a local monitor, the size of the files whose play mode is set to Stream is included too.
 - Free Space: Indicates the size of the files the monitor can download while publishing. If the total publishing size is larger than the free size, publishing cannot be performed. However, if you change the Maximum Publishing Size option in the Schedule tab in the Server Option, schedules can be published regardless of the available free size.
 - Status: Displays the publishing progress as a percentage on the slide bar. This is the percentage of the size of the files downloaded to the monitor compared to the total screen (file) size.
 - Result: Displays the publishing results. Double-click the schedule or click this button to view the detailed publishing information.

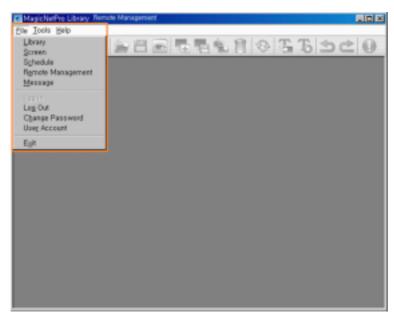

MagicNet Pro Control C

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

Remote Management | Message | Option | Client / Contents | Troubleshooting

Remote Management

● **** File Menu

Library / Screen / Schedule / Remote Management / Message

• Creates a view or selects a created view for each menu item so that you can perform a screen schedule and have basic control over the monitors from the server.

Close

 Closes the screen view you are working in. If there are unsaved changes, a new window is displayed so that you can save them.

Log In

You must log onto the server before you can use any one of its functions. You can log onto
the server to run a server program. The password you enter when installing MagicNet Pro
becomes the password of the Administrator account by default.

Log Out

Once you are logged onto the server, you can log out. If you log out from the server, all
created views are closed and if there are any unsaved changes, a new window is displayed
so that you can save them.

Change Password

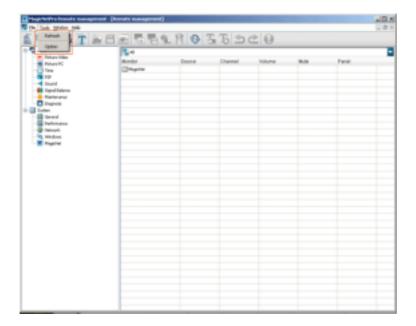

• Changes the password of the currently logged-in account.

User Account

- Creates, deletes and changes the user accounts that can log onto the server. There are two types of accounts that can be created: Administrator and User Accounts.
 - $\ensuremath{\mathsf{O}}$ Administrator : Has privileges for all server functions.
 - O User: Has privileges for all functions except for changing the server options and user account features.

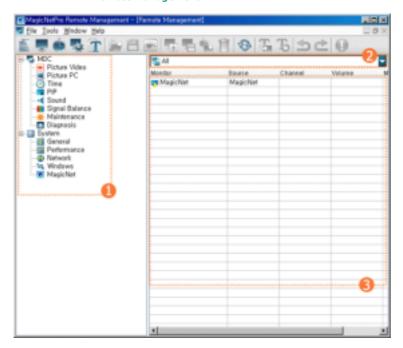

Exit

• Exits the program. If there are any unsaved changes, a new window is displayed in which you can save the changes.

- Refresh
 - $\bullet\,$ Refreshes the value of each client for the currently selected remote control item.
- Option
 - $\bullet\,$ Changes the server settings. For more information, refer to the Options section.

®*********** Remote Management

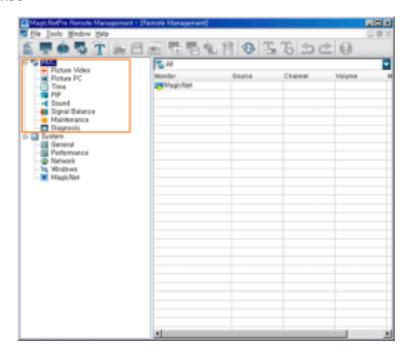

- Tree View
- List View
- Combo View

Tree View

Displays various control items for the client in a tree view. If you select an item, the current state of the selected item is displayed and you can control it in the list view.

MDC

Displays the items for which remote management is required from among the OSD menus of each client monitor in a tree view. If you select an item, the current state of the selected item is displayed and you can control it in the list view.

Detailed Items

- MDC: Displays the current state of the external source, channel, volume, mute and panel which are the basic items for controlling the client. You can control them in the list view.
 - Changing the Channel (460TXn Only)
 - TV Type Selection: The TV Type is determined by selecting either Digital TV or Analog TV at the MDC source. If you select Digital TV in the MDC Source screen and change the channel, a red part is displayed in the Channel Selection screen so that you can change the sub channel too. (460TXn Only)
 - Channel Type Selection: You can select general or cable broadcasting. (460TXn Only)
 - Channel Selection: You can select the channel for the selected TV.(460TXn Only)
 (TV: General broadcasting channel range 2~69, Cable broadcasting channel range 1, 14~135)

(DTV: Main channel - 0 to 999, Sub channel - 0 to 999)

- Picture Video: Displays the current state of the Video mode (AV, S-Video, Component, DVI (HDCP), HDMI). You can control it in the list view.
- Picture PC: Displays the current state of PC mode (PC, BNC, DVI, MagicNet). You can control it in the list view.
- Time: Sets the current time and displays the state of the on and off timers. You can control each item by clicking on it and changing the setting in the list view.

-Current Time

- 1) Hour: Enter the hour.
- 2) Minute: Enter the minutes.
- 3) AM/PM: Enter AM or PM.

-On Timer

Hour: Enter the hour.
 Minute: Enter the minutes.
 AM/PM: Enter AM or PM.

4) Status: Select whether to use the turn-on time.

5) Source: Select the external input6) Volume: Select the volume

-Off Timer

Hour: Enter the hour.
 Minute: Enter the minutes.
 AM/PM: Enter AM or PM.

4) Status: Select whether to use the turn-on time.

PIP: Displays the PIP information. You can control it in the list view.

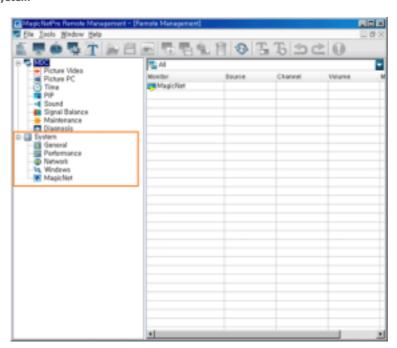

Sound: Displays the current sound state. You can control it in the list view.

Signal Balance: Displays the current signal balance state. You can control it in the list view.

Maintenance: Displays the Lamp Control, Safety Screen, Video Wall, VideoWall Format, and Safety Lock state. You can control them in the list view.

Diagnosis: Displays whether each client is normal or not. You can control the max. internal temperature of each client using the list view.

System

Displays the items required to manage the client in the tree view separately from MDC. If you select an item, the current state of the selected item is displayed and you can control it in the list view.

Detailed Items

- System: Displays the product information for the client in a list view.
- General: Displays general information for the client, such as the computer name and username, etc. in the list view.
- Performance: Displays the current performance information for the client, such as the CPU and network usage in the list view.
- Network: Displays the network information in the list view. You can set the IP address.
- Windows: Displays the information related to the operating system, such as EWF and Rotation, etc. You can control them in the list view
- MagicNet: Displays the status for the MagicNet client. You can control it in a list view.

List View

Displays the detailed functions for each item selected in the Tree View. You can control them by using the context menu and clicking each detailed function. In addition, you can update the current state using Refresh from the Tool menu and in the toolbar.

MDC

Displays the items for which remote management is required from among the OSD menus of each client monitor in a tree view. If you select an item, the current state of the selected item is displayed and you can control it in the list view.

Detailed Items

- MDC: Displays the current state of the External source, channel, volume, mute and panel. You can control each item by clicking on it and changing the setting in the list view.
 - For channels, only when the input source is TV, can you display or control the setting. (Only applicable for monitors that support TV.)
- Picture Video: Displays the current state of the Mode, Contrast, Brightness, Sharpness, Color, Tint, Color Tone, Color Temperature, Size, Digital NR, and Film Mode. You can control each item by clicking it and changing the setting in the list view.
 - This item is only available in video mode (AV, S-Video, Component, DVI(HDCP), HDMI).
 - The Contrast, Brightness, Sharpness, Color, and Tint items are only available in custom mode.
 - The Color Temperature item is only applicable if the Color Tone item is turned off.
 - The Auto Wide option for the Size item is only available in TV mode. (Only applicable for monitors that support TV.)
- Picture PC: Displays the current state of MagicBright, contrast, brightness, color tone, red, green, blue, color temp, and size. You can control each item including Auto Adjustment by clicking it and changing the setting in the list view.
 - $\bullet\,$ This item is only available in PC mode (PC, BNC, DVI, MagicNet).
 - The Contrast and Brightness items are only applicable if MagicBright is in Custom mode.
 - The Red, Green, and Blue items are only applicable if the Color Tone item is set to Custom.
 - $\bullet\,$ Color Temperature is only applicable if the Color Tone item is turned off.
 - To perform Auto Adjustment, click the displayed button.
- Time: Configures the current time and displays the state of the on and off timers. You can control each item by clicking it and changing the setting in the list view.
- PIP: Displays the external input and the size for the PIP. You can control each item including the position of the PIP, and Swap by clicking on it and changing the setting in the list view.
 - The Position and Swap items are write-only. Their existing settings cannot be read. You have to set them directly when needed.
 - Each item is only enabled if the Size item is set to a setting other than Off.
 - You can turn the PIP on by setting the Size item to a setting other than Off.
- Sound: Displays the current state of the Sound Mode, Bass, Treble, Balance, SRS TSXT, and Sound Select. You can control each item by clicking on it and changing the setting in the list view.
 - The Bass, Treble, and Balance items are only applicable if the Sound Mode item is set to Custom.
 - Signal Balance: Displays the information for the Signal Balance On/Off, R Phase, G Phase, B

Phase, Gain, and Sharpness. You can control each item by clicking on it and changing the setting in the list view.

- The R Phase, G Phase, B Phase, Gain, and Sharpness items are only applicable if the Signal Balance item is set to On.
- Maintenance: Displays the state of the Lamp Control, Screensaver, Screen Matrix Display, Screen Settings, and Safety Lock. You can control each item by clicking it and changing the setting in the list view.

Lamp Control

1) Automatic

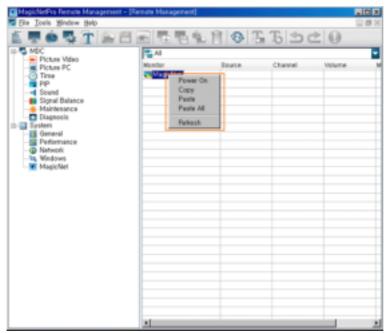

- Hour: Enter the hour to apply the lamp adjustment. (Maximum and minimum values)
- Minute: Enter the minute to apply the lamp adjustment. (Maximum and minimum values)
- $\mbox{AM/PM}$: Select \mbox{AM} or \mbox{PM} to apply the lamp adjustment. (Maximum and minimum values)
- Value : Select the value to apply the lamp adjustment. (Maximum and minimum values)
- 2) Manual Select a value to apply to the lamp by moving the slider.
- Safety Screen

- 1) Interval: Enter the time interval when the screensaver is activated.
- 2) Second: Enter the duration the screensaver will run.
- 3) Type: Enter the type of screensaver.
- Video Wall

- 1) Video Wall: Select whether to activate the video wall.
- 2) Horizontal: Set how many parts the screen is divided into horizontally.
- 3) Vertical: Set how many parts the screen is divided into vertically.
- 4) : Select the area that the monitor will display.
- $\bullet\,$ The Screen Settings only operate when the Screen Matrix Display function is activated.
- Diagnosis: Displays whether the lamp, internal temperature of the client, brightness sensor and fan are normal, and displays the current and maximum temperatures. You can control the maximum temperature by clicking on it and changing the setting.
 - An error is displayed if the maximum temperature is lower than the current temperature.
- Context Menu

- Power On/Off: This item is only enabled when a monitor name is selected and used to turn the client (monitor) on or off.
- Copy: Copies the settings of the selected item.
 - If you select a monitor name and click Copy, all the items displayed in the list are copied.
 - If you select an item and click Copy, only the item is copied.
 - If the setting is not yet displayed or the item has no setting, the item cannot be copied.
 - You cannot copy write-only items.
- Paste: Pastes the copied setting to the monitor.
 - Only available if the copied item is the same as the currently selected item.
 - Only available if the client is turned on.
- Paste All: Pastes the copied settings to all the monitors displayed in the current list.
 - Can only operate when the copied item is the same as the currently selected item.
 - Can only operate when the client turns the power on.
- Refresh: Refreshes the items for the selected monitor.

System

- Displays the items required to manage the system properties of the client in a tree view. You have to set the settings for each item by double-clicking the client or using the Edit item from the context menu, instead of selecting each item and setting a value as in MDC.
- Detailed Items
 - System: Displays the information for the model name, serial number, screen size, firmware version, MagicNet version, and OS image version.
 - General: Displays the specifications and name of the computer and the information for the work group, user, and product key.
 - Performance: Displays the CPU, network, memory, and disk usage.

'n.

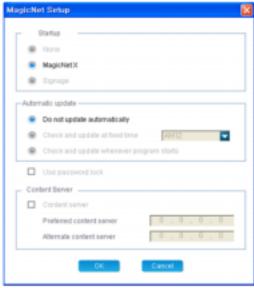

- Network Adapter: Displays the network adapter for the selected client.
- Mac Address: Displays the MAC address of the selected client.
- Select an IP address type.
 - Use the following IP address
- IP Address: Enter the IP address.
- Subnet mask: Enter the subnet mask.
- Default gateway: Enter the address of the default gateway.
- Preferred DNS server: Enter the address of the preferred DNS server.
- Altermate DNS server: Enter the address of the alternate DNS server.
- The Network Adapter and Mac Address items cannot be changed.
- Window: Displays the information for the EWF, screen rotation, screen resolution, and system messages. You can change the settings by double-clicking the monitor name or using the Edit item from the context menu.

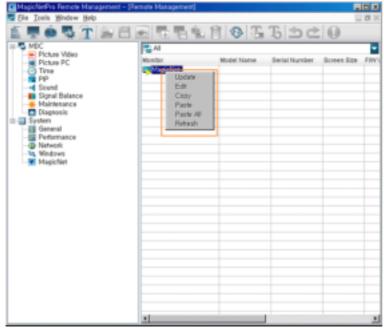

- 1) Current Status: Displays the current EWF status of the selected client.
- 2) EWF command: Changes the EWF status of the selected client.
- 3) Screen Rotation: Selects the screen direction of the selected client.
- 4) Screen Resolution: Displays the resolution of the selected client.
- 5) System message: Selects whether to display a system message for the selected client.
- 6) The Current Status and Screen Resolution items cannot be changed.

lu.

- 1) Startup: Select the program to be performed when the client starts.
- 2) Automatic update: Select how to perform automatic updates.
- 3) Use password lock: Select whether to use the password lock.
- 4) Content Server: Select whether to use the content server.
- 5) Preferred content server: Enter the \mbox{IP} address of the preferred content server to use a content server.
- 6) Alternate content server: Enter the IP address of the alternate content server which will be used when the preferred content server does not operate.

Context Menu

- Update: This item is only enabled if a monitor name is selected. This item compares the client version to the update version on the server and updates the client if required.
- Edit: Displays a window so that you can change the monitor settings.
 - For the System, General, and Performance items, the settings are read-only so they are disabled.
- Copy: Copies the settings of the selected item.
 - If you select a monitor name and click Copy, all the items displayed in the list are copied.
 - If you select an item and click Copy, only the item is copied..
 - If the setting is not yet displayed or the item has no setting, the item cannot be copied.
 - The System, General, Performance, and Network items cannot be copied.
 - The screen resolution item of Windows cannot be copied.
- Paste: Pastes the copied setting to the monitor.
 - $\bullet\,$ Only available if the copied item is the same as the currently selected item.
 - Only available if the client is turned on.
 - Paste All: Pastes the copied settings to all monitors displayed in the list.

- Only available if the copied item is the same as the currently selected item.
 Only applied to clients which are turned on.
- Refresh: Refreshes items for the selected monitor.

Monitor Status

• 📭 : The server is connected to the monitor in Player mode.

The server is connected to the monitor in Player mode.
The server is connected to the monitor in Scheduler mode.
The server is connected to the monitor in an unknown mode.
The server is not connected to the monitor or the monitor is a local monitor.

Combo View

- $\ensuremath{\,\widehat{\oplus}\,}$ Displays all monitor groups except for local monitor groups so you can select a group.
- $\begin{tabular}{ll} \hline & & \\ \hline & & \\$

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

Remote Management | Message | Option | Client / Contents | Troubleshooting

Message

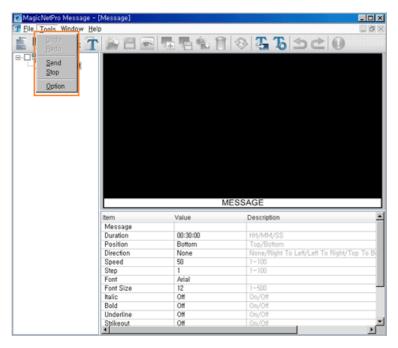

• • • • • • • • File Menu

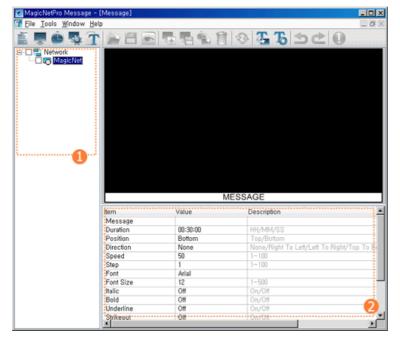

- Library / Screen / Schedule / Remote Management / Message
 - Creates a view or selects a created view for each menu item so that you can run a screen schedule and perform basic control for the monitors from the server.
- New
 - Initializes the message view you are currently working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Open
 - Opens a message file. If there are any unsaved changes, a new window is displayed so that you can save them.
- Save / Save As
 - Saves the changes in the current message file or as a new message file.
- Close
 - Closes the message view you are currently working with. If there are any unsaved changes, a new window is displayed so that you can save them.
- Log In
 - You must log in to the server before you can use any one of its functions. You can log in to the server to perform a server program. The password you enter when installing MagicNet Pro becomes the password of the Administrator account by default.
- Log Out
 - Once you are logged into the server, you can log out. If you log out from the server, all
 created views are closed and if there are any unsaved changes a new window is displayed so
 that you can save them.
- Change Password
 - Changes the password of the currently logged-in account.
- User Account
 - Creates, deletes and changes the user accounts that are able to log into the server. There
 are two types of accounts that can be created: Administrator and User accounts.
 - Administrator: Has privileges for all server functions.
 - User: Has privileges for all server functions except for changing server options and user account features.

• Exits the program. If there are any unsaved changes, a new window is displayed so that you can save them.

⊙ • • • • • • • • Tool Menu

- Undo / Redo
 - Cancels the previously performed command or performs the canceled command again. You can change the maximum number of commands that you can undo using the Option menu.
- Send / Stop
 - Checks the edited message data in a tree view and sends (or stops) them to the selected monitor.
- Option
 - SChanges the server settings. Refer to the Option tab for more information.

Tree View

List View

Tree View

You can select the monitors to which the message is sent by checking the checkbox next to each monitor and group.

List View

Changes the detailed functions for the message to be sent to the monitors by double-clicking it or by clicking the created button.

- Message: Sets a message to be displayed on the monitor.
 - The set message is not applied to the preview window.
- Lagrangian Duration: Selects the time of the message to be displayed on the monitor in minutes.
- lacktriangle Position: Selects the location of the message to be displayed on the monitor. (Top / Bottom)
- Direction: Sets the direction of the message flow on the monitor. (None / Right to Left / Left to Right / Top to Bottom / Bottom to Top Text)
- Speed: Sets the speed of the message flow on the monitor.
- Step: Sets the interval at which the message flows on the monitor.
- Font, Font Size, Italic, Bold, Underline, Strikeout, Font Color: Sets the font formatting for the message to be displayed on the monitor.
 - The font type shows the font of the computer where the server is operating. The same font must be installed on the monitor so that it can display the font.
- Align Horizontal: Aligns the text in the message to be displayed on the monitor.
- Background Color: Selects the background color for the message to be displayed on the monitor.
- Transparency: Selects the degree of transparency to be used for the message to be displayed on the monitor. (On / Off)

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

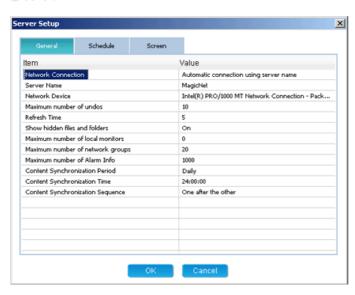

Remote Management | Message | Option | Client / Contents | Troubleshooting

P Option

Option

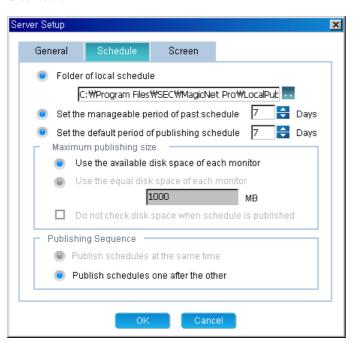

General

- Network Connection: Selects the connection method between the server and the monitor. The server and monitor can be connected to each other only if the same connection method is used.
 - Automatic connection: The monitor automatically connects a server on the same network.
 - Direct connection: The monitor directly connects to the server with the specified IP address.

- If the server and monitor are on a different private network, they cannot connect to each other. However, if the server has a public IP address, a monitor with a private IP address can be connected to it using the direct connection method.
- Server Name: Changes the server name.
 - lacktriangle The server and monitor can connect to each other only if their server names are the same.
- Network Device: Selects the LAN card used in the server.
 - If there are more than one available LAN cards on the PC, a window that allows you to select a LAN card to use when the server starts for the first time.
- Maximum number of undos: Selects the maximum number of previous operations you can cancel
- Refresh Time: Sets the frequency of the server receiving monitor data for updating in Remote Management. When set to 0, the server does not update the monitor data automatically and you have to click Refresh in the tool bar or from the menu to update the monitor data.
- Show hidden files and folders: Shows files with the hidden attribute on the server computer in the library.
- Maximum number of local monitors: Sets the maximum number of virtual local monitors that can be created for publishing the schedule locally.
- Maximum number of network groups: Sets the maximum number of network groups that can be created to manage the networked monitors.
- Maximum number of Alarm Infos: Specify the number of warning messages that can be stored which notify the user of client errors. If more than the specifed number of errors occurs, older messages are deleted.
- Content Synchronization Period: Sets the time interval for synchronization of the content server.
- Content Synchronization Time: Sets a time to synchronize the content server. However, synchronization is performed at the time set on the client.
- Content Synchronization Sequence: Sets the order in which the content is synchronized.

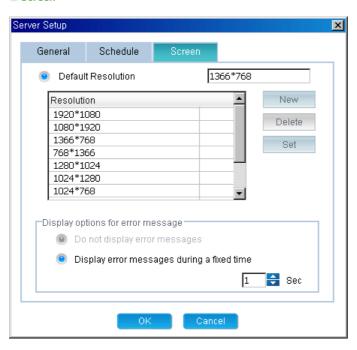

Schedule

- Folder of local schedule: Sets the directory in which local schedules are created using a virtual local monitor. The default value is the folder where the server is installed.
- Set the manageable period of past schedules: Sets the period for schedules for which you can register, save and import screens. When set to 0, you cannot register, save or import the screens before the present time.
- Set the default period of the publishing schedule: Sets the default publishing period for a schedule.
- Maximum publishing size: Sets the option regarding the free space on the monitor for publishing a schedule.
 - Use the available disk space of each monitor: Sets the size to the maximum free disk space of the monitor.

- Use the equal disk space of each monitor: Sets the size to the value entered in the edit hox.
- Do not check disk space when schedule is published: Publishing continues even though the total size of the schedules to be published is larger than that of the free disk space of the monitor.
- Publishing sequence: Specifies the order when publishing is performed for multiple monitors.
 - Publish schedules at the same time: Publishes the schedules to multiple monitors at the
 - Publish schedules one after the other: Publishes the schedules to multiple monitors one by one.

Screen

- Default Resolution: Adds, deletes and sets the default resolution for a newly created screen.
 - New: Adds a new resolution that can be used in a screen. It is added to the list of background resolutions for the screen.
 - Delete: Deletes a created resolution. It is removed from the list of background resolutions for the screen.
 - Set: Sets the selected resolution as the default resolution.
- Display options for error messages: Sets the options for errors that may occur when a screen is previewed.
 - Do not display error messages: When an error occurs, the next preview operation continues without an error message being displayed.
 - Display error messages during a fixed time: When an error occurs, an error message is displayed for a specified period of time and then is automatically hidden after that period.

MagicNet Pro Control Pro Contr

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

Remote Management | Message | Option | Client / Contents Server | Troubleshooting

Contents Server

A program run on the additional PC where the content server is operating.

- Version: The version of the content Server.
- MAC ID: The MAC address of the network device on the PC where the content server is installed. Used when the MagicNet Server checks whether it is registered as the content server.
- Name: The name of the content server configured by the MagicNet Server.

Connection

- Server IP: Enter the IP address of the MagicNet Server you want to connect to. Click the Connect button. The client tries to connect to the MagicNet Server at the specified Server IP address. If the MagicNet Server accepts the connection, the client is successfully connected to the server.
- $\hfill \hfill \hfill$
- Network: Displays the network usage.

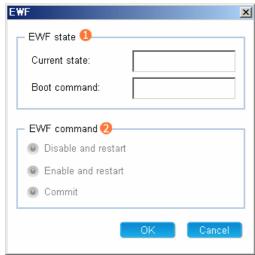

MagicNet Client Configurations

- **Displays** or changes the drive settings.
- **Password** Manages the password.
- Setup
- **[5] Rotation** Rotates the screen with the selected option.
- **6 Program** Runs or exits the program.
- **Texit** Exits mnMain. If you exit mnMain, MagicNet X and the Schedule program are also exited together.

 $\ldots \ldots \ldots \ldots \ldots$

EWF: Displays and changes the Drive settings

- EWF State
 - $\bullet\,$ Current state: Displays the current EWF state.
 - Boot command: Displays the EWF state which will be applied at the next boot-up.
- 2 EWF command
 - Disable and restart: Disables and restarts the EWF.

 The EWF state is actually disabled at the next boot-up.
 - Enable and restart: Enables and restarts the EWF.

 The EWF state is actually enabled at the next boot-up.
 - Commit: Saves the changes in the Enable state.

Password : Manages passwords for existing MagicNet X.

Verifies the password before you enter the Setup screen. If the Use Password lock checkbox is checked, you need to verify your password again when entering the MagicNet X setup menu.

 $\ldots \ldots \ldots \ldots \ldots$

- Old password
 - Enter the existing password.
- New password
 - Enter the new password.
- Change
 - Change the password.
- 4 Use password lock
 - Verifies your password before you enter the Setup screen.

Setup

Connection Tab

- 1 Schedule server
 - Server Connection Settings
 - o The client automatically connects to the server.
 - $\circ\;$ When a connection is disconnected, the client connects to another server automatically.
 - The client connects to the server manually. (Enter the IP address of the server).
- Content server
 - Up to two (2) content servers can be configured.
 - Enter the IP address of the server.
- Name
 - Setting Name

- $\circ\,$ The ID of the server to connect to
- o Client ID

1 Schedule server

- Automatic connection using server name
 - : If the schedule server and client are on the same sub network, the client connects to the servers using their name.
- Reconnecting another server when disconnected
 - : If a connection is disconnected, the client connects to another server on the same sub network automatically.
- Direct connection using IP address
 - : The client connects to the schedule server with the entered $\ensuremath{\mathsf{IP}}$ address.
 - : The client can connect to the schedule server even though they are not on the same network. However, if the server has a private IP address on a private network, the client cannot connect to it. Therefore, the schedule server must be installed with a public IP address on a network.

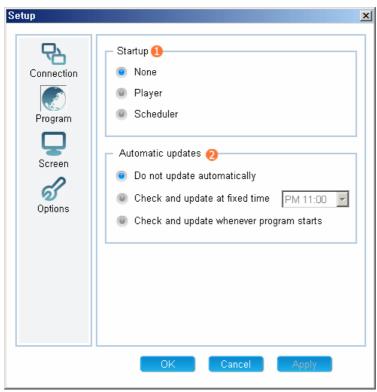

2 Content server

- Connect content servers
 - : Select this option when you want to use separate schedule and content servers.
 - : If you select this option, all the content files are downloaded or streamed from the specified content server and the schedule server performs only the schedules and the remote control function.
- Preferred IP
 - : Enter the IP address of the computer that operates as the primary content server.
- Arternate IP
 - : Enter the IP address of the computer that operates when the primary content server cannot be connected to.

3 Name

- Server
 - : Enter the name of the schedule server that the client connects to.
- Client
 - : Set the name of the monitor to connect to the schedule server.

Program Tab

- Select the program performed when the client starts.
- 2 Automatic updates
 - Select how to perform automatic updates.

1 Startup

- Sets the program to be performed when the client starts.
- You can select one of two programs, or select neither of them.
- Player: Runs a media player program that can be run using the remote control and can receive and play the content that exists on the server. (MagicNet X)
- Runs the program that displays the information. This program displays a screen that is created on the server at the specified time and can be controlled remotely.

2 Automatic update

- Sets the option for updating the client program automatically.
- Do not update automatically: Updating is not performed automatically.
- Check and update at fixed time: Checks the update version at the specified time every day and updates the client if necessary.
- Check and update whenever the program starts: Checks the update version whenever the program starts and updates the client if necessary.

Screen Tab

- 1 Logo screen : the main screen of the Signage Scheduler program.
 - Background: Sets the background color.
 - File: Sets the logo screen. (A flash, photo, and movie file can be set.)
- 2 Schedule folder : Sets the location of the schedule file.
 - Target: Sets the location of the screen design file and content file.
 - Space: Sets the size limit for the files to be downloaded.
- 3 Local Schedule : Sets the local schedule options.
 - Copy and play from a removable disk: Copies the schedule file from a USB device to the FDM and then runs it.
 - Play directly from a removable disk: Runs the schedule file directly from the USB device.

1 Logo screen

• Sets the initial screen of the scheduler or the screen to be displayed between schedules.

- o Background: Sets the background for the entire screen.
- File: Sets the logo screen to be displayed on the background. (A flash, photo, or movie file can be set.)

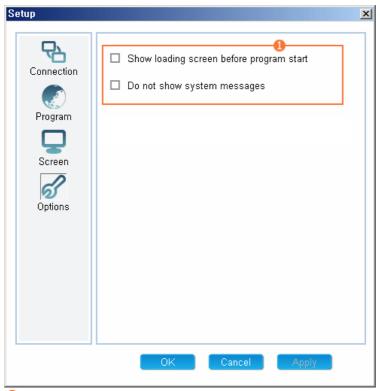

2 Schedule folder

- Sets the directory which the content to be scheduled is downloaded to and managed in and manages the size of the disk.
 - Target: Sets the target directory.
 (You should set a directory on the D: drive or a removable disk, as the C: drive is used for the system.)
 - $\circ\,$ Space: Sets the disk size limit used for the schedule.Between 10% to 90% of the available free space can be set.

3 Local schedule

- Sets the options required when you perform a schedule using a USB device instead of the network.
 - o Copy and Play from a removable disk
 - : Copies the schedule that exists on a USB device to the schedule folder and then plays the copied schedule. You can remove the USB device after copying it.
 - $\hspace{1cm} \circ \hspace{1cm} \text{Play directly from a removable disk} \\$
 - : Plays the schedule that exists on a USB device directly. If you remove the USB device, the schedule exits.

Options Tab

- Other Options
 - Show loading screen before program start: Displays a loading screen from the time after your computer is booted to the time before the main program starts.
 - Do not show system message: Do not show the system messages generated by Windows.

MagicNet Pro

What is MagicNet? | Using MagicNet | Library | Screen | Schedule

Remote Management | Message | Option | Client / Contents | Troubleshooting

F Troubleshooting

? When a monitor is not connected to the server

- Check whether the network environment for the server and monitor is normal..
 (Check the network cable connections and IP address settings, etc)
- Check whether a correct network card has been selected when there is more than one network card in the PC where the server is operating.
 (Use the Network Device item in the Server Option window.)
- Check whether the server names used by the server and monitor are the same.
- Check whether the connection methods used by the server and monitor are the same.
 - (Automatic connection using a server name / Direct connection using an IP address)
- If the connection method is set to Automatic connection using a server name, check whether the server and monitor are on the same subnet.
- If the connection method is set to Direct connection using an IP address, check
 whether the IP address of the server set in the monitor is correct. If the server
 and monitor are on different networks, the IP address of the server must be a
 public IP address.
- Check whether the PC prevents the server from accessing the monitor because of the Windows Firewall.

? When the icon next to the monitor name is amber, and not blue which means 'connected normally'

This occurs when the network connection is normal but the connection between the server and the monitor is abnormal. This may also occur when the monitor is connected to a different server or the network state is abnormal. Check the monitor connections and the network state.

When publishing is not performed successfully

- Check whether the checkbox next to the monitor to which you want to publish to is selected..
- Check whether the monitor to which you want to publish to is connected to the server.
- Check whether the Operating Mode of the monitor to which you want to publish to is set to Scheduler.
- Check whether the monitor has sufficient free disk space.
- Check whether the screen exists within the publishing time.

When publishing is completed even though 100% is not displayed in the Publishing Status.

- The percentage displayed in the Publishing Status is the ratio of the size of the content the monitor has actually downloaded to the total size of all the content which is set to be downloaded on the screen. If 100% is not displayed, it means that the monitor has failed to download the content files. To view the results, double-click the Result cell of the monitor or use the buttons displayed when clicking it. Check whether the file the monitor failed to download actually exists on the server or content server and is correct.
- Check whether StreamServer.exe, which is performed at the same time when the server starts up, is running normally. (Check whether StreamServer.exe is running by viewing its tray icon or looking for its image name in the Processes tab of the Task Manager.) If it is not running, run the server again, or run StreamServer.exe again in the folder with the server's executable files.

When a schedule is not performed normally

- Check whether the schedule has been published successfully.
- Check whether the system times of the server and monitor are the same.

? Password / Log In

The password you enter when installing MagicNet Pro becomes the password of the Administrator account by default.

If you forgot your password, remove and reinstall the program.

? When the monitor update function does not work

Check the monitor version. If it is the latest version, no updating is performed.

? When a movie file is not registered to the library

Check whether the proper codec is installed for the movie file the server wants to register to the monitor. If more than one codec of the same type has been installed or an incomplete codec is installed on the PC, it may cause a problem.

When an area edited on a screen cannot be previewed or the preview function does not work

- Check whether the file you want to preview is corrupt and whether it actually exists.
- You cannot preview an office file or a source.

Removing the Program

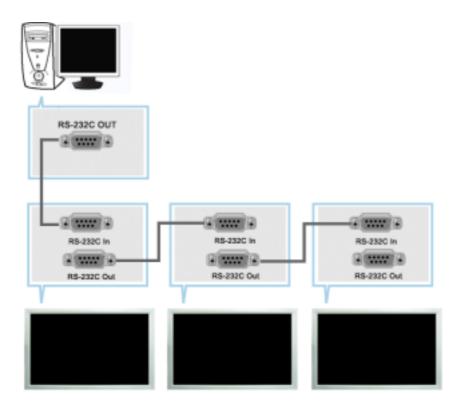

You can remove **MagicNet Pro** using Add/Remove Programs in Windows or using the menu created when installing the program.

Follow these steps to remove MagicNet Pro.

- 1. Click[Start], and then point to [Settings]and click [Control Panel].
- 2. For Windows XP, click [Start] and click [Control Panel].
- 3. Double-click the [Add/Remove Programs] icon in the Control Panel.
- Click MagicNet Pro. Scroll down the [Add/Remove Programs] window until you locate it, if necessary.
- 5. Click [Change/Remove].
- 6. Click "Yes"to remove **MagicNet Pro**.
- 7. Wait until the message that the program has been removed successfully is displayed.

Introduction

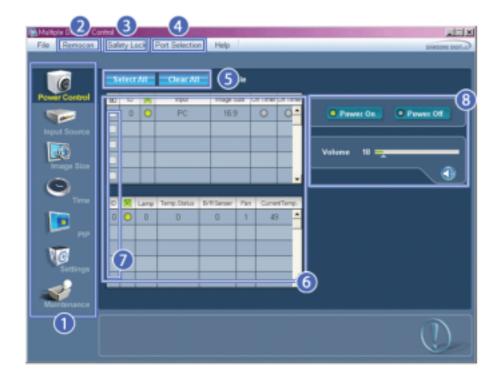

A Multiple Display Control (MDC) is an application allowing various displays to be easily and simultaneously operated on a PC. RS-232C, a standard of serial communication, is used for the communication between a PC and a display. Therefore, a serial cable should be connected between the serial port on a PC and the serial port on a display.

Main Screen

Click Start > Program > Samsung > MDC System to start the program.

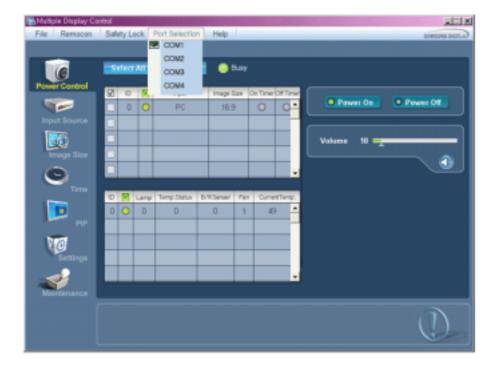

Select a set to see the volume of the selected set within the slider.

- Main Icons
- Remocon
- Safety Lock
- Port Selection

- Select Button
- 📵 Info Grid
- **Display Selection**
- **Ontrol Tools**
- 1. Use the main icons to switch into each screen.
- 2. Allows you to enable or disable the remote control signal receiving function of the display unit.
- Set the Safety Lock function.When setting the Lock function, you can only operate power and lock buttons on the remote control and set.
- 4. The setting for the PC Serial Port can change. The original value is COM1.
- 5. Click Select all or Clear to select or clear all displays.
- 6. Use Grid to view brief information on selected display.
- 7. Select a display from Display Selection.
- 8. Use Control Tools to control displays.
 - <Note> The remote control Enable/Disable function operates whether or not the power is On/Off, and this applies to all displays connected to the MDC. However, regardless of the status at the time the MDC is shut down, the remote control signal receiving function of all displays is initialized to Enable when the MDC is closed.

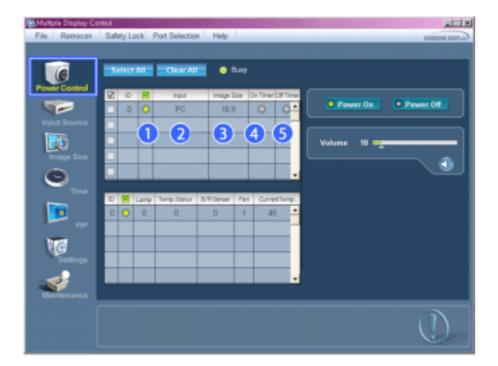

Port Selection

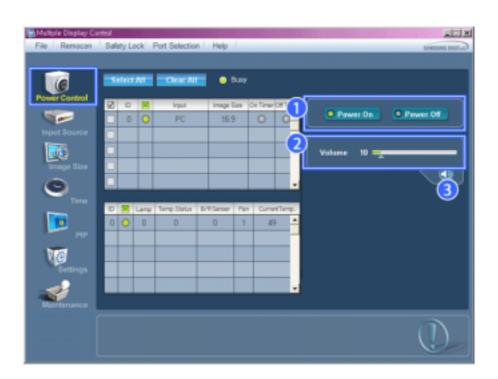

- 1. The Multiple Display Control is originally set to COM1.
- 2. If any port other than COM1 is used, COM1 through COM4 can be selected in the Port Selection Menu.
- 3. If the exact port name that is connected to the LCD Display using a serial cable is not selected, communication will be unavailable.
- 4. The selected port is stored in the program and used for the next program as well.

1. Click Power Control of the main icons and the Power Control screen appears.

- * Info Grid shows some basic information necessary to Power Control.
 - 1) [Ower Status]
 - 2) Input
 - 3) Image Size
 - 4) On Timer
 - 5) Off Timer
- 2. Use the Select All button or Check Box to choose a display to control.

- * Power Control allows controlling some of the functions of the selected display.
- 1) Power On/Off

- Turns the power of the selected display On/Off.

2) Volume

- Controls the volume level of the selected display.
 It receives the volume value of the selected display from the sets and displays it in the slider.
 (When you cancel the selection or choose Select All, the value returns to the default value 10)
- 3) (Mute On/Off)
 - Turns on/off the Mute function of the selected display.

 When selecting one set at a time, turn on the Mute function for the selected set.

 The Mute function is disabled automatically when you adjust the volume level.

 (The values return to the default settings when you undo the selections or choose "Select All".)
- * The Power Control feature is available for all displays.
- ★ The Volume Control and Mute features are available only for the displays whose power status is ON.

Input Source

- Click Input Source of the main icons and the Input Source control screen appears.
 Click Select All or use Check Box to select a display to control.
- TV Mode

• PC Mode

- * Info Grid shows some basic information necessary to Input Source Control.
- 1) PC
 - Changes the Input Source of the selected display to PC.
- 2) BNC
 - Changes the Input Source of the selected display to BNC.
- 3) DV:
 - Changes the Input Source of the selected display to DVI.
- 4) TV
 - Changes the Input Source of the selected display to TV.
- 5) DT\
 - Changes the Input Source of the selected display to DTV.
- 6) AV
 - Changes the Input Source of the selected display to AV.
- 7) S-Video
 - Changes the Input Source of the selected display to S-Video.
- 8) Component
 - Changes the Input Source of the selected display to Component.
- 9) MagicNet
 - The Input source of MagicNet works only on MagicNet model.
- 10) HDMI
 - Changes the Input Source of the selected display to HDMI.
- 11) Channel
 - Channel arrow appears when the Input Source is TV.
- * TV Source can be selected only in products with TV and controlling channels is allowed only when Input Source is TV.
- 🕏 The Input Source Control feature is available only for the displays whose power status is ON.

 - SRS TS XT Sound ON/OFF of the selected display.
- 6) Sound Select
 - Select either Main or Sub when PIP is On.
- * The Input source of MagicNet works only on MagicNet model.
- ***** The Input source of TV works only on TV model.
- This feature is available only for the displays whose power status is ON and if no selection is made, the factory default is displayed.

Image Lock

1. Click Settings of the main icons and the Settings Control screen appears.

- * Info Grid shows some basic information necessary to Settings Control.
- 1) Image Lock
 - Available only for PC, BNC.
- 2) Coarse
 - Adjusts Coarse of the selected display.
- 3) Fine
 - Adjusts Fine of the selected display.
- 4) Position
 - Adjusts Position of the selected display.
- 5) Auto Adjustment
 - Self-Adjust to the incoming PC signal.
- * The Input source of MagicNet works only on MagicNet model.
- * The Input source of TV works only on TV model.
- * Settings Control is available only for the displays for which the power status is ON.

Lamp Control

1. Click on the "Maintenance" icon in the Main Icon column to display the Maintenance screen.

- * An "Info Grid" showing several basic data items appears.
- 1) Maintenance
 - Allows the Maintenance Control function for all input sources.
- 2) Auto Lamp Control
 - Automatically adjusts the backlight of the selected display at a specified time. The Manual Lamp Control automatically turns off if you adjust using the Auto Lamp Control.
- 3) Manual Lamp Control
 - Allows you to adjust the backlight of the selected display regardless of the time.
 The Auto Lamp Control automatically turns off if you adjust using the Manual Lamp Control.
- * The Maintenance Control feature is available only for the displays whose power status is ON.
- ***** The Input source of MagicNet works only on MagicNet model.
- * The Input source of TV works only on TV model.

Scroll

1. Click on the "Maintenance" icon in the Main Icon column to display the Maintenance screen.

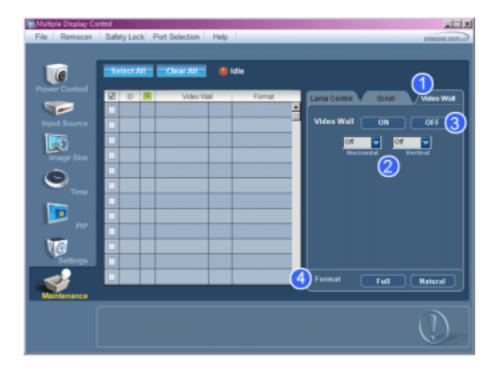

- 1) Safety Screen
 - Eliminates the afterimages that can result when the selected display stays in Pause mode for an extended period of time. You can set the repeat cycle timer by selecting the "Interval" by hour and "Second" by second. It can be set to Scroll, Pixel, Bar and Eraser by Screen Type.
- * The Input source of MagicNet works only on MagicNet model.
- * The Input source of TV works only on TV model.
- Setting Second, you can set to 1, 2, 3, 4, 5 for Scroll Type and to 10, 20, 30, 40, 50 for Pixel, Bar, and Eraser Type.
- * The Maintenance Control feature is available only for the displays whose power status is ON.

Video Wall

1. Click on the "Maintenance" icon in the Main Icon column to display the Maintenance screen.

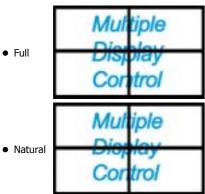

1) Video Wall

- A Video Wall is a set of video screens that are connected together, so that each screen shows a part of the whole picture or so that the same picture is repeated on each screen.
- 2) Video Wall (Screen divider)
 - The screen can be divided into.

You can select a number of screens with a different layout when dividing.

- Select a mode from Screen divider.
- Select a display from Display Selection.
- The place will be set up by pressing a number in the selected mode.
- The MDC program supplied by Samsung supports up to 5x5 LCD Displayes.
- 3) On / Off
 - Turns on/off the Video Wall function of the selected display.
- 4) Format
 - The format can be selected to see a divided screen.

- *You may not operate this function in MagicNet.
- * The Input source of TV works only on TV model.
- * The Maintenance Control function is available only for the displays where the power status is ON.

Troubleshooting

- $1. \ \mbox{The display you wish to control does not appear on the Power Control Info Grid$
 - Check the connection of RS232C. (Check if it is properly connected to the Com1 port)

- Check the displays to see if any of the other displays connected have the same ID. If more than one displays have the same ID, those displays are not properly detected by the program due to data conflict.
- Check if the Display Set ID is a number between 0 and 25. (Adjust using the Display menu)

Note: A Display Set ID must be a value between 0 and 25.

- 2. The display you wish to control does not appear on the other Control Info Grids
 - Check to see if the display power is ON. (You can check this in Power Control Info Grid)
 - Check if you can change the input source of the display.
- 3. The dialogue box appears repeatedly.
 - Check to see if the display you wish to control is selected. If
- 4. Both On Timer and Off Timer have been set but different time is showing.
 - Apply current time to synchronize the display clocks.
- 5. The remote may not function properly when you turn off the remote Function, disconnect the RS-232C cable, or exit the program in an Irregular manner. Rerun the program and turn the remote function again to Restore normal functions.
 - < Note > This program may malfunction due to problems in communication circuits or interference from electronic appliances nearby.

Settings Value Display In Multiple Display Mode

- 🌟 When there are more than one displays connected, the settings values are displayed as follows.
- 1. No selection: Displays the Factory Default Value.
- 2. Selected one display: Fetches and displays the settings value for the selected display.
- 3. Selected one display (ID1) and add another display (ID3): The program, which was displaying the settings value of ID 1, fetches and displays the value of ID3.
- 4. Selected all sets using Select All: Returns to the Factory Default Value.

Source List PASCHM

 $[\mathsf{MENU}] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Use to select PC, BNC, or other external input sources connected to the LCD Display.

Use to select the screen of your choice.

- 1) PC
- 2) BNC
- 3) DVI
- 4) AV
- 5) S-Video
- 6) Component
- 7) HDMI
- 8) MagicNet

[The direct button on the remote control is the 'SOURCE' button.]

☑ Note

- · PIP turns off when the LCD Display is switched to an external source.
- For PC and DVI, this is deactivated if the cable is disconnected.

PIP PASCH

When external AV devices such as VCRs or DVDs are connected to the LCD Display, PIP allows you to watch video from those devices in a small window super-imposed on the PC Video signal. (Off/On)

☑ Note

• More than one PIP cannot be overlapped on screen as BNC and the component use the same terminal.

1) PIP

 $[\mathsf{MENU}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Turns the PIP Screen Off/On.

- Off
- On

[The direct button on the remote control is the 'PIP' button.]

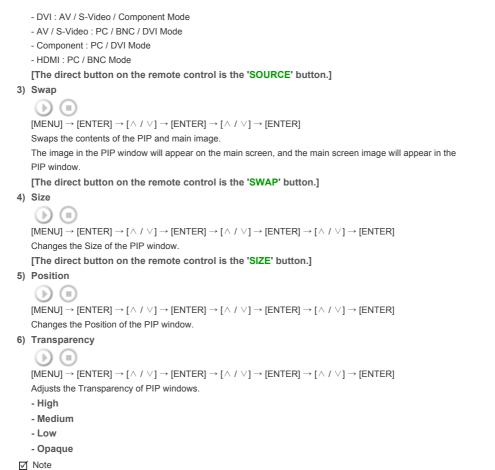

2) Source

 $[\mathsf{MENU}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Selects the input source for the PIP.

- PC : AV / S-Video / Component / HDMI Mode
- BNC : AV / S-Video / HDMI Mode

MagicBright™ PM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

MagicBright™ is a new feature providing the optimum viewing environment depending on the contents of the image you are watching.

Currently four different modes are available: Entertain, Internet, Text and Custom.

Each mode has its own pre-configured brightness value. You can easily select one of the four settings by simply pressing the MagicBright™ control button.

1) Entertain

High brightness

For watching motion pictures such as a DVD or VCD.

2) Internet

Medium brightness

For working with a mixture of images such as the text with graphics added.

3) Text

Normal brightness

For documentations or work involving a lot of text.

4) Custom

Although the values are carefully chosen by our engineers, the pre-configured values may not be comfortable for your eyes depending on your taste.

If this is the case, Adjusts the brightness and contrast by using the OSD menu.

[The direct button on the remote control is the 'M/B' button.]

Custom PM

 $[\mathsf{MENU}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \land [\lessdot \land \lor] \to [\mathsf{ENTER}]$

By using the on-screen menus, the contrast and brightness can be changed to your personal preference.

1) Contrast

Adjusts the Contrast.

2) Brightness

Adjusts the Brightness.

✓ Note

· By adjusting the picture using the Custom function, MagicBright will change to Custom mode.

Color Tone PM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

The color tones can be changed.

- 1) Off
- 2) Cool
- 3) Normal
- 4) Warm
- 5) Custom

(Available in PC, BNC mode only)

ল Note

- If you set the Color Tone to Cool, Normal, Warm, or Custom, the Color Temp function is disabled.
- · If you set the Color Tone to Off, the Color Control function is disabled

Color Control PM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\mathsf{C} \ / \ \gt] \to [\mathsf{ENTER}]$

Adjusts the individual R, G, B color controls.

(Available in PC, BNC mode only)

- 1) Red
- 2) Green
- 3) Blue
- ✓ Note
- If you adjust the picture by using the Color Control function, Color Tone will turn to the Custom mode.

Color Temp PM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [</\!\!\!/ >] \to [\mathsf{ENTER}]$

Color Temp is a measure of the 'warmth' of the image colors.

Brightness Sensor PM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [</>) \to [\mathsf{ENTER}]$

Brightness Sensor is to automatically detect distribution of inputted visual signal and adjust to create optimum brightness.

- 1) On
- 2) Off

Image Lock

Image Lock is used to fine-tune and get the best image by removing noise that creates unstable images with jitters and shakiness. If satisfactory results are not obtained using the Fine adjustment, use the Coarse adjustment and then use Fine again.

(Available in PC, BNC mode only)

1) Coarse

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\mathsf{C} \ / \ \mathsf{P}] \to [\mathsf{ENTER}]$

Removes noise such as vertical stripes. Coarse adjustment may move the screen image area. You may relocate it to the center using the horizontal control menu.

2) Fine

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [</>] \to [\mathsf{ENTER}]$ Removes noise such as horizontal stripes. If the noise persists even after fine tuning, repeat it after adjusting the frequency (clock speed).

3) Position

 $[\mathsf{MENU}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\lessdot \land \lor \lor] \to [\mathsf{ENTER}] \to [\lessdot \land \lor \lor] \to [\mathsf{ENTER}] \to [\lor \lor \lor] \to [\lor \lor] \to [\mathsf{ENTER}] \to [\lor \lor \lor] \to [\lor \lor]$ [ENTER]

Adjusts the screen location horizontally and vertically.

Auto Adjustment

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

The values of Fine, Coarse, Position are adjusted automatically.

By changing the resolution in the control panel, the auto function is performed.

(Available in PC, BNC mode only)

[The direct button on the remote control is the 'AUTO' button.]

Signal Balance

This is used to make up for the weak RGB signal transmitted by a long signal cable.

(Available in PC, BNC mode only)

1) Signal Balance

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$ Selects either On or Off with the signal control.

2) Signal Control

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\lor /$ $[\,\wedge\,\,/\,\,\vee\,] \rightarrow [<\,/\,>] \rightarrow [\mathsf{ENTER}]$

Adjusts the Gain and Sharpness manually.

Size 🗜

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

The Size can be switched.

- 1) 16:9
- 2) 4:3

PIP Picture

 $[\mathsf{MENU}] \to [\land \land \land \lor] \to [\mathsf{ENTER}] \to [\land \lor] \to [\land \lor] \to [\mathsf{ENTER}] \to [\land \lor] \to [\lor \lor] \to$ $\vee\,] \rightarrow [\mathsf{ENTER}] \rightarrow [</>] \rightarrow [\mathsf{ENTER}]$

Adjusts the PIP Screen Settings.

1) Contrast

Adjusts the Contrast of the PIP window on the screen.

2) Brightness

Adjusts the Brightness of the PIP window on the screen.

3) Sharpness

Adjusts the difference between the lightest and darkest areas of the PIP window.

4) Color

Adjusts the Color of the PIP window on the screen.

5) Tint

Adds a natural tone to the PIP window.

You can view a picture from AV, S-Video through the PIP screen in PC, BNC and DVI mode. Operates only if the video signal is NTSC.

By using the on-screen menus, the contrast and brightness can be changed to your personal preference.

1) Contrast

Adds a natural tone to the PIP window.

2) Brightness

Adjusts the Brightness.

3) Sharpness

Adjusts the picture Sharpness.

4) Color

Adjusts the picture Color.

5) Tint

Adds a natural tone to the display.

Operates only for AV and S-Video mode. Operates only if the video signal is NTSC.

Color Tone ASCH (h) (m) $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}]$ The color tones can be changed. The individual Color components are also user adjustable. 1) Off 2) Cool2

- 3) Cool1
- 4) Normal
- 5) Warm1
- 6) Warm2

☑ Note

• If you set the Color Tone to Cool1, Cool2, Normal, Warm1, or Warm2, the Color Temp function is disabled.

Color Temp ASCH

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [</>>] \to [\mathsf{ENTER}]$

Color temp is a measure of the 'warmth' of the image colors. (This function is only enabled if the Color Tone is set to Off.)

Size ASCH

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}]$

The Size can be switched.

- 1) 16:9
- 2) Zoom 1
- 3) Zoom 2
- 4) 4:3

[The ZOOM1, ZOOM2 are not available in 1080i (or over 720p) of Component and HDMI.]

Brightness Sensor ASCH

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [</\!\!\!/ >] \to [\mathsf{ENTER}]$

Brightness Sensor is to automatically detect distribution of inputted visual signal and adjust to create optimum brightness.

- 1) Off
- 2) On

Dynamic Contrast ASCH

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}]$

Dynamic Contrast is to automatically detect distribution of inputted visual signal and adjust to create optimum contrast

- 1) Off
- 2) On

Digital NR (Digital Noise Reduction)

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Turns the Digital Noise Reduction feature Off/On.

The Digital Noise Reduction feature allows you to enjoy clearer and crisper images.

1) Off

Film Mode ASC

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Turns Film Mode Off/On.

The Film Mode feature offers you a theater-quality viewing experience.

i(Not available in HDMI Mode)

- 1) Off
- 2) On

PIP Picture ASCH

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to (\land \ / \ \lor] \to (\land \ / \ \lor] \to (\land \ / \ \lor) \to (\land \ / \ \lor)$ $\rightarrow [\mathsf{ENTER}]$

Adjusts the PIP Screen Settings.

1) Contrast

Adjusts the Contrast of the PIP window on the screen.

2) Brightness

Adjusts the Brightness of the PIP window on the screen.

Available Modes: PIP ON

Sound

Mode PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

The LCD Display has a built-in high fidelity stereo amplifier.

1) Standard

Selects Standard for the standard factory settings.

2) Music

Selects Music when watching music videos or concerts.

3) Movie

Selects Movie when viewing movies.

4) Speech

Selects Speech when watching a show that is mostly dialogue (i.e., news).

Selects Custom if you want to Adjusts the settings according to your personal preferences.

Custom PASCHM

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [</>) \to [\mathsf{ENTER}]$

The sound settings can be adjusted to suit your your personal preferences.

1) Bass

Emphasizes low frequency audio.

2) Treble

Emphasizes high frequency audio.

3) Balance

Allows you to Adjusts the sound balance between the left and right speakers.

[You can hear the sound even when sound value is set to 0.] ☑ Note • If you adjust picture using Sound Custom function, Sound Mode will turn to Custom mode. Auto Volume PASCHM $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}]$ Reduces the difference in volume control between broadcasters. 1) Off 2) On SRS TS XT PASCHM (b) (ll) $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$ SRS TS XT is a patented SRS technology that solves the problem of playing 5.1 multichannel content over two speakers. TruSurround delivers a compelling, virtual surround sound experience through any two-speaker playback system, including internal television speakers. It is fully compatible with all multichannel formats. 1) Off 2) On [The direct button on the remote control is the 'SRS' button.] Sound Select PASCH (b) (a) $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$ Selects either Main or Sub when PIP is On. 1) Main 2) Sub [Available Modes: PIP ON] Setup **Available Modes** PC / BNC / DVI AV S S-Video **C** Component HDMI MagicNet Language PASCHM $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$ You can choose from 11 languages.

☑ Note

• The language chosen affects only the language of the OSD.

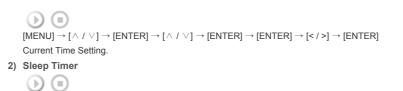

It has no effect on any software running on the computer.

• English, Deutsch, Español, Français, Italiano, Svenska, 日本語, 中国语,Русский, 한국어, Português

Time PASCHM

Selects from one of 4 time settings, Clock Set, Sleep Timer, On Timer, and Off Timer.

1) Clock Set

Turns the LCD Display off automatically at certain times. (Off, 30, 60, 90, 120, 150, 180)

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\lor / \lor] \to [\lor$

Turns the LCD Display on automatically at a preset time.

 $[\mathsf{ENTER}] \mathbin{\rightarrow} [\mathbin{<}\mathbin{/}\mathbin{>}] \mathbin{\rightarrow} [\land \mathbin{/} \lor] \mathbin{\rightarrow} [\mathsf{ENTER}]$

Controls the mode and the volume level at the time the LCD Display turns on automatically.

4) Off Timer

 $[\mathsf{MENU}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\land \lor \lor] \to [\lor \lor \lor] \to [\lor \lor \lor \lor \lor] \to [\lor \lor \lor \lor \lor] \to [\lor \lor \lor \lor \lor] \to [\lor \lor \lor \lor \lor] \to [\lor \lor \lor \lor \lor \lor \lor \lor \lor \to [\lor \lor \lor \lor$ [ENTER]

Turns the LCD Display off automatically at a preset time.

☑ Note

· When selecting Yes for the On Timer or Off Timer when the Clock is not set up, a guiding message pops up: "Set the clock first.".

Menu Transparency PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Changes the opaqueness of the OSD background.

- 1) High
- 2) Medium
- 3) Low
- 4) Opaque

Safety Lock PIN PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [0 \text{--}9] \to [0 \text{--}9] \to [0 \text{--}9]$

The password can be changed.

Energy Saving PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{MENU}]$

This feature adjusts the power consumption of the unit in order to save energy.

- 1) Off
- 2) On
- ☑ Note
- If you want to reduce the standby power consumption, set Energy Saving to On. However, when Energy Saving is On, you cannot use the remote Power On function of the MDC and the WOL (Wake On LAN) function of MagicNet.

HDMI Black Level

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{MENU}]$

When a DVD or set-top box is connected to your TV via HDMI, it may cause a degradation in the screen quality, such as an increase in the black level, a low contrast, or discoloration, etc., depending on the external device connected. In this case, adjust the screen quality of your TV by configuring the HDMI black level.

- 1) Normal
- 2) Low

/ideo Wall PASCH	
------------------	--

A Video Wall is a set of video screens connected together, so that each screen shows a part of the whole picture or where the same picture is repeated on each screen.

When the Video Wall is on, you can adjust the Video Wall screen setting.

1) Video Wall

 $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}]$ Turns Off/On the Video Wall function of the selected display Off/On.

- Off
- On

2) Format

 $[\mathsf{MENU}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}]$

The format can be selected to see a divided screen.

- Full

Provides a full screen without any margins.

Displays a natural image with the original aspect ratio intact

3) Horizontal

 $[\mathsf{MENU}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \lor] \to [\land \lor] \to [\mathsf{ENTER}] \to [\land \lor] \to [\lor \lor] \to$ Sets how many parts the screen should be divided horizontally.

- Five adjustment levels: 1, 2, 3, 4, and 5.

4) Vertical

 $[\mathsf{MENU}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}]$ Sets how many parts the screen should be divided vertically.

- Five adjustment levels: 1, 2, 3, 4, and 5.

5) Screen Divider

 $[\mathsf{MENU}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}] \to [\land \land \lor \lor] \to [\mathsf{ENTER}]$ The screen can be divided into several images.

A number of screens can be selected with a different layout when dividing

- Select a mode in Screen Divider.
- · Select a display in Display Selection.
- · The selection will be set up by pressing a number in the selected mode.

☑ Note

 When Video Wall is running, the PIP, Auto Adjustment, Image Lock, and Size functions are not available. Launching Video Wall while PIP is running, will switch PIP Off. Video Wall does not operate in MagicNet mode

Safety Screen PASCHM

The Safety Screen function is used to prevent afterimages that may appear when a still picture is displayed on the screen over a long time.

- The Screen Scroll function scrolls the screen for the specified period of time.
- This function is not available when the power is turned off.

1) Safety Screen

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Determines whether to turn the Screen Scroll function Off or On.

- Off
- On

2) Interval

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Determines the time interval to run the Screen Scroll operation. (1~10 Hour)

The time is calculated on the basis of the power on time.

By default, the time is set to 10 hours

- 1~10 Hour

3) Second

 $[\mathsf{MENU}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}] \to [\land \land \lor] \to [\mathsf{ENTER}]$

Determines the time period to run the Screen Scroll operation. (1~5 Second)

By default, the time is set to 5 seconds.

- Type-Scroll: 1~5 Second
- Type-Pixel, Bar, Eraser: 10~50 Second

4) Type

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

- You can change the Safety Screen Type.
- Scroll
- Pixel
- Bar
- Eraser

Resolution Select

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

When the picture is not displayed properly on the screen when setting the graphics card resolution of the computer to 1024 x 768 @ 60Hz, 1280 x 768 @ 60Hz, 1360 x 768 @ 60Hz or 1366 x 768 @ 60Hz, by using this function(Resolution Select), you can have the picture displayed on the screen in the specified resolution.

Available in PC/BNC mode only

- 1) Off
- 2) 1024 X 768
- 3) 1280 X 768
- 4) 1360 x 768
- 5) 1366 X 768
- ✓ Note
- Selecting the menu is only allowed when the graphics resolution is set to 1024 x 768 @ 60Hz, 1280 x 768 @ 60Hz, 1360 x 768@ 60Hz or 1366 x768 @ 60Hz.

Lamp Control PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor \] \to [\mathsf{ENTER}] \to [\land \ / \ \lor \] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\mathsf{c} \ / \ \mathsf{c}] \to [\mathsf{ENTER}]$

Adjusts the inverter lamp in order to reduce energy consumption.

✓ Note

This function does not operate when Dynamic Contrast is set to On in AV, S-Video, Component modes

Power On Adjustment PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Adjusts the Power On time for the screen.

*Caution: Set the Power On time to be loger to avoid overvoltage.

FAN PASCHM

 $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}]$

Adjusts the FAN

- 1) Normal
- 2) Pivot
- ✓ Note
- · When pivoting your monitor, make sure to select PIVOT for the FAN.

Reset

The picture parameters are replaced with the factory default values. For the DVI source, the Reset function is only available when PC DVI is being used.

1) Image Reset P

Available in PC/BNC mode only 2) Color Reset PM $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [</>) \to [\mathsf{ENTER}]$ Available in PC/BNC mode only ☑ Note The Reset function is not available when Video Wall is On. **Multi Control Available Modes** PC / BNC / DVI AV S-Video **C** Component HDMI M MagicNet **Multi Control** Assigns an individual ID to the SET. 1) ID Setup (b) (E) $[\mathsf{MENU}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\land \ / \ \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\mathsf{0} \mathsf{\sim} 9]$ Assigns distinctive IDs to the SET. 2) ID Input (b) (iii) $[\mathsf{MENU}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\land / \lor] \to [\mathsf{ENTER}] \to [\mathsf{ENTER}] \to [\mathsf{0}\text{-}\mathsf{9}]$ Use to select the transmitter functions of the individual SET. Only a SET where the ID corresponds to the transmitter setting becomes activated. **Direct Functions Available Modes** PC / BNC / DVI AV S-Video **C** Component HDMI M MagicNet MAGICNET PASCHM Moves to the MagicNet OSD screen. MDC PASCHM (b) (m) Moves to the Multi Control OSD screen. LOCK PASCHM Sets the Safety Lock function. 1) Lock On (b) (II) It will be locked 2) Lock Off

It will be unlocked.

✓ Note

and set.

The preset password on the LCD Display is "0000".

☑ Note

Resetting the password for the function key lock.
 Press MUTE → 1 → 8 → 6 → On. The password will be reset to '0000'. The remote control is required for resetting the password.

The color and appearance of the product may vary depending on the model, and the product specifications are subject to change without prior notice for reasons of performance enhancement.

Troubleshooting

Self-Test Feature Check

☑ Note

Check the following items yourself before calling for assistance. Contact a Service Center for problems that
you cannot solve by yourself.

> Self-Test Feature Check

Your LCD Display provides a self test feature that allows you to check whether your LCD Display is functioning properly.

- 1) Turn off both your computer and the LCD Display.
- 2) Unplug the video cable from the back of the computer.
- Turn on the LCD Display.

The figure shown below ("Check Signal Cable") appears on a black background when the LCD Display is working normally even though no video signal is detected: While in the Self-Test mode, the LED power indicator remains green and the figure moves around on the screen.

 Turn off your LCD Display and reconnect the video cable; then turn on both your computer and the LCD Display

If your LCD Display screen remains blank after using the previous procedure, check your video controller and computer system; your LCD Display is functioning properly.

> Not Optimum Mode

You can even view the screen at a resolution of 1920×1080 . However, you will receive the following message for a minute; You can choose to change the screen resolution or stay in the current mode during that time. And if the resolution is more than 85Hz, you will see the black screen because the LCD Display does not support over 85Hz.

Not Optimum Mode

Recommended Mode 1920 x 1080 60Hz

☑ Note

 Refer to Specifications > Preset Timing Modes for the resolutions or frequencies supported by the LCD Display.

> Maintenance and Cleaning

Maintaining the LCD Display Case.
 Clean with a soft cloth after disconnecting the power cord.

- Do not use benzene, thinner or other flammable substances, or a
 wet cloth
- We recommend that a Samsung cleansing agent is used to prevent damage to the screen.
- Maintaining the Flat Panel Display Screen.
 Clean with a soft cloth (cotton flannel) smoothly.

- Never use acetone, benzene or thinner.
 (They may cause flaws or deformation of the screen surface.)
- The user will be required to pay costs and related expenses for repairing damages caused.

> Symptoms and Recommended Actions

☑ Note

- A LCD Display recreates visual signals received from the computer. Therefore, if there is a problem with
 the computer or the video card, this can cause the LCD Display to become blank, have poor coloring,
 become noisy, and video mode not supported, etc. In this case, first check the source of the problem, and
 then contact a Service Center or your dealer.
- 1) Check if the power cord and the video cables are properly connected to the computer.
- Check if the computer beeps more than 3 times when booting.
 (If it does, request an a service for the main board of the computer.)
- 3) If you installed a new video card or if you assembled the PC, check if you installed the Adaptor(video).
- Check if the scanning ratio of the video screen is set to between 50 Hz ~ 85 Hz.
 (Do not exceed 60Hz when using the maximum resolution.)
- 5) If you have problems in installing the Adaptor (video) driver, boot the computer in Safe Mode, remove the Display Adaptor in the "Control Panel, System, Device Administrator" and then reboot the computer to reinstall the Adaptor (video) driver.

Check List

☑ Note

- The following table lists possible problems and their solutions. Before calling for assistance, check the
 information in this section to see if you can remedy any problems for yourself. If you do need assistance,
 please call the phone number on the Information section or contact your dealer.
- For more network-related information, refer to the MagicNet Troubleshooting section.

> Problems related to the Installation (PC Mode)

☑ Note

· Problems related to the LCD Display installation and their solutions are listed.

Problems Solutions

• Check if the signal cable between the computer and the LCD

> Problems related to the Screen

☑ Note

Problems related to the LCD Display screen and their solutions are listed.

Problems	Solutions
The screen is blank and the power indicator is off.	 Ensure that the power cord is firmly connected and the LCD LCD Display is on. (Refer to the Connecting the LCD Display)
"Check Signal Cable" message.	 Ensure that the signal cable is firmly connected to the PC or video sources. (Refer to the Connecting the LCD Display) Ensure that the PC or video sources are turned on.
"Not Optimum Mode " message.	 Check the maximum resolution and the frequency of the video Adaptor. Compare these values with the data in the Preset Timing Modes Chart.
The picture rolls vertically.	 Check if the signal cable is securely connected. Re-connect it, if necessary. (Refer to Connecting a Computer)
The image is not clear; picture is blurred.	 Run Frequency Coarse and Fine tuning. Turn on again after removing all accessories (video extension cable, etc.) Set the resolution and frequency to the recommended ranges.
The picture image is unstable and shakes. Ghost images are shown in the picture.	 Check if the resolution and frequency set for the computer video card falls in the range supported by the LCD Display. If not, reset them referring to the current Information under the LCD Display menu and Preset Timing Modes.
The image is too light or too dark.	 Adjusts the brightness and contrast. (Refer to the Brightness, Contrast)
The screen color is inconsistent.	
The color image is distorted by dark shadows.	Adjust color using Custom under OSD Color Adjustment menu.
The color white is poor.	

The power Indicator blinks green.

 The LCD Display is currently saving the changes made to the settings to the OSD memory.

The screen is blank and the power indicator light is steady green or blinks every 0.5 or 1 seconds.

- The LCD Display is using its power management system.
- Press a key on the keyboard.

The screen is blank and it is blinking.

If you see the "TEST GOOD" message on the screen when you
pressing the MENU button, check the cable connection between
the LCD Display and the computer to ensure that the connector
is properly connected.

> Problems related to Audio

· Problems related to audio signals and their solutions are listed below. **Problems** Solutions No sound. • Ensure that the audio cable is firmly connected to both the audio-in port on your LCD Display and the audio-out port on your sound card. (Refer to the Connecting the LCD Display) Check the volume level. The sound level is too low. · Check the volume level. • If the volume is still too low after turning the control to its maximum, check the volume control on the computer sound card or software program. The sound is too high or too low. Adjusts the Treble and Bass to the appropriate levels. > Problems related to the Remote Control ☑ Note · Problems related to the remote control and their solutions are listed **Problems** Solutions The remote control buttons do not • Check the polarities (+/-) of the batteries. • Check if the batteries are empty. respond. • Check if the power is on. • Check if the power cord is securely connected. • Check if a special fluorescent or neon lamp is on in the vicinity.

Making a Bootable USB Flash Disk.

Problems

Solutions

Making a Bootable USB Flash Disk

- You can turn a common 512-MB or bigger USB storage media into a bootable disk using a USB bootable disk creation tool. (For example, the HP USB Disk Storage Format Tool)
- 2. Copies the OS ghost image and executables to your USB disk.
- Enter the BIOS menu of your set by pressing the F2 key in the BIOS logo screen. Then, enable the USB Boot First option by selecting that option and pressing the Enter key in the Boot menu.
- Switch your set on while your USB disk is connected and boot up in DOS mode.
- Run C:\ghost.exe and choose Local → Partition → From Image from the menu. Choose the ghost image to update your USB disk with and choose the target disk.
- When the ghost image update finishes, the set will be rebooted automatically.

Q & A

Question Answer

How can I change the frequency?

The frequency can be changed by reconfiguring the video card.

Note that video card support can vary, depending on the version of the driver used. (Refer to the computer or the video card manual for details.)

How can I Adjusts the resolution?

Windows XP:

Set the resolution in the Control Panel \to Appearance and Themes \to Display \to Settings.

• Windows ME/2000:

Set the resolution in the Control Panel \to Display \to Settings. * Contact the video card manufacturer for details.

How can I set the Power Saving function?

Windows XP:

Set the resolution in the Control Panel \rightarrow Appearance and Themes \rightarrow Display \rightarrow Screen Saver. Set the function in the BIOS-SETUP of the computer. (Refer to the Windows / Computer Manual).

• Windows ME/2000:

Set the resolution at the Control Panel \rightarrow Display \rightarrow Screen Saver

Set the function in the BIOS-SETUP of the computer. (Refer to the Windows / Computer Manual).

How can I clean the outer case/LCD Panel?

Disconnect the power cord and then clean the LCD Display with a soft cloth, using either a cleaning solution or plain water.

Do not leave any detergent or scratches on the case. Do not let any water enter the LCD Display.

How can I play the video?

The video supports the MPEG1 and WMV codecs only. Install the corresponding codec to play the video. Note that some of the codecs can be incompatible.

Specifications

General

General

General

Model Name SyncMaster 570DXn

LCD Panel

Size 57 " Diagonal (143 cm)

Display area 1251.36 mm (H) x 703.89 mm (V)
Pixel Pitch 0.651 mm (H) x 0.651 mm (V)

Synchronization

Horizontal $30 \sim 81 \text{ kHz}$ Vertical $56 \sim 85 \text{ Hz}$

Display Color

Display Color 16.7 M

Resolution

Optimum resolution 1920 x 1080 @ 60 Hz

Maximum resolution 1920 x 1080 @ 60 Hz

Input Signal, Terminated

RGB Analog, DVI Compliant Digital RGB

0.7 Vp-p ± 5 %

TTL level (V high \geq 2.0 V, V low \leq 0.8 V)

Maximum Pixel Clock

165 MHz (Analog, Digital)

Power Supply

AC 100 - 240 V~ (+/- 10 %), 50/60 Hz

Signal Cable

15pin to 15pin D-sub cable, Detachable

DVI-D to DVI-D connector, Detachable (Sold separately)

Dimensions (WxHxD)/ Weight

1567.5 x 855 x 311 mm / 61.7 x 33.7 x 12.2 inch (With Speaker & With Stand)

1347.5 x 800 x 130 mm / 53.0 x 31.5 x 5.1 inch (Without Speaker)

1347.5 x 855 x 311 mm / 53.0 x 33.7 x 12.2 inch, 48.3 kg / 106.4 lbs(With Stand)

VESA Mounting Interface

400 mm x 800 mm

Storage

Environmental considerations

Operating Temperature: 50°F ~ 104°F (10°C ~ 40°C)

Humidity: 10 % ~ 80 %, non-condensing

Temperature: $-4^{\circ}F \sim 113^{\circ}F (-20^{\circ}C \sim 45^{\circ}C)$

Humidity: 5 % ~ 95 %, non-condensing

Audio Characteristics

Audio Input 1 RCA Jack Red(R) White(L), 0.5 Vrms (-9 dB)

Audio Input 2 RCA Jack Red(R) White(L), 0.5 Vrms (-9 dB)

PC Audio Input $3.5 \, \text{Ø}$ Stereo Jack, $0.5 \, \text{Vrms}$ (-9 dB) Frequency RF: 80 Hz \sim 15 kHz (at -3 dB) Response A/V: 80 Hz \sim 20 kHz (at -3 dB)

Plug and Play Capability

This monitor can be installed on any Plug & Play compatible system. The interaction of the monitor and the computer systems will provide the best operating conditions and monitor settings. In most cases, the monitor installation will proceed automatically, unless the user wishes to select alternate settings.

Dot Acceptable

TFT LCD panels manufactured by using advanced semiconductor technology with precision of 1ppm (one millionth) above are used for this product. But the pixels of RED, GREEN, BLUE and WHITE color appear to be bright sometimes or some black pixels may be seen. This is not from bad quality and you can use it without any problelms.

• For example, the number of TFT LCD sub pixels contained in this product are 6,220,800.

✓ Note

• Design and specifications are subject to change without prior notice.

$\ensuremath{ \square}$ Class B Equipment (Information Communication equipment for residential use)

This product complies with the Electromagnetic Compatibility Directives for residential use and can be
used in all areas including common residential areas. (Class B equipment emits less electromagnetic
waves than Class A equipment.)

PowerSaver

This monitor has a built-in power management system called PowerSaver. This system saves energy by switching your monitor to low-power mode when it has not been used for a certain amount of time. The monitor automatically returns to normal operation when you press a key on the keyboard. For energy conservation, turn your monitor OFF when it is not needed, or when leaving it unattended for long periods. The PowerSaver system

operates with a VESA DPM compliant video card installed in your computer. Use the software utility installed on your computer to set up this feature.

PowerSaver

State	Normal Operation	Power saving mode	Power off
Power Indicator	Green	Green, Blinking	Amber
Dower Consumption	Less than	Less than 1 W	Less than 1 W
Power Consumption	460 W	(Off-mode)	(Power button)

Preset Timing Modes

> Preset Timing Modes

If the signal transferred from the computer is the same as the following Preset Timing Modes, the screen will be adjusted automatically. However, if the signal differs, the screen may go blank while the power LED is on. Refer to the video card manual and Adjusts the screen as follows.

Display Mode	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (H/V)

Horizontal Frequency

The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle and the inverse number of the Horizontal Cycle is called the Horizontal Frequency. Unit: kHz

Vertical Frequency

Like a fluorescent lamp, the screen has to repeat the same image many times per second to display an image to the user. The frequency of this repetition is called the Vertical Frequency or Refresh Rate. Unit: Hz

The color and appearance of the product may vary depending on the model, and the product specifications are subject to change without prior notice for reasons of performance enhancement.

Information

For Better Display

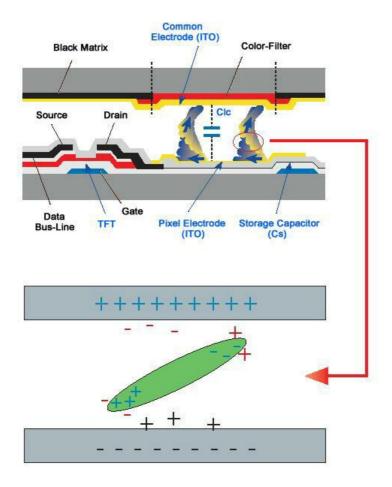

- Adjust the computer resolution and screen inection rate (refresh rate) on the computer as described below to enjoy the best picture quality. You can have an uneven picture quality on screen if the best picture quality is not provided for TFT-LCD.
 - Resolution: 1920 x 1080
 - · Vertical frequency (refresh rate): 60 Hz
- TFT LCD panels manufactured by using advanced semiconductor technology with a precision of 1ppm (one millionth) and above is used for this product. But the pixels of RED, GREEN, BLUE and WHITE color seem to be bright sometimes or some of black pixels could be seen. This is not from bad quality and you can use it without any problems.
 - For example, the number of TFT LCD sub pixels contained in this product are 6,220,800.
- When cleaning the monitor and the panel outside, please apply the recommended small amount of cleaner by using a soft cloth to polish. Do not force the LCD area but rub softly.
 If excessive force is applied, you may stain it.
- If you are not satisfied with the picture quality, you can get better quality of picture by performing the "auto adjustment function" in display screen that is appeared as window termination button is pressed.
 If there's still noise after the automatic adjustment, use the FINE/COARSE adjustment function.
- When viewing a fixed screen for an extended period of time, a residual image or blurriness may appear. Change the mode to energy save or set a screensaver to move the picture when you need to be away from the LCD Display for an extended period of time.

PRODUCT INFORMATION (Image Retention Free)

What is Image Retention ?

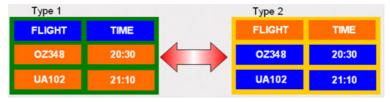

Image retention may not occur when a LCD panel is operated under normal conditions.

Normal conditions are defined as continuously changing video patterns. When the LCD panel is operated for a long time with a fixed pattern (over 12 hours), there may be slight difference in voltage between electrodes that work the liquid crystal (LC) in a pixel. The voltage difference between electrodes increases with time, forcing the liquid crystal to lean. When this occurs, the previous image may be seen when the pattern is changed. To prevent this, the accumulated voltage difference must be decreased.

O Power Off, Screen Saver, or Power Save Mode

- Turn the power off for 4 hours after 20 hours in use
- Turn the power off for 2 hours after 12 hours in use
- Set the Monitor to power off with the PC Display Properties Power Scheme.
- $\bullet \ \ \text{Use a Screen saver if possible Screen saver in one color or a moving image is recommended}.$
- Change the Color Information periodically

☑ Note

- Use Two different colors
 Rotate the Color Information with 2 different colors every 30 minutes.
 - Avoid using a combination of characters and background color with large difference in luminance.
 Avoid using Grey colors, which can cause Image retention easily.
 Avoid: Colors with big difference in luminance (Black & White, Grey)

FLIGHT : TIME OZ348 : 20:30 FLIGHT : TIME OZ348 : 20:30

Change the characters color periodically

- Use Bright colors with little difference in luminance
 - Cycle : Change the characters color and background color every 30 minutes $\,$

• Every 30 minutes, change the characters with movement.

- All area display Moving image together with Logo periodically.
 - Cycle: Display moving image together with Logo for 60 seconds after 4 hours in use.
- The best way to protect your monitor from Image retention is to turn Power off, or set your PC, or System to operate a Screen Saver program when you are not using it. Also Warranty service will be limited based on instruction guide.

Apply the Screen Scroll function on Product

- Apply the Screen Scroll function
 - Symptom: Horizontal Bar with Black Color move up and down.

- Select method
- . Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Screen Scroll
- . Time Interval : 1 ~ 10 hours (Recommend : 1)
- . Time Period : $1 \sim 5$ second (Recommend : 5)

☑ Note

- (Please check CD's User Guide at "OSD Function", some model's will not available)
- Apply the Screen Pixel function on Product
 - Apply the Screen Pixel function
 - Symptom: Dot with Black Color move up and down.

- Select method
- . Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Pixel
- . Time Interval: 1 ~ 10 hours (Recommend: 1)
- . Time Period : 10 \sim 50 second (Recommend : 50)
- Apply the Screen Bar function
 - Symptom: Horizontal / Vertical Bar with Black Color move up and down.

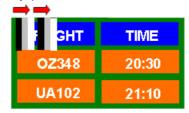

- Select method
- . Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Bar
- . Time Interval : 1 ~ 10 hours (Recommend : 1)
- . Time Period : 10 \sim 50 second (Recommend : 50)

☑ Note

• (Please check CD's User Guide at "OSD Function", some model's will not available.)

Apply the Screen Erasing function on Product

- Apply the Screen Erasing function
 - Symptom: 2 Vertical blocks move with erasing the display

- Select method
- . Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Eraser
- . Time Interval : 1 ~ 10 hours (Recommend : 1)
- . Time Period : $10 \sim 50$ second (Recommend : 50)

✓ Note

• (Please check CD's User Guide at "OSD Function", some model's will not available)

Sync Signal

Sync (Synchronized) Signals refer to the standard signals that are required to display desired colors on the LCD Display. They are divided into Vertical and Horizontal Sync Signals. These signals display normal color images by the set resolution and frequency.

Types of Sync Signals

Separate	This is a scheme of transmitting individual vertical sync signals to the LCD Display.
Composite	This is a scheme of combining vertical sync signals into one composite signal and transmitting it to the LCD Display. The LCD Display displays the color signals by separating the composite signal into original color signals.

Dot Pitch

The image on a LCD Display is composed of red, green and blue dots. The closer the dots, the higher the resolution. The distance between two dots of the same color is called the 'Dot Pitch'. Unit: mm

Vertical Frequency

The screen must be redrawn several times per second in order to create and display an image for the user. The frequency of this repetition per second is called the Vertical Frequency or Refresh Rate. Unit: Hz

E	K 41
Example:	If the same light repeats itself 60 times per second, this is regarded as 60 Hz.

Horizontal Frequency

The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle. The inverse number of the Horizontal Cycle is called Horizontal Frequency. Unit: kHz

Interlace and Non-Interlace Methods

Showing the horizontal lines of the screen from the top to the bottom sequentially is called the Non-Interlace method while showing odd lines and then even lines in turn is called the Interlace method. The Non-Interlace method is used for the majority of LCD Display s to ensure a clear image. The Interlace method is the same as that used in TVs.

Plug & Play

This is a function that provides the best quality screen for the user by allowing the computer and the LCD Display to exchange information automatically. This LCD Display follows the international standard VESA DDC for the Plug & Play function.

Resolution

The number of horizontal and vertical dots used to compose the screen image is called the 'resolution'. This number shows the accuracy of the display. A high resolution is good for performing multiple tasks as more image information can be shown on the screen.

Example:	If the resolution is 1920 x 1080 , this means the screen is composed of 1920 horizontal dots
	(horizontal resolution) and 1080 vertical lines (vertical resolution).

Multiple Display Control (MDC)

A Multiple Display Control (MDC) is an application allowing various displays to be easily and simultaneously operated on a PC. RS-232C, a standard of serial communication, is used for communicating between a PC and a display.

Orrect Disposal of This Product (Waste Electrical & Electronic Equipment) - Europe only

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household waste at the end of its working life. To prevent possible harm to the environment or damage to health from uncontrolled waste disposal, please separate this from other types of waste and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
